Haul Truck/Worker Trip Adjustment Factor to Model

	Total (miles)
	HAUL
Haul Distance (Haz Waste Facility or Landfill)	70
Hauling Default	40
Vendor	20.40
AERMOD	1.32
% in Dispersion Model, Hauling (Haz Waste Facility or Landfill)	1.9%
Hauling Default	3.3%
% in Dispersion Model, Vendor	6.5%

Calculated in Lake AERMOD View

			Emissions (g/s)
Haul Route -TS	1081.6	m	0.509
Haul Route -FS	1042.6	m	0.491
	2124.2		1.000
Haul Route Mode	2124.2		
	2.1242	km modeled	
	0.62	km to mile conversion	
	1.32	Miles modeled	

Conservatively multiplying by largest percentage of emissions by vehicle class included within each phase

MAX: 0.054

Energy (Electricity)	431
Energy (Natural Gas)	377
EV Charging	14
Water	76
Waste	191
Construction - Amortized	191
Project Total	**3,787**

$mTCO_2e$ = Metric Tons Carbon Dioxide equivalents

10950 Washington
Operational Energy Analysis
Project Estimated Electricity demand from Electric Vehicle Supply Equipment (EVSE)

Operational year
2030

Land Use Type	Number of EVSE Charging Spaces	Average Charge (kWh/day) [a]	Days/Year	Electricity Demand (kWh/yr)	Electricity Demand (MWh/yr)
Total	**72.00**	**4.40**	**365.00**	115632	115.63

Electricity Emission Factor (MT CO2/MWh)	Electricity Emission Factor (lbs CO2/MWh)	Total EV Charging GHG Emissions Per Year
0.12	260.79	13.78

Electricity Emission Factor (MT CH4/MWh)	Electricity Emission Factor (lbs CH4/MWh)
1.50E-05	0.033

Electricity Emission Factor (MT N2O/MWh)	Electricity Emission Factor (lbs N2O/MWh)
1.81E-06	0.004

Notes:

a. Estimated based on reference sources listed below. GHG emission factors based on forcast 2030 factors.

b. Project would install EV charing spaces for 72 full EV charging stations for immediate use

c. Project would install pre-wiring for EV charging spaces for 143 parking spaces as electric vehicle capable for future .

Construction Water GHG	Electricity Emission (MT CO2e/MWh)	Electricity Emission (lbs CO2e/MWh)
4.43	0.24	531.98

Sources and Assumptions:
CalEEMod Appendix A, Pg. 8, based on given piece of equipment can pass over in an 8-hour workday
conservatively assumed acerage per day would be the same as the site acerage
-Electricity Intensity Factors - California Emissions Estimator Model (CalEEMod).
-Estimated construction water use assumed to be generally equivalent to landscape irrigation, based on a factor of 20.94 gallons per year per square foot of landscaped area within the Los Angeles area (Mediterranean climate), which assumes high water demand landscaping materials and an irrigation system efficiency of 85%. Factor is therefore (20.94 GAL/SF/year) x (43,560 SF/acre) / (365 days/year) / (0.85) = 2,940 gallons/acre/day, rounded up to 3,000 gallons/acre/day. (U.S. Department of Energy, Energy Efficiency & Renewable Energy, Federal Energy Management Program. “Guidelines for Estimating Unmetered Landscaping Water Use." July 2010. Page 12, Table 4 - Annual Irrigation Factor – Landscaped Areas with High Water Requirements).

RE: Arborist Report for Development at 10950 Washington Blvd. in Culver City, California (APN 4208-024-001, 4208-024-002, 4208-025-018).

Dear Mr. Molnar,

Thank you for contracting with Davey Resource Group regarding an arborist report for the above project. In support of your objectives, Davey Resource Group (DRG) is pleased to provide you with the following Arborist Report to support your development plan submittal to the City of Culver City.

A DRG International Society of Arboriculture (ISA) Certified and Registered Consulting Arborist conducted the site inspection of the trees located at the above address in Culver City, California on January 17th, 2024. The trees were assessed for location, size, current condition, and overall health, including existing hazards to the tree structure. This preliminary report can be used to make initial informed decisions about the trees and as part of final development plans. The site inspection determined the following:

- Eighty-four (84) trees were identified on or adjacent to the project site
- None of the identified trees were native or protected trees
- Species included Mexican fan palms (*Washingtonia robusta*), London plane tree (*Platanus hybrida*) paperbark (*Melaleuca quinquenervia*), and lemon scented gum (*Eucalyptus citriodora*)
- Preliminary development plans indicate removal of seventy-four (74) trees will be required due to significant impacts to the trees
- One (1) street tree will require removal and ten (10) street trees can potentially remain with preservation measures

Once final plans are provided, impacts and preservation potential can be established for the identified trees. Trees ultimately determined to require removal will have justification based on final development plans.

Please feel free to contact me if you would like more information or have any questions.

Sincerely,

Michael J. Bova, Principal Consultant

Notice of Disclaimer

Inventory data provided by Davey Resource Group is based on visual recording at the time of inspection. Visual records do not include testing or analysis and do not include aerial or subterranean inspection. Davey Resource group is not responsible for discovery or identification of hidden or otherwise non-observable risks. Records may not remain accurate after inspection due to variable deterioration of inventoried material and site disturbance. Davey Resource Group provides no warranty with respect to the fitness of the urban forest for any use or purpose whatsoever or for future outcomes of the inventoried trees.

Summary and Background

Hudson Pacific Properties are planning to develop the property at 10950 Washington Blvd (APN 4208-024-001, 4208-024-002, 4208-025-018). As part of the initial submittals, Culver City requires an inspection by an arborist to determine if any on-site trees are designated as “native or “protected” and/or if any street/parkway trees are present, as well as documenting all other trees on the properties. This report summarizes the inspection and makes preliminary determinations regarding tree protection and mitigation.

In January 2024, Davey Resource Group (DRG) was contracted by Hudson Pacific Properties to conduct a tree assessment to identify all trees on and adjacent to the property that may be impacted by the planned development. The request included an arborist report be provided as part of a plan submittal to the City.

A Registered Consulting Arborist (RCA #549) and ISA Certified Arborist (3372-A) inspected the site on January 17h, 2024. A total of eighty-four (84) trees were identified within the potential limits of disturbance, with five (5) being located just outside the property boundary All trees were either planted or were self-sprouting saplings of non-native trees. Tree conditions ranged from Fair for seventy-five (75) trees to Poor for nine (9) trees. A complete Tree Inventory and Condition Assessment can be found in Appendix A, Table 1**.**

Assignment

Davey Resource Group was assigned to identify and map all trees on and adjacent to the property. The resulting data was to be incorporated into an arborist summary report and CAD drawings. The report and supporting drawings would be part of a submittal to comply with this phase of the City of Culver City permitting requirements for development.

Limits of the Assignment

Many factors can limit specific and accurate data when performing evaluations of trees, their conditions, and the potential for failure or response to site disturbances. No soil or tissue testing was performed. All observations were made from the ground and no soil excavation to expose roots was performed. The most recent development plans were used to assist in determining preliminary potential construction impacts. The determinations and recommendations presented here are based on current data and conditions that existed at the time of the evaluation and cannot be a predictor of the ultimate outcome for the evaluated trees in the future. No physical inspection of the upper canopy, sounding, resistance drilling, or other technologies was used in the evaluation of the trees.

Purpose and Use of Report

The purpose of this report is to provide a summary inventory of all protected, non-protected, and street trees within the project area of impact, including an assessment of the current condition and health, as well as providing a preliminary tree protection plan for all evaluated trees/canopies that may be impacted by construction plans. The findings in this report can be used to make informed decisions on design planning and be used to guide the long-term care of the trees. This report and preliminary tree protection plan can also be submitted to the City of Culver City for permitting purposes.

Observations

Methods

A visual inspection was used to develop the findings, conclusions, and recommendations found in this report. Data collection included measuring the diameter of significant trees at approximately 54 inches above grade (DBH), height estimation, a visual assessment of tree condition, structure, and health, and a photographic record. A rating percentage (0-100%) was assigned for each tree's health, structure, and form, and the lowest percentage was used as the overall tree condition.

Both the Critical Root Zone (CRZ) and Structural Root Zone (SRZ) were calculated using industry standards and the most current plans were used to determine the preservation potential of each tree. The trees were plotted on existing CAD drawings and can be incorporated onto final development plans as part of full submissions. As plans are further revised, preservation status should be updated.

Site Observations

The project site is located at 10950 Washington Blvd. (APN 4208-024-001, 4208-024-002, 4208-025-018) in Culver City, CA (see map in Appendix C). The parcels are mixed use with commercial and retail zones. All trees are situated on mostly level ground within improved parkways, landscaped planters, and parking areas. The trees appear to be irrigated and mature for the site

All other development data, including parcel acreage, grading plans, proposed structures, and equipment staging areas, topographic or civil surveys, and utility locations are not part of this report.

Tree Observations

The eleven (11) street trees identified are all Mexican fan palms and were in Fair condition. The off-street trees were of a mixed composition of broadleaf, deciduous, and succulents. Tree condition ratings ranged from Fair for seventy-five (75) trees to Poor for nine (9) trees. Tree diameters ranged from 3 inches to 30 inches with an average diameter of about 13.5 inches. Tree heights ranged from approximately 10 feet to over 75 feet with an average height of approximately 36 feet.

A complete Tree Inventory and Condition Assessment can be found in Appendix A. Tree photographs can be found in Appendix B. A map of tree locations can be found in Appendix C.

Root Zone Calculations

The trunk diameters of the assessed trees are often used to determine the Critical Root Zone (CRZ). The CRZ is considered the ideal preservation area for a tree. It can be calculated by adding 1.5 foot of radius for every inch of trunk diameter measured at 4.5 feet from grade/breast height (DBH). For example, a tree with a DBH of 10 inches has a calculated CRZ radius of 15 feet from the trunk. A palm CRZ is determined by adding 1 foot to the SRZ, which is defined below. The CRZ represents the typical rooting area required for tree health and survival. Some impact (25% or less) within this zone is typically acceptable for fair to good-condition trees with basic mitigation/stress reduction measures. Construction activities should not occur within the SRZ of any tree to be retained. This includes but is not limited to the storage of materials, parking of vehicles, contaminating soil by washing out equipment, (concrete, paint, etc.), or changing soil grade.

The structural root zone (SRZ) was calculated using a commonly accepted method established by Dr. Kim Coder in *Conserving trees during site development.*[1] In this method, the root plate size (i.e. pedestal roots, zone of rapid taper area, and roots under compression) and limit of disruption based upon tree DBH is considered as a minimum distance that any disruption should occur during construction. A significant risk of catastrophic tree failure exists if structural roots within this given radius are destroyed or severely damaged. The SRZ is the area where minimal or no disturbance should occur without arborist supervision. The CRZ and SRZ for the surveyed trees are listed in Appendix A, Table 1 and are illustrated on CAD drawings in Appendix D.

Conclusion and Recommendations

The initial development plans include a large footprint, as well as an underground parking structure. Because of this and, based on visual evaluations, 74 trees have the potential to be severely impacted by the development and will likely need to be removed once final grading plans are provided. However, most of the street trees may be retained depending on final construction plans, with one (1) street tree being recommended for removal based on the current location of a proposed driveway.

- Any street trees will require a permit to be removed depending on final construction plans
- Trees #2-#4 and #12-#13 are on neighboring properties and are in Fair condition. They have the potential to be retained if final plans demonstrate minimal impacts and proper tree protection plans are followed
- No “Protected” trees were identified during the inventory
- Once final grading and civil plans are approved, and if any street or landscape trees can be retained, detailed tree protection plans will need to be established

LEGEND

- EXISTING TREE TO REMAIN WITH CRITICAL ROOT ZONE (CRZ) & STRUCTURAL CRITICAL ROOT ZONE (SRZ)
- EXISTING PALM OR OTHER MONOCOT
- EXISTING TREE TO BE REMOVED
- TPF — PROPOSED TREE PROTECTION FENCE (SEE DETAIL & SPECIFICATIONS)
- PROPOSED LOD

DAVEY Resource Group

NOTES:

1. TREE LOCATIONS MAY BE APPROXIMATE. OWNER AND CONTRACT ARBORIST SHALL VERIFY ALL TREE LOCATIONS AND CONDITIONS PRIOR TO CONSTRUCTION AND/OR TREATMENT OR REMOVAL.
2. PRE-CONSTRUCTION MEETING SHALL BE HELD PRIOR TO COMMENCEMENT OF DEMOLITION/CONSTRUCTION ACTIVITY. CITY ARBORIST, OWNER, DESIGN TEAM MEMBERS (PROJECT ARBORIST, LANDSCAPE ARCHITECT, ENGINEER AND ARCHITECT), CONTRACT ARBORIST, SITE AND LANDSCAPE CONTRACTORS SHALL ATTEND.
3. THE INSPECTION OF THESE TREES CONSISTED SOLELY OF A VISUAL INSPECTION FROM THE GROUND. WHILE MORE THOROUGH TECHNIQUES ARE AVAILABLE FOR INSPECTION AND EVALUATION, THEY WERE NEITHER REQUESTED NOR CONSIDERED NECESSARY OR APPROPRIATE AT THIS TIME.
4. TREES RATED "POOR" OR "DEAD" THAT ARE NOT RECOMMENDED FOR REMOVAL DUE TO CONSTRUCTION IMPACT MAY WARRANT FURTHER EVALUATION AND/OR TREATMENT OR REMOVAL.

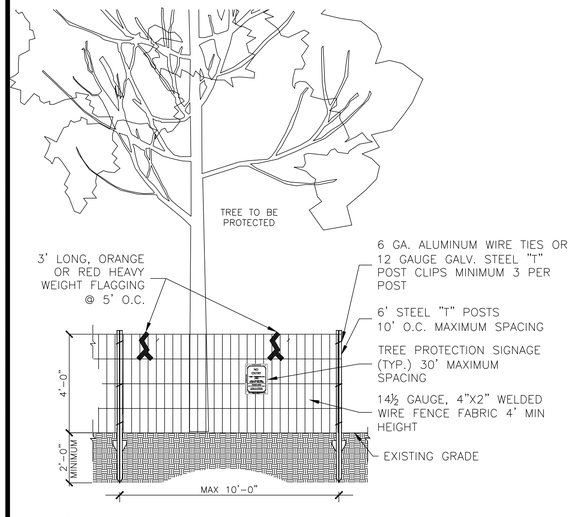
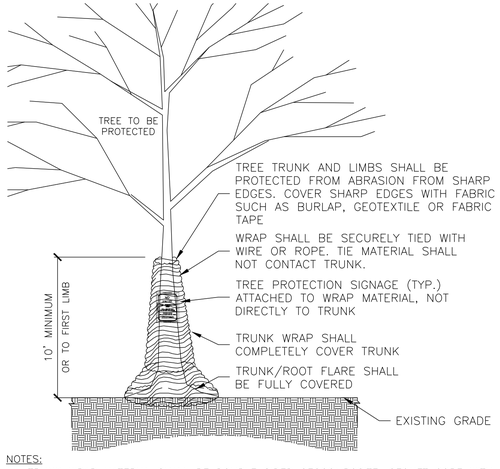
TREE PRESERVATION SPECIFICATIONS AND NARRATIVE

1. GENERAL
 1.1. REFER TO THE TREE PROTECTION ACTION KEY (TPAK) FOR SPECIFIC RECOMMENDATIONS FOR EACH TREE.
 1.2. PRIOR TO ANY DEMOLITION OR CONSTRUCTION WORK WITHIN OR ADJACENT TO TREE PROTECTION AREAS (TPA), A PRE-CONSTRUCTION SITE WALK SHALL BE HELD TO INCLUDE THE CONTRACT ARBORIST AND PROJECT ARBORIST WITH THE CONTRACTOR, ARCHITECT, *CITY ARBORIST*, AND OWNER.
 1.3. SUBSTITUTIONS OR ALTERNATIVE METHODS OR MATERIALS SHALL BE REVIEWED AND APPROVED BY *CITY ARBORIST*.
 1.4. ALL TREE PROTECTION MEASURES MUST BE IN PLACE PRIOR TO COMMENCEMENT OF DEMOLITION, SITE CLEARING OR CONSTRUCTION AND MAINTAINED THROUGHOUT CONSTRUCTION. TREE PROTECTION MEASURES MAY ONLY BE REMOVED WITH *CITY ARBORIST* APPROVAL.
 1.5. ALL MEASURES WILL BE REVIEWED AFTER INSTALLATION AND APPROVED BY OWNER AND *CITY ARBORIST*.
2. TREE PROTECTION FENCE
 2.1. INSTALL AND MAINTAIN TEMPORARY TREE PROTECTION FENCE FOR EACH TREE PROTECTION AREA AS SHOWN ON THE PLAN. INSTALLATION IS TYPICALLY AFTER ROOT PRUNING AND PRIOR TO CLEARING & GRADING.
 2.2. FENCE SHALL BE ONE OF THE FOLLOWING: (SEE DETAIL)
  2.2.1. 4' HIGH, 14 GAUGE WELDED WIRE FENCE MOUNTED ON 6' STEEL "T" POSTS SPACED NOT MORE THAN 10' APART. FENCE SHALL BE ATTACHED TO POSTS USING GALVANIZED STEEL CLIPS OR ALUMINUM TIES. PLASTIC "ZIP" TIES SHALL NOT BE USED.
  2.2.2. 6' HIGH CHAIN LINK FENCE FABRIC MOUNTED ON 8', 1.5"ø GALVANIZED STEEL PIPE LINE POSTS. CORNER POSTS SHALL BE 2"ø. FENCE SHALL BE ATTACHED TO POSTS USING ALUMINUM TIES. PLASTIC "ZIP" TIES SHALL NOT BE USED.
  2.2.3. "SUPER SILT FENCE" (SILT FENCE WITH AN INCORPORATED CHAIN LINK FENCE FABRIC) INSTALLED AS SPECIFIED BY APPROPRIATE STATE OR LOCAL EROSION AND SEDIMENT CONTROL REQUIREMENTS.
 2.3. SILT FENCE SHALL BE COORDINATED FOR INSTALLATION TO ENHANCE PROTECTION AND AVOID UNNECESSARY ROOT CUTS BY SILT FENCE INSTALLATION.
 2.4. FENCE SHALL REMAIN FOR THE DURATION OF CONSTRUCTION. FENCE MAY BE REMOVED ONLY AFTER ALL CONSTRUCTION AND FINAL LANDSCAPING IS COMPLETE AND WITH *CITY ARBORIST* APPROVAL.
3. TREE PROTECTION AREA SIGNS
 3.1. TREE PROTECTION AREA SIGNS SHALL BE AFFIXED TO ALL TREE PROTECTION FENCE AT 30' SPACING AVERAGE.
 3.2. SIGNS SHALL BE BILINGUAL (ENGLISH AND SPANISH).
 3.3. SIGNS SHALL NOT BE AFFIXED DIRECTLY TO TREES.
 3.4. SIGN MATERIAL SHALL BE WATERPROOF, HEAVY VINYL OR SIMILAR.
 3.5. SIGNS SHALL BE MAINTAINED THROUGHOUT CONSTRUCTION.
4. WOOD CHIP MULCH
 4.1. INSTALL MULCH FOR DESIGNATED SIGNIFICANT TREES. MULCH AREA SHALL BE ONE OF THE FOLLOWING, AT THE DISCRETION OF THE CONTRACT ARBORIST AND OWNER:
  4.1.1. INSTALL MULCH BED RINGS. MULCH SHOULD COVER AT LEAST THE ENTIRE STRUCTURAL ROOT ZONE. LARGER MULCH BEDS ARE PREFERRED.
  4.1.2. PROVIDE CONTINUOUS MULCH STRIP 10' TO 15' WIDE ALONG LOD WITHIN PRESERVED CRZ AREAS.
 4.2. MULCH SHALL BE INSTALLED TO A DEPTH OF 4". TOTAL MULCH DEPTH SHALL NOT EXCEED 4" SHOULD EXISTING MULCH BE PRESENT.
 4.3. MULCH SHALL BE DOUBLE GROUND SHREDDED HARDWOOD, AGED FOR AT LEAST 6 MONTHS FROM AN APPROVED SOURCE. INSUFFICIENTLY OR IMPROPERLY AGED MULCH CONTAINING HIGH BACTERIAL COUNTS OR HIGH LEVELS OF BARK, WALNUT, INVASIVE SPECIES, OR OTHER MATERIALS RESISTANT TO DECOMPOSITION SHALL NOT BE USED.
 4.4. MULCH SHALL NOT CONTACT TRUNK OF TREES.
 4.5. EDGING SHALL NOT BE USED.
5. CONSTRUCTION MONITORING/INSPECTIONS
 5.1. A CERTIFIED ARBORIST SHALL ACTIVELY MONITOR THE SITE TO ENSURE ADHERENCE TO ALL TREE PROTECTION REQUIREMENTS.
 5.2. THIS WORK IS TYPICALLY PREFORMED BY THE CONTRACT ARBORIST, TO BE HIRED BY THE GENERAL CONTRACTOR OR OWNER.
 5.3. SCHEDULE:
  5.3.1. PHASE 1 (DURING INITIAL CLEARING AND INSTALLATION OF TREE PROTECTION AND PERIMETER E&S CONTROLS) INSPECTIONS SHALL BE AT LEAST WEEKLY.
  5.3.2. PHASE 2 (DURING ALL REMAINING SITE WORK AND UNTIL PROJECT COMPLETION) INSPECTIONS SHALL BE AT LEAST MONTHLY.
  5.3.3. TRANSITION FROM WEEKLY TO MONTHLY SCHEDULE SHALL REQUIRE OWNER AND *CITY ARBORIST* APPROVAL.
 5.4. REPORTS SHALL BE PROVIDED TO THE OWNER AND *CITY ARBORIST*. REPORTS SHALL DOCUMENT CONDITION OF TREE PROTECTION DEVICES AND PROVIDE RECOMMENDATIONS FOR MAINTENANCE AND/OR ADDITIONAL CARE.
 5.5. ADDITIONAL ARBORIST INSPECTIONS AND/OR DIRECT ARBORIST OVERSIGHT OF CRITICAL TREE PRESERVATION ACTIVITIES, TREE PRUNING, TREE REMOVAL, OR OTHER SENSITIVE ACTIVITIES MAY BE REQUIRED. WEEKLY INSPECTIONS DO NOT SATISFY THE NEED FOR DIRECT ARBORIST OVERSIGHT THAT MAY BE REQUIRED FOR SPECIFIC ACTIVITIES.
6. MISCELLANEOUS TREE PROTECTION REQUIREMENTS
 6.1. NO TOXIC MATERIALS SHALL BE STORED WITHIN 100' OF TREE PROTECTION AREAS.
 6.2. ALL WORK IN OR NEAR TREE PROTECTION AREAS SHALL BE PERFORMED IN A MANNER TO MINIMIZE DAMAGE TO TREES, SHRUBS, GROUND COVER, SOIL AND ROOT SYSTEMS.
 6.3. MECHANIZED EQUIPMENT SHALL NOT BE PERMITTED TO ENTER ANY TREE PROTECTION AREAS WITHOUT EXPLICIT APPROVAL BY THE PROJECT ARBORIST AND *CITY ARBORIST*, AND WITH ADEQUATE APPROVED ROOT PROTECTION DEVICES.
7. CANOPY PRUNING & SUPPORT CABLES
 7.1. CANOPY PRUNING SHALL BE CLEANING PRUNING AND/OR RESTORATION PRUNING AND SHALL BE IN CONFORMANCE WITH CURRENT ANSI A300 STANDARDS AND ISA BEST MANAGEMENT PRACTICES.
 7.2. PRUNING SHALL REMOVE ONLY DEAD, DYING, DAMAGED OR BROKEN BRANCHES GREATER THAN 1" IN DIAMETER. PRUNING OF SMALL TREES MAY INCLUDE REMOVAL OF LIMBS TO IMPROVE STRUCTURE.
 7.3. FOLIAGE REMOVAL SHALL NOT BE MORE THAN 25% OF THE TOTAL LIVE CANOPY VOLUME OF ANY TREE IN ANY ONE SEASON. PRUNING SHALL NOT REMOVE INTERIOR BRANCHING EXCEPT AS OTHERWISE STATED.
 7.4. PRUNING FOR SPECIFIC CLEARANCE (FOR CONSTRUCTION ACCESS OR PROPOSED IMPROVEMENTS) SHALL BE REVIEWED AND APPROVED BY THE OWNER AND *CITY ARBORIST*.
 7.5. SUPPORT CABLES SHALL BE INSTALLED IN CONFORMANCE WITH CURRENT ANSI A300 STANDARDS AND ISA BEST MANAGEMENT PRACTICES.
8. TREE CONDITION MONITORING INSPECTIONS
 8.1. CONTRACT ARBORIST SHALL PROVIDE MONITORING OF THE CONDITION OF RETAINED TREES IN TREE PROTECTION AREAS, AND TREATMENT OF DETRIMENTAL CONDITIONS (INSECTS, DISEASES, NUTRIENT DEFICIENCIES, SOIL MOISTURE, ETC.), AS THEY OCCUR, OR AS APPROPRIATE FOR EFFECTIVE MANAGEMENT.
 8.2. INSPECTIONS SHALL BE PERFORMED AT LEAST MONTHLY DURING THE GROWING SEASON, BEGINNING PRIOR TO CONSTRUCTION AND CONTINUING THROUGHOUT CONSTRUCTION AND FOR AT LEAST ONE YEAR SUBSEQUENT TO COMPLETION OF CONSTRUCTION ACTIVITIES.
 8.3. A WRITTEN SUMMARY REPORT INCLUDING SPECIFIC TREATMENTS MADE AND RECOMMENDATIONS FOR ADDITIONAL TREATMENTS SHALL BE PROVIDED TO THE OWNER AND PROJECT ARBORIST SUBSEQUENT TO EACH INSPECTION.
9. TREE TRUNK PROTECTION WRAP
 9.1. TRUNKS OF TREES IN CLOSE PROXIMITY TO CONSTRUCTION SHALL BE PROTECTED WITH A SINGLE WRAP OF GEOCOMPOSITE. GEOCOMPOSITE SHALL BE DOUBLE SIDED, GEONET CORE WITH NON-WOVEN COVERING (SUCH AS TENSAR ROADRAIN RD7) OR EQUIVALENT.
 9.2. WRAP SHALL BE NOT LESS THAN 10' HIGH ON TRUNK OR UP TO THE LOWEST LIMB (WHICHEVER IS LESS). EXPOSED ROOT FLARE SHALL ALSO BE FULLY COVERED.
 9.3. WRAP SHALL BE TIED WITH ROPE OR WIRE. TIE MATERIAL SHALL NOT CONTACT TRUNK.
 9.4. WRAP SHALL BE REMOVED PROMPTLY AFTER CONSTRUCTION.
10. PUBLICATIONS INCLUDED BY REFERENCE
 PUBLICATIONS LISTED HEREIN ARE PART OF THIS WORK TO EXTENT REFERENCED:
 10.1. ANSI A300 STANDARD PRACTICES FOR TREES, SHRUBS, AND OTHER WOODY PLANT MAINTENANCE
  10.1.1. PART 1 -- 2017, TREE PRUNING
  10.1.2. PART 2 -- 2018, SOIL MANAGEMENT
  10.1.3. PART 3 -- 2013, SUPPLEMENTAL SUPPORT SYSTEMS
  10.1.4. PART 4 -- 2014, LIGHTNING PROTECTION SYSTEMS
  10.1.5. PART 5 -- 2019, MANAGEMENT OF TREES AND SHRUBS DURING SITE PLANNING, SITE DEVELOPMENT, AND CONSTRUCTION
  10.1.6. PART 6 -- 2018, PLANTING AND TRANSPLANTING
  10.1.7. PART 8 -- 2020, ROOT MANAGEMENT
  10.1.8. PART 9 -- 2017, TREE RISK ASSESSMENT
  10.1.9. PART 10 -- 2016, IPM
 10.2. ANSI Z133.1 -- 2017 AND MOST RECENT UPDATES, ARBORICULTURAL OPERATIONS -- SAFETY REQUIREMENTS



NOTES:
1. TREE PROTECTION FENCE SHALL BE INSTALLED PRIOR TO ANY SITE WORK, CLEARING OR DEMOLITION.
2. WHERE REQUIRED, SUPER SILT FENCE MAY BE USED IN LIEU OF WELDED WIRE FOR TREE PROTECTION PROVIDED IT IS INSTALLED AND MAINTAINED AS A TREE PROTECTION MEASURE AND IS POSTED WITH TREE PROTECTION SIGNS.
3. TREE PROTECTION FENCE SHALL BE MAINTAINED THROUGHOUT CONSTRUCTION. REMOVE FENCE ONLY WITH APPROVAL AND AFTER ALL SITE WORK HAS BEEN COMPLETED.

1/2 WELDED WIRE TREE PROTECTION FENCE (TYPICAL)
SCALE: NTS



NOTES:
1. TRUNK WRAP MATERIAL SHALL BE DOUBLE SIDED GEOCOMPOSITE, GEONET CORE WITH NON-WOVEN COVERING (SUCH AS TENSAR ROADRAIN RD7) OR EQUIVALENT.
2. WRAP SHALL BE INSTALLED BY A CERTIFIED ARBORIST.
3. WRAP SHALL BE INSTALLED PRIOR TO ANY SITE WORK, CLEARING OR DEMOLITION.
4. WRAP SHALL BE MAINTAINED THROUGHOUT CONSTRUCTION. REMOVE WRAP ONLY WITH APPROVAL AND AFTER ALL SITE WORK HAS BEEN COMPLETED.
5. WRAP SHALL BE REMOVED PROMPTLY AFTER CONSTRUCTION.
6. MAJOR SCAFFOLD LIMBS MAY ALSO REQUIRE THIS PROTECTION AS DIRECTED BY THE PROJECT ARBORIST.

Michael Bova

Principal Consultant/Project Developer

Michael Bova is a principal consultant and project developer with Davey Resource Group (DRG) in Southern California. Michael works with municipalities, commercial properties, homeowners associations, and private entities throughout the Southern Region of California. He has managed numerous significant urban forestry projects throughout Central and Southern California. He works with many municipalities, landscape architects, and planning firms in assisting their clients in understanding the structure, function and value of their tree resource, as well as assisting construction firms in developing tree protection plans. He has served as an expert witness and as a professional arboriculture and landscape industry advisor. Michael has authored numerous detailed technical and consulting reports for a variety of clients throughout the Central Coast and Southern California.

Michael is a principal consultant for specialized consulting. Within this capacity he provides higher level consulting, including sonic tomography and other precision tools for DRG urban forestry projects throughout the western U.S. He supports many clients in their efforts to help control invasive pests, including Polyphagous Shot Hole Borer, through the use of innovative technologies to monitor and compile in-depth data. He previously managed the City of Los Angeles Street Tree Inventory, which encompasses up to one million trees and is the largest tree inventory in the country. Additionally, Michael continues to provide leadership by customizing solutions unique to each client and coordinating the wide variety of resources that DRG and other Davey service lines have to offer.

Education

- American Society of Consulting Arborists Consulting Academy Graduate
- Clear Teaching Credential; Single Subject Agriculture and Agriculture Specialist, California Polytechnic State University, San Luis Obispo, CA
- M.S., with Distinction, Agricultural Science with a specialization in Education, California Polytechnic State University, San Luis Obispo, CA
- B.S., Agricultural Science, California Polytechnic University, Pomona, CA
- A.S., Agricultural Science, Cerritos Community College, Cerritos, CA

Certifications

- Certified Arborist (#WE-3372A), International Society of Arboriculture (ISA)
- Tree Risk Assessment Qualification (TRAQ), ISA
- Registered Consulting Arborist (#549), American Society of Consulting Arborists

ARGcreate.com

Memorandum

To	Chris Pearson Hudson Pacific Properties 11601 Wilshire Boulevard Los Angeles, CA 90025
Project:	10950 Washington Boulevard, Culver City, CA
Project No.:	231116
Date:	May 15, 2024
Via:	E-mail: Korinna Anderson, Allen Matkins: kanderson@allenmatkins.com

Architectural Resources Group (ARG) has prepared this memorandum to provide our professional opinion regarding the potential eligibility of the property at 10912-50 Washington Boulevard, Culver City, against federal (National Register of Historic Places), state (California Register of Historical Resources), and local (Culver City Cultural Resource) eligibility criteria. The property contains a one-story office and studio building built between 1958 and 1960 (10912 Washington Blvd.), a three-story office building and integrated parking garage constructed in 1974 (10950 Washington Blvd.), and two rear surface parking lots.

Neither of the buildings on the site have been formally designated under any federal, state, or local registration programs, and they do not appear in California's Built Environment Resource Directory (BERD). Furthermore, they were not identified through Culver City's 1987-1988 field survey of significant structures.

Upon additional, limited property-specific research and site inspections of the property on December 14, 2023 and March 14, 2024, ARG has preliminarily determined that neither 10912 Washington Blvd. nor 10950 Washington Blvd. appears to be eligible for listing in the National Register, California Register, or as Culver City Cultural Resources under the "Landmark" or "Significant" levels. The buildings do appear to meet eligibility criteria as Culver City Cultural Resources at the "Recognized" level. However, this designation is honorific only and carries no protections or regulatory implications, and it does not meet the definition of a "historical resource" under the California Environmental Quality Act (CEQA). Following is a discussion regarding how this finding was made.

Physical Description

Site

The subject property spans three irregularly shaped parcels at the center of the block between Elenda Street on the east and Huron Avenue on the west, on the south side of Washington Boulevard in Culver City, CA. The property is developed with a one-story office and studio building constructed in phases between 1958 and 1960 (10912 Washington Blvd.) and a three-story office building with an integrated above-ground parking structure built in 1974 (10950 Washington Blvd.). The building at 10912 Washington Blvd. is located along the northeast edge of the easternmost parcel, and the building at 10950 Washington Blvd. spans all three parcels. The two buildings are separated by a long concrete driveway, which leads to two asphalt surface parking lots at the rear of the property. Two guard shacks are located along the east side of the shared central driveway. Another narrow asphalt driveway runs along the west side of 10950 Washington Blvd. and connects to the west rear parking lot.

10912 Washington Blvd.

The one-story building at 10912 Washington Blvd. was completed in phases between 1958 and 1960 – the west half was constructed in 1958, and the east half was added in 1960. The building has an irregular plan and a primarily flat roof (a rear corrugated metal rooftop addition is low pitched). A corrugated metal screen conceals rooftop mechanical equipment along the north and west perimeter of the original 1958 building portion. The building is constructed of concrete and sits on a concrete foundation. Exterior walls are composed of painted concrete masonry units (CMUs), unfinished precast concrete, painted concrete panels, and smooth unpainted concrete parge coat. Paired and grouped fixed and sliding metal windows comprise the building's fenestration.

The west (1958) half of the building's north (street-facing) façade is set back from the street. At the center of the west portion is a projecting rectangular volume enclosed with a double-height fixed window assembly. The east side of the volume is surrounded by a low concrete wall featuring a vertical channel pattern matching exterior walls at 10950 Washington Blvd. Concrete brise-soleils screen the east and west sides of the volume. The east (1960) half of the building's north façade projects further than the west half and sits flush with the angled sidewalk along Washington Boulevard. This portion of the façade is lined with grouped fixed and sliding metal windows.

The west façade faces the shared driveway between this building and 10950 Washington Blvd. Near the center of the façade is a raised concrete entrance podium fronted by a textured

concrete block wall. The main central entrance comprises multiple fully glazed aluminum doors surrounded by fixed glass and recessed behind a concrete block wall with rectangular entrance openings. Other fenestration at this façade includes small sliding metal replacement windows at the north end; several window and door openings have been infilled at the south end. The south (rear) façade faces a surface parking lot and is enclosed by a metal chain link fence. Aside from large sliding doors, which lead to two studio stages, the south façade is devoid of fenestration. The east façade faces an adjacent building and is largely hidden from view from the public right-of-way; steel industrial windows and flush metal doors comprise this façade.

10950 Washington Blvd.

Constructed in 1974, the three-story building at 10950 Washington Blvd. has a roughly rectangular plan with various protruding and recessed bays on all four of its façades that create large, geometric forms. The building is constructed of concrete with a flat roof that functions as open rooftop parking. The building's exterior walls are composed of exposed, unfinished concrete and stone aggregate cladding, with a combination of both smooth and vertically channelized sections throughout. On floors two and three, the ceiling/floor extends roughly six feet to create contiguous cantilevered balconies and breezeways that are supported by rectangular concrete posts and stretch around the building's four façades. The same motif is repeated above the first floor on the rear portion of the east and west façades. Several concrete stairwells connect the parking structure to the office building.

At the intersection of the north (street-facing) and east (primary) façades is a rectangular, concrete-paneled volume that stretches two stories in height, obscuring the first two floors of the building's northeast corner.[1] The building's main entrance is located on its east (primary) façade and comprises two sets of glass double doors with aluminum framing surrounded by fixed aluminum-framed windows. The doors and windows appear to be replacements, as they have lighter-colored aluminum framing with a different profile than the historic windows and doors.[2] Additionally, some of the glazing is frosted, and the entire entry storefront assembly appears to have been recessed further than the original entrance (the concrete wall and ceiling immediately surrounding the entrance are lighter in color, suggesting they may have originally been part of the interior of the building).[3] A second entrance is present at the center of the west façade and is composed of a single fully glazed door surrounded by fixed dark aluminum-framed windows, all of which appear to be original. Other windows throughout the building are fixed windows with

[1] While this volume appears in historic (1976) aerial photographs, the panel cladding appears to be contemporary.
[2] Historic doors and windows have dark, anodized aluminum frames and darker tinted glass.
[3] ARG was unable to find building permits indicating when the entry doors and surrounding glazing were replaced.

dark aluminum frames and tinted glass. The building is immediately fronted by non-historic drought tolerant landscaping on its north, east, and west sides, with the addition of various metal benches and seating areas fronting its primary (east) façade.

View southwest of 10950 Washington Blvd., east entrance. Note replaced entrance doors, storefront glazing, and metal panel wall cladding. (ARG, 2023)

View southeast of 10950 Washington Blvd. Note new panelized concrete cladding at the projecting rectangular volume on the northeast corner. (ARG, 2023)

Aerial photographs from 1976 (left, NETR Online) and 2003 (right, Google Earth). Note the projecting volume at the northeast corner of 10950 Washington Blvd. (indicated by red arrow) appears to be original, however, it has been reclad in concrete paneling.

Chronology of Development and Use

Site

1958-1974: The three parcels at the southwest corner of Washington Boulevard and Elenda Street were developed with a one-story industrial office building (10912 Washington Blvd.) and two-story office building with integrated parking structure (10950 Washington Blvd.).

1972: Permit pulled for the development of a parking lot at the rear of the property.[4]

1981: Existing chain link fence repaired by Burkett Fence Company.[5]

1997: Permit pulled to build security wall for storage space with 2x4" studs and drywall siding.[6]

2011: Permit pulled to install 204' of chain link fencing.[7]

2006: Permit pulled to add traffic control curbs and gates per Title 22. Owner listed as ECI Washington LLC. Architect listed as Steve Tomko. Contractor listed as Matrix Interior Construction Inc.[8]

2007: Permit pulled for a new security station and to relocate traffic controls.[9]

2008: Permit pulled to remove and replace mechanical equipment, including concrete pad extensions and anchoring.[10]

[4] City of Culver City Department of Building and Safety, Building Permit No. A18266.
[5] City of Culver City Department of Building and Safety, Building Permit No. A23981.
[6] City of Culver City Department of Building and Safety, Building Permit No. 42928.
[7] City of Culver City Department of Building and Safety, Building Permit No. 79655.
[8] City of Culver City Department of Building and Safety, Building Permit No. 67402.
[9] City of Culver City Department of Building and Safety, Building Permit No. 69454.
[10] City of Culver City Department of Building and Safety, Building Permit No. 73204.

10912 Washington Blvd.[11]

1957: Permit pulled for the construction of an "office and warehouse" building. West America Construction Company is listed as the contractor.[12]

1958: A one-story, 25,000-square-foot building was completed on the former location of Culver City's famous Plantation Café and night club (demolished in 1954).[13] Industrial developers and brokers R.G. Harris Company commissioned the building.[14]

Shortly after its completion, the building was acquired by Litton Industries, an electronics company whose headquarters were located in Beverly Hills. Litton planned to develop a new $1.5 million engineering and research facility on the site, including adapting the recently completed building on the property and adding two new buildings to the site.[15]

Litton Industries moved into the existing building in May 1958.[16] Based on historic documentation, Litton's plans for development of the other two buildings were never realized, and the company sold the property in 1960.[17]

1960: Electronics research and development company Motorola, Inc. acquired the property from Litton Industries and began construction on a 37,000-square-foot east addition to the existing 25,000-square-foot building. The new building was intended to house manufacturing operations for the company's aviation products branch as well as the headquarters for Motorola Aviation Electronics, Inc., a sales subsidiary of the corporation.[18]

---

[11] The building is referred to as both "10912" and "10916" interchangeably in various newspaper articles from 1963-1972.
[12] City of Culver City Department of Building and Safety, Building Permit No. A7701.
[13] "Pioneering Firm: Motorola Leads in Development of Aviation Electronic Systems," *Evening Vanguard*, August 6, 1962; "Motorola Plant Bought: $1.4 Million Plant Purchase Expands Avnet Operations," *Evening Vanguard*, October 25, 1963.
[14] "Electronic Plant Slated in Culver," *Evening Vanguard*, April 18, 1958.
[15] Ibid.
[16] "Occupancy of Initial Building is Scheduled," *Los Angeles Times*, May 25, 1958.
[17] "Motorola Starts New Construction," *Los Angeles Evening Citizen News*, June 29, 1960.
[18] Ibid.

The new plant's design and construction was completed by Sheldon L. Pollack & Associates, and construction cost $1.2 million.[19]

1963: Electronics supply firm Avnet Electronics Corp. purchased the Motorola plant for $1.4 million; the purchase price included Motorola machinery. The new Avnet plant, which opened in December 1963, housed "sales staff and the related assembling, processing and high reliability testing facilities of the company's own electronics operations in Los Angeles, Avnet's Hamilton Electro subsidiary and Fairmont Automotive West Coast branch."[20]

1973: Hamilton/Avent's expansion in the early 1970s prompted the need for additional square footage, and plans were made for the construction of a new office building at 10950 Washington Blvd., on the parcel adjacent to their existing operations. At this time, the company's existing facility at 10912 Washington Blvd. underwent a redesign and remodel by architect Widom/Wein Associates.[21]

The building's redesign included its adaption for assembly and warehouse functions as well as for an employee center with dining and meeting rooms.[22]

1975: Permit pulled for an exterior remodel of the building (extent of work not specified). The builder is listed as Kersey-Kinsey Company, who was also responsible for construction of the new adjacent Hamilton/Avnet building at 10950 Washington Blvd.[23]

Permit pulled to for interior partitions and other interior alterations to the building. The building's use is listed as "sales & warehouse."[24]

1976: Permit pulled for remodeling at the rear of the building. Work included modifications to the existing dock canopy and construction of a guard shack.[25]

Permit pulled for the construction of a conveyor system inside the building.[26]

[26] City of Culver City Department of Building and Safety, Building Permit No. A20845.

1984: Permit issued for earthquake repairs to the ceiling; HVAC and lighting improvements.[27]

1994: Various permits issued for tenant improvements and code compliance.

Permit issued for earthquake damage repair (extent of work not specified).[28]

1997: Hamilton/Avnet Electronics sold the building, along with the adjacent building at 10950 Washington Blvd., to Ten 9 Fifty LLC. on January 3rd for $7.6 million.[29]

Permit pulled for demolition of "portion of existing warehouse roof seismic bracing." Architect listed as Tomko Woll Group Architects Inc.[30]

Permit pulled for removal of 22,000 square feet of roofing and installation of a new steel structure by Pinnacle Contracting Company.[31] Based on historic aerial photographs, the steel structure addition was built on the rooftop at the rear of the building.[32]

1999: Certificate of Occupancy issued on December 29th for the building's use as a "film production facility."[33]

2004: Ten 9 Fifty LLC./Skye Partners 2 LLC. sold the building to ECI Washington LLC. on July 23rd.[34]

2006: Permit pulled for the installation of a new lighting grid structure at Stage 2.[35]

2007: Permit pulled to install screening for mechanical equipment.[36]

[35] City of Culver City Department of Building and Safety, Building Permit No. 66946.
[36] City of Culver City Department of Building and Safety, Building Permit No. 69783.

2010: ECI Washington LLC. sold the building to Hudson 10950 Washington LLC. on December 17th.[37]

1997-present: Various tenants occupied the building during the ownership tenure of Ten 9 Fifty LLC./Skye Partners 2 LLC., ECI Washington LLC., and Hudson 10950 Washington LLC., the latter of which currently owns the vacant building. The building was most recently occupied by the NFL Network.[38]

In addition to the alterations noted above, ARG observed changes to the building that were not documented in building permits or other source materials. Below is a list of the changes noted by ARG during visual inspection:

- Original cladding was removed and exterior unfinished precast concrete walls exposed at the north façade
- Painted concrete panel cladding was added to the north façade
- Most windows were replaced throughout the building
- Several window and door openings were added and infilled, primarily along the west façade
- A raised entrance platform and ramp and new recessed entrance were added along the west façade
- A low concrete wall with a vertical channel pattern was added along a portion of the north façade entrance (likely in the 1970s when 10950 Washington Blvd. was built since it matches this building's exterior cladding)

[37] City of Culver City, City Clerk, Grant Deed No. 651091993; "Hudson Pacific Properties Acquires 10950 Washington Blvd., Expanding its Los Angeles Office Portfolio to 1.5 Million Square Feet," *Business Wire*, December 22, 2010.

10950 Washington Blvd.

1973:	Permit pulled on November 30th for three-story concrete and glass commercial office and parking structure. Owner is listed as Hamilton/Avnet Electronics. Architect is listed as Jules Greenstein of Widom, Wein and Associates. Contractor is listed as Kersey-Kinsey Company.[39]
1974:	Office building and parking structure completed.[40]
1976:	Certificate of Occupancy issued for "three-story office and parking structure, including rooftop parking" on March 25th.[41]
1990s-2000s:	Several permits pulled for the replacement and installation of new signage with changes in ownership/occupancy.
1993:	Permit pulled for graffiti removal sandblasting on the building's exterior (exact location unknown).[42]
1997:	Hamilton/Avnet Electronics sold the building, along with 10912 Washington Blvd., to Ten 9 Fifty LLC. on January 3rd for 7.6 million dollars.[43]
	Permit pulled to install stucco walls "in front of two blocks" on east wall. Skye Partners 2 Inc. listed as the building owner.[44]
2004:	Ten 9 Fifty LLC./Skye Partners 2 LLC. sold the building to ECI Washington LLC. on July 23rd.[45]
2006:	Permit pulled for reroofing with 4-ply built up cap sheet roof and white coating. Owner listed as ECI Washington LLC.[46]

[39] City of Culver City Department of Building and Safety, Building Permit No. A18959.

[45] City of Culver City, City Clerk, Grant Deed No. 138102985.
[46] City of Culver City Department of Building and Safety, Building Permit No. 66961.

2010: ECI Washington LLC. sold the building to Hudson 10950 Washington LLC. on December 17th.[47]

1997-present: Various tenants occupied the building during the ownership tenure of Ten 9 Fifty LLC./Skye Partners 2 LLC., ECI Washington LLC., and Hudson 10950 Washington LLC., the latter of which currently owns the vacant building. Previous tenants include Industry Bar and Grill, Magnet Interactive, Intertainer Inc., Tenva Realty, SDI Media, and the NFL Network.[48]

In addition to the alterations noted above, ARG observed changes to the building that were not documented in building permits or other source materials. Below is a list of the changes noted by ARG during visual inspection:

- Main entrance doors and surrounding fixed glazing were replaced with new aluminum doors/windows in a different (lighter) color and profile than the original. The entry was also further recessed in its opening, indicated by the lighter colored concrete wall and ceiling immediately surrounding the new entrance assembly.
- Panelized metal cladding was added on wall projections south of the main entrance.[49]
- Panelized concrete cladding was added to the rectangular volume situated at the building's northeast corner on the street-facing (north) façade.[50]

[47] City of Culver City, City Clerk, Grant Deed No. 651091993; "Hudson Pacific Properties Acquires 10950 Washington Blvd., Expanding its Los Angeles Office Portfolio to 1.5 Million Square Feet," *Business Wire*, December 22, 2010.

[49] See detail photograph in "Existing Conditions Photographs" section above.
[50] See detail photograph in "Existing Conditions Photographs" section above. The 1976 aerial depicts a slight rectilinear projection at the building's northeast corner, indicating this volume was probably an original feature. However, the volume was presumably originally clad in unfinished concrete and stone aggregate before the panelized concrete cladding was added.

Historical Background Summary

10912 Washington Blvd.

The building at 10912 Washington Blvd. was constructed in two phases – the west half was completed in 1958 and the east half in 1960. Shortly after its initial construction by industrial developers and brokers R.G. Harris Company, Litton Industries acquired the building and was its first occupant. Originally founded as the Electro Dynamics Corporation in 1953 by Charles Bates "Tex" Thornton, the company's name was changed the following year when Thornton acquired Litton Industries, Inc., an electron-tube manufacturer. By the late 1950s, Litton Industries was one of the leading electronics manufacturing firms in the country, specializing in the development of navigation, communications, and electronic warfare equipment.[51] 10912 Washington Blvd. was Litton's 18th installation in the U.S. and abroad, with its headquarters in Beverly Hills. While the company initially planned to construct an expansive $1.5 million engineering and research facility at 10912 Washington Blvd., it ultimately decided on a much smaller remodeling project to adapt the existing building on the site, which it then only occupied for two years.[52]

In 1960, Motorola, Inc. acquired the building. Founded in 1928 in Chicago by Paul and Joseph Galvin, the company was originally known as Galvin Manufacturing Corporation and specialized in wireless communications and electronics systems. In 1947, its name was changed to Motorola, after the company's highly popular automobile radio that was first developed in the 1930s.[53] In the postwar period, Motorola expanded its operations to include development of "a complete line of aircraft radio, navigation, communication, and flight control systems."[54] Shortly after acquiring 10912 Washington Blvd., Motorola broke ground on the construction of a 37,000-square-foot addition, attached to the east side of the existing building. The new plant's design and construction was completed by local architect and developer Sheldon L. Pollack & Associates, and construction cost $1.2 million.[55] Per newspaper records, "Remodeling of the existing building was undertaken by the Pollack company during actual construction operations, allowing Motorola to modify their interior partitioning and other design factors, up to the point of completion, without interruption of their daily activities."[56] Completed in late 1960, the expanded facility

housed manufacturing operations for the company's aviation products branch as well as the headquarters for Motorola Aviation Electronics, Inc., a sales subsidiary of the corporation.[57]

Motorola's occupation of the new plant was short lived, and the corporation sold 10912 Washington Blvd. to Avnet Electronics Corporation in 1963. Avnet Electronics was founded in the 1920s in New York City by Charles Avnet, who began the company to buy and sell surplus radio parts. During World War II, the company manufactured and sold antennas to the U.S. military. As the war came to a close, however, it shifted its focus to manufacturing connectors, and by 1955 had become a "thriving business manufacturing and assembling connectors to customers' specifications."[58] Avnet incorporated that same year, and a year later opened its first West Coast facility to serve the aviation and missile industries.[59] The first West Coast branch of Avnet Electronics was located at 8966 National Blvd. in Palms before it moved to 5877 Rodeo Rd. in Los Angeles sometime in the late 1950s. Per newspaper records, the company occupied two other locations prior to acquiring 10912 Washington Blvd.[60] Following its relocation to 10912 Washington Blvd., the company merged with Hamilton Electro Sales, founded by Tony Hamilton, a "leading figure in electronics distribution on the West Coast."[61] While the Avnet division was primarily responsible for manufacturing and assembling, Hamilton's division focused on marketing the electronics parts produced by Avnet. Hiring notices in local newspapers indicate that the company's West Coast operation had been renamed "Hamilton/Avnet Electronics" by 1972.[62]

To accommodate its expanding operations and personnel, Avnet/Hamilton Electronics filed a building permit in 1973 to erect a new three-story commercial office building and parking structure on the parcel to the immediate west of its current 10912 Washington Blvd. headquarters. In conjunction with the development of the new office building at 10950 Washington Blvd. (completed in 1974), the building at 10912 Washington Blvd. was remodeled for use as storage and warehouse facilities, as well as an employee center with dining and

meeting rooms. Together, 10912 and 10950 Washington Blvd. served as the West Coast headquarters for Avnet/Hamilton Electronics until the buildings were sold in 1997. At this time, the firm permanently relocated to Phoenix, Arizona, where it is still headquartered today.[63]

Both 10912 and 10950 Washington Blvd. were acquired by Ten 9 Fifty LLC. after they were vacated by Avnet/Hamilton Electronics in 1997. Various building permits indicate that Ten 9 Fifty LLC, a subsidiary of New York real estate firm Angelo Gordon and Company, also operated under the business name "Skye Partners 2 LLC." Between 1997-2003, portions of the building's interior were renovated to function as a film production facility, and tenant improvements included the construction of two sound stages.[64] Ten 9 Fifty LLC. leased the property to various tenants during its ownership.

ECI Washington LLC., another real estate holdings company, acquired 10912 and 10950 Washington Blvd. in 2004 and began leasing the buildings to the NFL Network around 2007.[65] In 2010, the buildings were sold to Hudson 10950 Washington LLC., a subsidiary of Hudson Pacific Properties. The real estate firm continues to own and operate the buildings today.[66] Various tenants occupied the building during the ownership tenure of Ten 9 Fifty LLC./Skye Partners 2 LLC., ECI Washington LLC., and Hudson 10950 Washington LLC. The building was most recently occupied by the NFL Network. It's been vacant since 2022.[67]

[67] City of Culver City Department of Building and Safety, various building permits; NFL Network production schedule ad, *Miami Herald*, January 22, 2007, 143.

10950 Washington Blvd.

The building at 10950 Washington Blvd. was constructed in 1974 as a three-story concrete and glass "commercial office and parking structure."[68] Building permits indicate the original owner was Hamilton/Avnet Electronics, the architect was Jules Greenstein of Widom, Wein and Associates, and the contractor was Kersey-Kinsey Company.

As described in the above developmental history for 10912 Washington Blvd., 10950 Washington Blvd. was built to accommodate Hamilton/Avnet's expansion and growing personnel in the 1970s. Together with 10912 Washington Blvd., the building at 10950 Washington Blvd. served as the West Coast headquarters for Avnet/Hamilton Electronics until the buildings were sold in 1997 to Ten 9 Fifty LLC.[69]

ECI Washington LLC. acquired 10912 and 10950 Washington Blvd. in 2004 and began leasing the buildings to the NFL Network around 2007.[70] In 2010, the buildings were sold to Hudson 10950 Washington LLC. The real estate firm continues to own and operate the buildings today, which became vacant in 2022 after longtime primary tenant, the NFL Network/NFL Media, terminated its lease.[71] Various tenants occupied the building during the ownership tenure of Ten 9 Fifty LLC./Skye Partners 2 LLC., ECI Washington LLC., and Hudson 10950 Washington LLC. In addition to the NFL Network, previous tenants include Industry Bar and Grill, Magnet Interactive, Intertainer Inc., Tenva Realty, and SDI Media.[72]

Evaluation of Significance

Upon preliminary investigation, ARG does not find the buildings at 10912 and 10950 Washington Blvd. eligible for listing in the National or California Registers, or as City of Culver City Cultural Resources at the "Landmark" or "Significant" levels. The buildings do appear eligible as Culver City Cultural Resources at the "Recognized" level. Following is an evaluation of each building against federal, state, and local registration criteria.

10912 Washington Blvd.

National Register and California Register

National and California Register Criteria A/1: associated with events that have made a significant contribution to the broad patterns of history.

The building at 10912 Washington Blvd. is associated with post-World War II development patterns in Culver City, and specifically with the city's burgeoning electronics technology industry that supplied the field of aviation during the period. After establishing itself as a satellite hub for defense parts manufacturing during the war, Culver City became home to some of the most significant aerospace and electronics companies in the second half of the 20th century, most notably the Hughes Aircraft Company, which was founded by prominent aviator Howard Hughes and played an influential role in the wartime economy of the 1940s through its contracts with the United States military.[73] From its initial construction in 1958 through 1997, the subject building was owned and occupied by multiple electronics companies, including: Litton Industries, which specialized in the development of navigation, communications, and electronic warfare equipment; Motorola, Inc., an electronics research and development company with a specialized aviation products branch; and Hamilton/Avnet Electronics, an electronics supply firm that aided the electronic, aviation, and missile industries in the decades following World War II.

However, as one of dozens of postwar industrial office buildings in Culver City, the building does not appear singularly significant for this association. And, while the building has associations with large corporations that have arguably made significant contributions to the electronics industry, Litton Industries' and Motorola's occupation of the building was short lived, and the building represented one of multiple locations that the companies operated out of during their occupation of the property. Its third owner/occupant, Hamilton/Avnet Electronics, inhabited the

[73] Architectural Resources Group, Culver City Historical Context Study, "Historical Overview of Culver City: 1945-1980," unpublished draft, 2023, 27.

building as its fifth location in the Los Angeles area, the first two of which are still extant today. As the company's fifth and final location on the West Coast, the building is not particularly representative of the company's contributions to the postwar electronics industry. Furthermore, the building has undergone significant alterations, including replacement of original cladding with contemporary panelized concrete cladding and smooth concrete parge coat, replacement of most windows and doors, the addition of highly visible corrugated metal mechanical screens and rear corrugated rooftop addition, and alterations to its original fenestration pattern (infilled and new windows/doors). These changes have compromised the building's ability to convey its original appearance and historic association with postwar industrial development patterns in the city. For these reasons, the building does not appear eligible under National and California Register Criteria A/1.

National and California Register Criteria B/2: associated with the lives of persons significant in our past.

Since its initial development between 1958 and 1960, the subject building has been occupied by various tenants associated with a range of industries, including electronics manufacturing and television and video production. Research did not find evidence of an association with any significant individuals related to any of the companies that have utilized the building. As a result, 10912 Washington Blvd. does not appear eligible under Criteria B/2.

National and California Register Criteria C/3: embodies the distinctive characteristics of a type, period, or method of construction, or that represents the work of a master, or that possesses high artistic values, or that represents a significant and distinguishable entity whose components may lack individual distinction.

Constructed in phases between 1958 and 1960, 10912 Washington Blvd. represents a modest and heavily altered example of a postwar industrial office building. It was built with typical materials and construction techniques of the period, including concrete block walls and metal windows. Based on historic newspaper images, the building was original designed as a vernacular interpretation of the Mid-Century Modern style and included the common features of the style, such as a flat roof, low horizontal profile, grouped metal windows, unornamented stucco and concrete block exterior walls, and concrete brise-soleil accent walls. Rather modest in appearance to begin with, the building has also undergone significant alterations, including replacement of original cladding with contemporary panelized concrete cladding and smooth concrete parge coat, replacement of most windows and doors, the addition of highly visible corrugated metal mechanical screens and rear corrugated rooftop addition, and alterations to its

original fenestration pattern (infilled and new windows/doors). These changes have impacted the building's overall integrity and its ability to convey its original design. The 1960 half of the building was designed by local architect and developer, Sheldon L. Pollack & Associates. Research did not indicate that the firm is considered a master architect or builder. While the original architect of the 1958 portion of the building is unknown, given its original modest design (as seen in historic newspaper images), it does not appear to have been representative of the work of a master. For these reasons, the building does not appear eligible under National and California Register Criteria C/3.

National and California Register Criteria D/4: has yielded or may likely yield information important in prehistory or history.

A comprehensive archaeological assessment was not included in the scope of this memo. However, since 10912 Washington Blvd. has previously been graded and possesses no known archaeological resources, the likelihood of its ability to yield information important in prehistory or history is minimal.

City of Culver City Landmark, Significant, or Recognized Structure

The building at 10912 Washington Blvd. does not meet the criteria for listing as a Culver City Cultural Resource at the "Landmark" or Significant" levels. However, it does appear to meet the criteria to be eligible at the "Recognized" level, as outlined below.

Threshold Criteria

A property must meet one of two Threshold Criteria to determine whether to proceed with an evaluation against the remaining Assessment Criteria.

1) the building is at least 50 years old and is accessible to or visible to the public; or

2) the property has "special importance to the City," for its use as the primary public space for gathering and communal activity in Culver City

Constructed in phases between 1958 and 1960, the building is over 50 years old and is visible to the public along Washington Boulevard. It thus meets Threshold Criterion 1.

Assessment Criteria

1) Quality of Architecture

    a. Does the structure represent the work of a city/state/nationally significant architect/designer/builder? (8 points)

        [0]

CHOOSE ONE OF THE FOLLOWING:

    b. Is the structure in question the best example of its kind in Culver City? (20 points)

        [0]

    c. Is the structure a good example but there are better? (10 points)

        [0]

    d. Does the structure retain some of the original construction/style/materials but there have been significant alterations? (5 points)

        [5]

    Subtotal, Architectural Significance: 5

10912 Washington Blvd. does not appear eligible under Assessment Criteria 1a-1c. As described in its evaluation under National/California Register Criteria, the original architect/designer for the 1958 portion of the building is unknown, though given its modest appearance, they were not likely significant in their field. It was constructed by West America Construction Company, which does not appear to have been a significant builder. Research did not indicate that Sheldon L. Pollack & Associates, the architect/builder of the 1960 building portion, is considered significant in its field, and thus the building does not represent the work of a significant architect/designer/builder. Completed in phases between 1958 and 1960, historic newspaper images indicate that the building originally reflected a modest, vernacular interpretation of a Mid-Century Modern postwar industrial office building, of which there are multiple better examples throughout the city. The building has undergone significant changes to its original

style/construction/materials, including replacement of original cladding with contemporary panelized concrete cladding and smooth concrete parge coat (mostly at the north/street-facing façade), replacement of most windows and doors, the addition of highly visible corrugated metal mechanical screens and rear rooftop addition, and alterations to its original fenestration pattern (infilled and new windows/doors). However, some of its original materials (concrete block and precast concrete walls, concrete brise-soleils, some industrial windows) remain. Thus, the building meets Threshold Criterion 1d. For these reasons, ARG has assigned the subject property 5 points under Assessment Criterion 1.

2) Historical/Cultural Significance

   a. Is the structure associated with a prominent person(s) of importance to the incorporation, growth, or development of Culver City (State or Nation)? (15 points)

      [0]

   b. Is the structure associated with an historical pattern or significant event related to incorporation, growth or development of Culver City (State or Nation)? (10 points)

      [0]

Subtotal, Historical/Cultural Significance: 0

The subject building does not appear eligible under Assessment Criteria 2a-2b. As stated in its evaluation under National/California Register Criteria, research did not find evidence of an association with any significant individuals related to the original/early owners Litton Industries, Motorola, and Hamilton/Avnet Electronics, or any of the subsequent companies that have utilized the building. Additionally, while the building is associated with post-World War II development patterns in Culver City, and specifically with the city's electronics technology industry, it is one of dozens of postwar industrial office buildings in Culver City and does not singularly convey this association. Lastly, the building has been heavily altered, as described above, which has compromised its ability to convey its original appearance and association with postwar development patterns in the city. For these reasons, ARG has assigned 10912 Washington Blvd. 0 points under Assessment Criterion 2.

3) Other

   a. Is the structure the oldest example of its type/style in Culver City? (5 points)

      [0]

   b. Is the structure accessible and/or visible to the public? (5 points)

      [5]

   c. Has the structure been well preserved? (5 points)

      [0]

   Subtotal, Other: 5

The subject property does not appear to meet Assessment Criteria 3a or 3c. Constructed in phases between 1958 and 1960, the property is one of several industrial office buildings developed after World War II and is not the earliest of its type. Furthermore, the building has undergone alterations to its original design, as described above, and thus it cannot be said that the building has been well preserved. However, because the building is visible to the public along Washington Boulevard, it meets Assessment Criterion 3b. For these reasons, ARG has assigned 10912 Washington Blvd. 5 points under Assessment Criterion 3.

TOTAL POINTS: 10

In summary, ARG has assigned the building at 10912 Washington Blvd. a total of 10 points. The total score of 10 indicates that the building is eligible for designation as a Culver City Cultural Resource at the "Recognized" level, a category for properties within the range of 5-20 points under Culver City Cultural Resource eligibility criteria. A "Recognized" structure is "designated as being of architectural, historical, or cultural interest," but is of lower ranking than Cultural Resources designated at the "Significant" or "Landmark" levels.[74] This designation is honorific only, and carries no protections or requirements for regulation.

[74] Culver City Municipal Code, Section 15.05.010, Definitions.

10950 Washington Blvd.

National Register and California Register

National and California Register Criteria A/1: associated with events that have made a significant contribution to the broad patterns of history.

Similar to 10912 Washington Blvd., the building at 10950 Washington Blvd. is associated with post-World War II development patterns in Culver City, and specifically with the city's burgeoning electronics technology industry that supplied the field of aviation during the period. From its construction in 1974 through 1997, the subject property was owned and occupied by Hamilton/Avnet Electronics, which was associated with electronics parts manufacturing that aided the electronic, aviation, and missile industries in the decades following World War II.

However, as one of dozens of postwar industrial office buildings in Culver City, and a relatively late example of the property type, the building does not appear singularly significant for this association. The electronics industry proliferated in Culver City in the years immediately following World War II. By the late 1960s, prior to the subject building's construction, the field was already well established in the area due to missile and aircraft industries that had become the principal conduit through which the modern electronics industry was ushered into the region.[75] Furthermore, Hamilton/Avnet Electronics, the only company associated with the building that may have made significant contributions to the electronics industry (though additional research is necessary to confirm), inhabited the building as its sixth location in the Los Angeles area, the first two of which are still extant today. As the company's sixth and final location on the West Coast, 10950 Washington Blvd. is not particularly representative of the company's contributions to the postwar electronics industry. For these reasons, the building does not appear eligible under National and California Register Criteria A/1.

National and California Register Criteria B/2: associated with the lives of persons significant in our past.

Since its completion in 1974, the building has been occupied by various tenants associated with a range of industries, including electronics manufacturing, television and video production, software engineering, and food retail. Research did not find evidence of an association with any significant individuals related to Hamilton/Avnet Electronics, or any of the subsequent companies

[75] Allen J. Scott and Mark H. Drayse, "The Electronics Industry in Southern California: Growth and Spatial Development from 1945 to 1989," *The Review of Regional Studies,* 20, no.2 (January 1991), 1.

that have utilized the building. As a result, 10950 Washington Blvd. does not appear eligible under Criteria B/2.

National and California Register Criteria C/3: embodies the distinctive characteristics of a type, period, or method of construction, or that represents the work of a master, or that possesses high artistic values, or that represents a significant and distinguishable entity whose components may lack individual distinction.

Constructed in 1974, the building represents a good, but rather modest example of a Brutalist industrial office building from the postwar era. It was built with typical materials and construction techniques of the period, including concrete and stone aggregate cladding and fixed anodized aluminum windows with dark tinted glass. Although the building embodies the typical characteristics of the Brutalist architectural style (interlocking and projecting volumes that break up its rectangular massing, unpainted exposed concrete, lack of ornamentation), it does not appear to possess high artistic values. Furthermore, the building has undergone alterations that have impacted its overall integrity and Brutalist design, including the replacement of the main (east) entrance doors and surrounding fixed glazing with new aluminum doors/windows in a different color and profile than the original fenestration; the relocation of its main entrance assembly, further recessed in its opening than the original entrance; and the addition of panelized metal and concrete cladding to the south of the main entry and on the rectilinear volume at the building's northeast corner. Lastly, no information was uncovered indicating that Jules Greenstein of Widom, Wein and Associates, the building's original architect, is considered a master of their profession. For these reasons, the building does not appear eligible under National and California Register Criteria C/3.

National and California Register Criteria D/4: has yielded or may likely yield information important in prehistory or history.

A comprehensive archaeological assessment was not included in the scope of this memo. However, since 10950 Washington Blvd. has previously been graded and possesses no known archaeological resources, the likelihood of its ability to yield information important in prehistory or history is minimal.

<u>City of Culver City Landmark, Significant, or Recognized Structure</u>

The building at 10950 Washington Blvd. does not meet the criteria for listing as a Culver City Cultural Resource at the "Landmark" or Significant" levels. However, it does appear to meet the criteria to be eligible at the "Recognized" level, as outlined below.

Threshold Criteria

A property must meet one of two Threshold Criteria to determine whether to proceed with an evaluation against the remaining Assessment Criteria.

3) the building is at least 50 years old and is accessible to or visible to the public; or

4) the property has "special importance to the City," for its use as the primary public space for gathering and communal activity in Culver City

Completed in 1974, the building is 50 years old and is visible to the public along Washington Boulevard. Thus, it meets Threshold Criterion 1.

Assessment Criteria

2) Quality of Architecture

   a. Does the structure represent the work of a city/state/nationally significant architect/designer/builder? (8 points)

      [0]

CHOOSE ONE OF THE FOLLOWING:

   b. Is the structure in question the best example of its kind in Culver City? (20 points)

      [0]

   c. Is the structure a good example but there are better? (10 points)

      [10]

   d. Does the structure retain some of the original construction/style/materials but there have been significant alterations? (5 points)

      [0]

Subtotal, Architectural Significance: 10

The subject building does not appear eligible under Assessment Criteria 1a-1b. As described in its evaluation under National/California Register Criteria, research did not indicate that Jules Greenstein of Widom, Wein and Associates, the building's original architect, is considered a significant architect. It was constructed by Kersey-Kinsey Company, which does not appear to have been a significant builder. Thus, the building does not represent the work of a significant architect/designer/builder. The building embodies the typical characteristics of Brutalist architecture applied to an industrial office building, including its interlocking and projecting volumes that break up its rectangular massing, unpainted exposed concrete, and lack of ornamentation. While there are better, more intact examples of the architectural idiom and property type in the area, the building retains enough of its original materials and design features to be considered a good example of a Brutalist-style office building. It thus meets Assessment Criterion 1c. For these reasons, ARG has assigned the subject building 10 points under Assessment Criterion 1.

2) Historical/Cultural Significance

   a. Is the structure associated with a prominent person(s) of importance to the incorporation, growth, or development of Culver City (State or Nation)? (15 points)

      [0]

   b. Is the structure associated with an historical pattern or significant event related to incorporation, growth or development of Culver City (State or Nation)? (10 points)

      [0]

Subtotal, Historical/Cultural Significance: 0

The subject building does not appear eligible under Assessment Criteria 2a-2b. As stated in its evaluation under National/California Register Criteria, research did not find evidence of an association with any significant individuals related to Hamilton/Avnet Electronics, the property's original owner/tenant, or any of the subsequent companies that have utilized the building. Additionally, while the building is associated with post-World War II development patterns in Culver City, and specifically with the city's electronics technology industry, it is one of dozens of postwar industrial office buildings in Culver City, and a relatively late example of the property type, built years after the electronics technology industry was already well established in the city.

Thus, the building does not singularly convey this association. For these reasons, ARG has assigned 10950 Washington Blvd. 0 points under Assessment Criterion 2.

3) Other

   a. Is the structure the oldest example of its type/style in Culver City? (5 points)

      [0]

   b. Is the structure accessible and/or visible to the public? (5 points)

      [5]

   c. Has the structure been well preserved? (5 points)

      [0]

   Subtotal, Other: 5

The subject building does not appear to meet Assessment Criteria 3a or 3c. Constructed in 1974, the building represents a relatively late example of an industrial office building in Culver City and is thus not the oldest of its type. Furthermore, the building has undergone alterations to its original Brutalist style, including the addition of incompatible metal and concrete panel cladding over originally exposed/unfinished concrete walls and the replacement of its main entrance doors and surrounding glazing with new, further recessed entrance doors/windows in a different color and profile. Thus, it cannot be said that the building has been well preserved. However, because the building is visible to the public along Washington Boulevard, it meets Assessment Criterion 3b. For these reasons, ARG has assigned 10950 Washington Blvd. 5 points under Assessment Criterion 3.

TOTAL POINTS: 15

In summary, ARG has assigned the building at 10950 Washington Boulevard a total of 15 points. The total score of 15 indicates that the building is eligible for designation as a Culver City Cultural Resource at the "Recognized" level, a category for properties within the range of 5-20 points under Culver City Cultural Resource eligibility criteria. A "Recognized" structure is "designated as being of architectural, historical, or cultural interest," but is of lower ranking than Cultural

Resources designated at the "Significant" or "Landmark" levels.[76] This designation is honorific only, and carries no protections or requirements for regulation.

Conclusion

In conclusion, based on preliminary research and analysis, it is ARG's professional opinion that the buildings at 10912 and 10950 Washington Blvd. do not appear to meet eligibility requirements for listing in the National Register, the California Register, or as City of Culver City Cultural Resources under the "Landmark" or "Significant" levels. They do appear to meet the criteria to be Culver City Cultural Resources under the "Recognized" level; however, this designation is honorific only and carries no protections or regulatory implications. Thus, the buildings do not appear to meet the definition of "historical resources" for the purposes of CEQA.

Jose Mendivil
City of Culver City Current Planning Division
9770 Culver Boulevard
Culver City, CA 90232

Subject: Archaeological Resources Assessment for the 10950 Washington Boulevard Project; City of Culver City, Los Angeles County, California.

Dear Mr. Mendivil:

This letter report presents the methods, results, and recommendations of an archaeological resources assessment conducted by Environmental Science Associates (ESA) for the 10950 Washington Boulevard Project (Project/Project Site). The City of Culver City (City) certified a programmatic Environmental Impact Report (Programmatic EIR) to evaluate the potential environmental impacts of approving the Culver City General Plan 2045 and Zoning Code Update Project in September 2024. The General Plan 2045 and Zoning Code Update Program EIR (State Clearinghouse No. 2022030144) (Programmatic EIR or Certified PEIR) evaluated the anticipated future development within the City through 2045, including the anticipated development on the Project Site. The City is the lead agency responsible for compliance with the California Environmental Quality Act (CEQA). Section 15168(c) of the CEQA Guidelines sets forth criteria to utilize a Program EIR for "later activities" within the scope of a Program EIR. This assessment has been prepared in compliance with CEQA and includes a cultural resources records search through the California Historical Resources Information System-South Central Coastal Information Center (CHRIS-SCCIC), a Sacred Lands File (SLF) search through the Native American Heritage Commission (NAHC), land use history research, and a geoarchaeological review. Since the Project Site is fully developed, an archaeological resources pedestrian survey was not conducted.

This report was prepared by ESA Cultural Resources Specialist/Archaeologist Fatima Clark, B.A. while ESA Principal Archaeologist, Kyle Garcia, M.A., RPA, provided senior review of this report. Mr. Garcia is a Registered Professional Archaeologist and meets the Secretary of the Interior's Professional Qualification Standards for archaeology and history. ESA GIS Analyst Chance Scott created the figures contained in this report. Resumes of key personnel are provided in **Appendix A**.

Project Location

The approximately 5.8-acre (250,932 gross sf) Project Site is located at 10950 Washington Boulevard within the Clarkdale neighborhood of the City's limits (**Figure 1**). The Project Site is located on Assessor Parcel Numbers (APN) 4208-024-001, 4028-024-002, and 4208-025-018 and within an unsectioned portion of Township 2 South, Range 15 West of the Beverly Hills, CA U.S. Geological Survey (USGS) 7.5-minute topographic quadrangle (**Figure 2**). Generally, the Project Site is located just beyond the southwest corner of the Washington Boulevard and Elenda Street intersection, with direct local access to the Project Site provided via Washington Boulevard (**Figure 3**).

Project Description

The Project Site is currently occupied by two commercial buildings that total approximately 160,438 square feet (sf) of commercial floor area. The eastern building (Building 1) is a one- and two-story building containing approximately 70,808 sf of floor area. The western building (Building 2) is a three-story building with rooftop parking, with a height of approximately 49 feet from grade. Building 2 contains approximately 89,630 sf floor area. The Project Site also includes two connected surface parking lots (the “North Lot” and “South Lot"). The sidewalks adjoining the Project Site to the north are landscaped with street trees and trees are scattered throughout the existing surface parking lots. The Project Site currently provides a combined total of 439 surface parking spaces.

The Project would demolish all existing buildings and parking facilities on the Project Site and construct a new 5-story (up to a height of 61-feet) mixed-use development over one level of subterranean parking. The Project would include two, 5-story buildings (Building A and Building B) up to 61 feet in height that would include a total of 508 multi-family dwelling units (including 79 Low Income units) and 14,087 sf commercial use. The Project would include a total of 715 vehicular parking spaces, with 606 spaces provided within one subterranean level and 109 spaces provided on the enclosed first level of the building.

The Project would require excavation to accommodate one level of subterranean parking, footings, and foundations. Earthwork would require a net export of approximately 110,000 cubic yards (cy) of soil. Construction staging would be entirely internal to the Project Site. The Project would excavate to a maximum depth of 13 feet below grade.

Regulatory Framework

Cultural resources fall within the jurisdiction of several levels of government. The framework for the identification and, in certain instances, protection of cultural resources is established at the federal level, while the identification, documentation, and protection of such resources are often undertaken by state and local governments. As described below, the principal State, and local laws governing and influencing the preservation of cultural resources of national, State, regional, and local significance include the following:

1. The California Environmental Quality Act
2. The California Register of Historical Resources
3. The California Health and Safety Code
4. The California Public Resources Code
5. City of Culver City General Plan

State

California Environmental Quality Act

CEQA is the principal statute governing environmental review of projects occurring in the state and is codified in Public Resources Code (PRC) Section 21000 et seq. CEQA requires lead agencies to determine if a proposed project would have a significant effect on the environment, including significant effects on historical or unique archaeological resources. Under CEQA Section 21084.1, a project that may cause a substantial adverse change in the significance of a historical resource is a project that may have a significant effect on the environment.

CEQA Guidelines Section 15064.5 recognizes that historical resources include: (1) resources listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources; (2) resources included in a local register of historical resources, as defined in PRC Section 5020.1(k) or identified as significant in a historical resource survey meeting the requirements of PRC Section 5024.1(g); and (3) any objects, buildings, structures, sites, areas, places, records, or manuscripts which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California by the lead agency, provided the lead agency's determination is supported by substantial evidence in light of the whole record.

If a lead agency determines that an archaeological site is a historical resource, the provisions of PRC Section 21084.1 and CEQA Guidelines Section 15064.5 apply. If an archaeological site does not meet the criteria for a historical resource contained in the CEQA Guidelines, then the site may be treated in accordance with the provisions of PRC Section 21083, if it meets the criteria of a unique archaeological resource. As defined in PRC Section 21083.2, a unique archaeological resource is an archaeological artifact, object, or site, about which it can be clearly demonstrated that without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

- Contains information needed to answer important scientific research questions and there is a demonstrable public interest in that information;
- Has a special and particular quality such as being the oldest of its type or the best available example of its type; or
- Is directly associated with a scientifically recognized important prehistoric or historic event or person.

If an archaeological site meets the criteria for a unique archaeological resource as defined in PRC Section 21083.2, then the site is to be treated in accordance with the provisions of PRC Section 21083.2, which state that if the lead agency determines that a project would have a significant effect on unique archaeological resources, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place.[1] If preservation in place is not feasible, mitigation measures shall be required. The CEQA Guidelines note

[1] California Public Resources Code Section 21083.1(a), http://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?lawCode=PRC&sectionNum=21083.2. Accessed February 9, 2021.

that if an archaeological resource is neither a unique archaeological nor a historical resource, the effects of the project on those resources shall not be considered a significant effect on the environment.[2]

A significant effect under CEQA would occur if a project results in a substantial adverse change in the significance of a historical resource as defined in CEQA Guidelines Section 15064.5(a). Substantial adverse change is defined as "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of a historical resource would be materially impaired".[3] According to CEQA Guidelines Section 15064.5(b)(2), the significance of a historical resource is materially impaired when a project demolishes or materially alters in an adverse manner those physical characteristics that:

A. Convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register; or

B. Account for its inclusion in a local register of historical resources pursuant to PRC Section 5020.1(k) or its identification in a historical resources survey meeting the requirements of PRC Section 5024.1(g) Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or

C. Convey its historical significance and that justify its eligibility for inclusion in the California Register as determined by a Lead Agency for purposes of CEQA.

In general, a project that complies with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings is considered to have impacts that are less than significant.[4]

California Register of Historical Resources

The California Register of Historical Resources (California Register) is "an authoritative listing and guide to be used by State and local agencies, private groups, and citizens in identifying the existing historical resources of the State and to indicate which resources deserve to be protected, to the extent prudent and feasible, from substantial adverse change."[5] The California Register was enacted in 1992, and its regulations became official on January 1, 1998. The California Register is administered by the California Office of Historic Preservation (OHP). The criteria for eligibility for the California Register are based upon National Register of Historic Places (National Register) criteria.[6] Certain resources are determined to be automatically included in the California Register, including California properties formally determined eligible for, or listed in, the National Register. To be eligible for the California Register, a prehistoric or historic-period property must be significant at the local, State, and/or federal level under one or more of the following four criteria:

---

2 State CEQA Statute and Guidelines, Section 15064.5(c)(4).

3 State CEQA Guidelines, Section 15064.5(b)(1).

4 State CEQA Guidelines, 15064.5(b)(3).

5 California Public Resources Code, Section 5024.1[a]. http://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?lawCode=PRC&sectionNum=5024.1. Accessed February 9, 2021.

6 California Public Resources Code, Section 5024.1[b] http://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?lawCode=PRC&sectionNum=5024.1. Accessed February 9, 2021.

a. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
b. Is associated with the lives of persons important in our past;
c. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
d. Has yielded, or may be likely to yield, information important in prehistory or history.

A resource eligible for the California Register must meet one of the criteria of significance described above, and retain enough of its historic character or appearance (integrity) to be recognizable as a historical resource and to convey the reason for its significance. It is possible that a historic resource may not retain sufficient integrity to meet the criteria for listing in the National Register, but it may still be eligible for listing in the California Register.

Additionally, the California Register consists of resources that are listed automatically and those that must be nominated through an application and public hearing process. The California Register automatically includes the following:

- California properties listed on the National Register and those formally determined eligible for the National Register;
- California Registered Historical Landmarks from No. 770 onward; and,
- Those California Points of Historical Interest that have been evaluated by the State Office of Historic Preservation (OHP) and have been recommended to the State Historical Resources Commission for inclusion on the California Register.

Other resources that may be nominated to the California Register include:

- Historical resources with a significance rating of Category 3 through 5 (those properties identified as eligible for listing in the National Register, the California Register, and/or a local jurisdiction register);
- Individual historical resources;
- Historic districts; and,
- Historical resources designated or listed as local landmarks, or designated under any local ordinance, such as an historic preservation overlay zone.

California Health and Safety Code

California Health and Safety Code Sections 7050.5, 7051, and 7054 address the illegality of interference with human burial remains (except as allowed under applicable PRC Sections), and the disposition of Native American burials in archaeological sites. These regulations protect such remains from disturbance, vandalism, or inadvertent destruction, and establish procedures to be implemented if Native American skeletal remains are discovered during construction of a project, including treatment of the remains prior to, during, and after evaluation, and reburial procedures.

California Public Resources Code (PRC)

California PRC Section 5097.98, as amended by Assembly Bill 2641, provides procedures in the event human remains of Native American origin are discovered during project implementation. PRC Section 5097.98 requires that no further disturbances occur in the immediate vicinity of the discovery, that the discovery is adequately protected according to generally accepted cultural and archaeological standards, and that further activities take into account the possibility of multiple burials. PRC Section 5097.98 further requires the Native American Heritage Commission (NAHC), upon notification by a County Coroner, designate and notify a Most Likely Descendant (MLD) regarding the discovery of Native American human remains. Once the MLD has been granted access to the site by the landowner and inspected the discovery, the MLD then has 48 hours to provide recommendations to the landowner for the treatment of the human remains and any associated grave goods. In the event that no descendant is identified, or the descendant fails to make a recommendation for disposition, or if the landowner rejects the recommendation of the descendant, the landowner may, with appropriate dignity, reinter the remains and burial items on the property in a location that will not be subject to further disturbance.

Local

City of Culver City General Plan

The City's General Plan 2045 has one goal (Goal C-1) for cultural resources (including archaeological resources), which indicates that "cultural resources are protected and enhanced through proactive measures" (City of Culver City, 2024:248). Measures C-1.15, C-1.16, and C-1.21 provided below are focused on the protection of archaeological resources.

- **C-1.15: Public knowledge promotion.** Promote public knowledge and understanding of cultural resources (including archaeological, tribal cultural resources, historic resources, and paleontological resources) present within the city.

- **C-1.16: Tribal consultation.** Continue to consult with Native American groups in accordance with Senate Bill 18 and Assembly Bill 52 to identify Tribal Cultural Resources.

- **C-1.21: Protect Archaeological, Paleontological, and Tribal Cultural Resources.** Promote programs and policies to protect known archaeological and paleontological sites and Tribal Cultural Resources.

The City's General Plan also includes the following implementation actions for the preservation of archaeological resources.

- **IA.C-8: Historic discretionary review.** Require that projects subject to discretionary review are screened to Cultural Affairs to determine if further evaluation by cultural affairs is warranted and, if so, require that projects undergo historic, archaeological, and paleontological assessments and are documented in technical studies by qualified experts to identify the potential for resources to be negatively affected during project implementation and to ensure steps are taken, where warranted, to protect resources.

- **IA.C-10: Standard conditions of development approval.** Continue to implement standard conditions of approval that require and specify the steps to be taken to avoid damage and promote preservation if unknown archaeological or paleontological resources, or Tribal Cultural Resource are uncovered during construction.

Prehistoric Setting

The chronology of Southern California is typically divided into three general time periods: the Early Holocene (9,600 cal B.C. to 5,600 cal B.C.), the Middle Holocene (5,600 cal B.C. to 1,650 cal B.C.), and the Late Holocene (1,650 cal B.C. to cal A.D. 1769). This chronology is manifested in the archaeological record by particular artifacts and burial practices that indicate specific technologies, economic systems, trade networks, and other aspects of culture.

While it is not certain when humans first came to California, their presence in Southern California by about 9,600 cal B.C. has been well documented. At Daisy Cave, on San Miguel Island, cultural remains have been radiocarbon dated to between 9,150 and 9,000 cal B.C. (Byrd and Raab, 2007). During the Early Holocene (9,600 cal B.C. to 5,600 cal B.C.), the climate of Southern California became warmer and more arid and the human populations, who were represented by small hunter gathers until this point and resided mainly in coastal or inland desert areas, began exploiting a wider range of plant and animal resources (Byrd and Raab, 2007).

During the Late Holocene (1,650 cal B.C. to cal A.D. 1769), many aspects of Millingstone culture persisted, but a number of socioeconomic changes occurred (Erlandson, 1994; Wallace 1955; Warren, 1968). The native populations of Southern California were becoming less mobile and populations began to gather in small sedentary villages with satellite resource-gathering camps. Increasing population size necessitated the intensified use of existing terrestrial and marine resources (Erlandson, 1994). Evidence indicates that the overexploitation of larger, high-ranked food resources may have led to a shift in subsistence, towards a focus on acquiring greater amounts of smaller resources, such as shellfish and small-seeded plants (Byrd and Raab, 2007). Between about A.D. 800 and A.D. 1350, there was an episode of sustained drought, known as the Medieval Climatic Anomaly (MCA) (Jones et al., 1999). While this climatic event did not appear to reduce the human population, it did lead to a change in subsistence strategies in order to deal with the substantial stress on resources.

Given the increasing sedentism and growing populations during the Late Holocene, territorial conscription and competition became acute. Primary settlements or village sites were typically established in areas with available freshwater, and where two or more ecological zones intersected (McCawley, 1996). This strategic placement of living space provided a degree of security in that when subsistence resources associated with one ecological zone failed, the resources of another could be exploited (McCawley, 1996). Villages typically claimed and carefully defended fixed territories that may have averaged 30-square miles in size encompassing a variety of ecological zones that could be exploited for subsistence resources (McCawley, 1996).

The Late Holocene marks a period in which specialization in labor emerged, trading networks became an increasingly important means by which both utilitarian and non-utilitarian materials were acquired, and travel

routes were extended. Trade during this period reached its zenith as asphaltum (tar), seashells, and steatite were traded from Catalina Island (*Pimu* or *Pimugna)* and coastal Southern California to the Great Basin. Major technological changes appeared as well, particularly with the advent of the bow and arrow sometime after cal A.D. 500, which largely replaced the use of the dart and atlatl (Byrd and Raab, 2007).

Ethnographic Setting

The Project Site is located in a region traditionally occupied by the Gabrielino. The term "Gabrielino" is a general term that refers to those Native Americans who were administered by the Spanish at the Mission San Gabriel Arcángel. Prior to European colonization, the Gabrielino occupied a diverse area that included: the watersheds of the Los Angeles, San Gabriel, and Santa Ana rivers; the Los Angeles basin; and the islands of San Clemente, San Nicolas, and Santa Catalina (Kroeber, 1925). Their neighbors included the Chumash and Tataviam to the north, the Juañeno to the south, and the Serrano and Cahuilla to the east. The Gabrielino language was part of the Takic branch of the Uto-Aztecan language family.

The Gabrielino Indians were hunter-gatherers and lived in permanent communities located near the presence of a stable food supply. Subsistence consisted of hunting, fishing, and gathering. Small terrestrial game was hunted with deadfalls, rabbit drives, and by burning undergrowth, while larger game such as deer were hunted using bows and arrows. Fish were taken by hook and line, nets, traps, spears, and poison (Bean and Smith, 1978). The primary plant resources were the acorn, gathered in the fall and processed in mortars and pestles, and various seeds that were harvested in late spring and summer and ground with manos and metates. The seeds included chia and other sages, various grasses, and islay or holly-leafed cherry. Community populations generally ranged from 50 to 100 inhabitants, although larger settlements may have existed. The Gabrielino are estimated to have had a population numbering around 5,000 in the pre-contact period (Kroeber, 1925).

The Late Prehistoric period, spanning from approximately 1,500 years B.P. to the mission era, is the period associated with the florescence of the Gabrielino (Wallace, 1955). Coming ashore near Malibu Lagoon or Mugu Lagoon in October of 1542, Juan Rodriguez Cabrillo was the first European to make contact with the Gabrielino Indians. The Gabrielino are reported to have been second only to their Chumash neighbors in terms of population size, regional influence, and degree of sedentism (Bean and Smith, 1978).

Maps produced by early explorers indicate that at least 26 Gabrielino villages were within proximity to known Los Angeles River courses, while an additional 18 villages were reasonably close to the river (Gumprecht, 2001). The closest named settlements to the Project Site are *Saa'anga* and *Waachnga.* Both of these settlements are depicted as located close to Ballona Creek (McCawley, 1996).

Historic Setting

Harry H. Culver (1880 -1946), the founder of Culver City, was born in Milford, Nebraska on January 22, 1880. The middle child of five, Culver was raised on a farm along with three brothers and a sister. His father, Jacob Hazel Culver, was a brigadier general in the National Guard and a strict disciplinarian. Culver followed in his

father's footsteps, enlisting in the military during the Spanish-American War. He studied at Doane College before spending three years at the University of Nebraska. In 1901, Culver traveled to the Philippines where he began working in the mercantile business, worked as a reporter for the Manila Times, and served as a special agent for the customs department. After more than three years in the Philippines, Culver returned to the United States, performing his customs duties in Detroit and Saint Louis. He resigned from the customs department in 1910 when he moved to California and began working for real estate giant I.N. Van Nuys. "As the story goes, after Van Nuys offered to make him a manager because of his exemplary work, Culver decided to venture out on his own. After intense study, Harry Culver pinpointed the area between Los Angeles and Abbot Kinney's resort of Venice for his city" (Cerra, 2013).

At the California Club in 1913, Harry Culver announced his plans to develop a city west of downtown Los Angeles. Culver saw an opportunity to capitalize on the excitement generated by Abbot Kinney's Venice of America development along the California coast south of Santa Monica. Between Venice and Los Angeles sat open land, originally part of Rancho La Ballona, and as the relationship between Los Angeles and Venice took shape, Culver saw a spot in between that was ideal for a new town site. "If you draw a line from the Story Building to the Ocean Front at Venice, at the halfway mark you will find three intersection electric lines—the logical center for what we propose to develop a town-site." Soon after Culver's speech, the city of Culver City was established. Culver promoted his new community by holding special events like "prettiest baby contests" and an annual marathon race. Newspaper advertisements exclaimed "All Roads Lead to Culver City!".

Culver City continued to grow and finally incorporated in 1917 (Cerra, 2013). The City grew outward from the downtown commercial area and adjacent film studios. This area saw commercial development along Culver Boulevard in the 1920s and 1930s, and spread to Washington Boulevard in the 1940s and 1950s, and was surrounded by residential neighborhoods. Downtown Culver City was centered on a main street (Washington Boulevard) anchored by a six-story hotel, Fire and Police Departments, a city hall, banks, restaurants, and stores. The early economics of Culver City were supported by movie studios. Industry came in the form of Western Stove in 1922, then the Helms Bakeries in 1930, and then the Hayden Industrial Tract was established in the 1940s. During the 1950s Washington Boulevard would be improved with a number of car dealerships. Over the years, more than forty annexations increased the size of the city from 1.2 square miles to about five square miles (Cerra, 2004).

At the heart of Screenland, the economic health of the City has always been strongly tied to the movie industry. Following the closure of MGM Studios, the City was looking for ways to spur economic development. To spur development and create a new flow of money, the City created the Redevelopment Agency (Sony Pictures, 2017). One of the first projects undertaken by the newly formed agency was the Fox Hills redevelopment. This development would open up more than 300 acres of land just southwest of the City to residential, commercial, and industrial growth.

Archival Research

SCCIC Records Search

ESA conducted a cultural resources records search (on January 8, 2025 at the CHRIS-SCCIC, housed at California State University, Fullerton) and included a review of all previously recorded cultural resources and previous studies within the Project Site and 0.50-mile radius.

Previous Cultural Resources Investigations

A total of 20 cultural resources studies have been conducted within the 0.50-mile radius of the Project Site. Of the 20 studies, none have previously covered the Project Site.

Previously Recorded Cultural Resources

A total of six cultural resources consisting of historic architectural buildings have been previously recorded within the 0.50-mile radius of the Project Site. No archaeological resources have been recorded within the Project Site or 0.50-mile radius. However, a total of five prehistoric archaeological resources are recorded outside of the 0.50-mile radius and adjacent to Ballona Creek (**Table 1**).

TABLE 1
PREVIOUSLY RECORDED CULTURAL RESOURCES WITHIN 0.50-MILES AND OUTSIDE THE RADIUS OF THE PROJECT SITE

P-Number (P-19-)	Permanent Trinomial (CA-LAN-)	Description	Status Code
53	53	Prehistoric archaeological site: village or campsite on the bank of La Ballona Creek. Among the artifacts found at the site consist of a double basin metate, a slab metate, metate fragments, a mortar fragment, a discoidal stone, shell fragments, manos, projectile points, and a stone disc	Not Evaluated
55	55	Prehistoric archaeological site: camp site located a few hundred feet east of Ballona Creek. Skeletal remains, a metate, shell fragments, and projectile points reported as found at the site	Not evaluated
56	56	Prehistoric archaeological site: camp site near Ballona Creek. A mano, scraper, and a thin smoothed oval pebble are among the items found at the site	Not evaluated
57	57	Prehistoric archaeological site: village or camp site on the south bank of La Ballona Creek. Shell fragments, projectile points, and large bowls were found at the site	Not evaluated

P-Number (P-19-)	Permanent Trinomial (CA-LAN-)	Description	Status Code
58	58	Prehistoric archaeological site: village or camp site on the north bank of La Ballona Creek. Mortars, complete and broken pestles, metates, manos, a blade, and cog stones were found at the site	Not evaluated
186736	-	Historic architectural resource: commercial building at 10875 Venice Blvd	Unknown
187723	-	Historic architectural resource: Triangle New York Motion Picture Studio, Metro Goldwyn Mayer Studio	Unknown
189760	-	Historic architectural resource: residence at 10966 Venice Blvd	6Z
189762	-	Historic architectural resource: single story duplex buildings at 3801-3803 Tilden Ave, 11030-11036 Venice Blvd	6Z
190952	-	Historic architectural resource: Morris K. Hamasaki Elementary School	6Z
192936	-	Historic architectural resource: motel building	6Z

Other Research

Additional archaeological resources (the report for which have not yet been archived at the CHRIS-SCCIC as it is still in progress) were identified in the general vicinity of the Project Site during ground disturbing activities in connection with a development project in Downtown Culver City (ESA, 2022). These include two isolated prehistoric metates that were recovered in the upper six feet of disturbed fill sediments in an area of the property that had been previously developed with a large warehouse building. Moreover, three isolated historic-period artifacts (glass bottle containers for soda and liquor) were recovered during construction of a development project in the general vicinity of the Project Site in the upper five feet of disturbed fill sediments (ESA, 2021). The report for this project has also yet to be submitted to the CHRIS-SCCIC. Both of these properties had a similar land use history as the Project Site.

Sacred Lands File Search

The NAHC maintains a confidential SLF which contains sites of traditional, cultural, or religious value to the Native American community. The NAHC was contacted by ESA on December 19, 2024 to request a search of the SLF. On January 9, 2025, the NAHC indicated that the results of the SLF search yielded negative results, but mentioned that the absence of specific site information does not mean absence of cultural resources in a project. The NAHC results letter is provided in **Appendix B** of this report.

Land Use History Research

Historic maps, Sanborn maps, and aerial photographs were examined to understand the land use history of the Project Site and vicinity and to contribute to an assessment of the Project Site's potential to retain buried archaeological resources. Available topographic maps include the 1894 Los Angeles 15-minute topographic quadrangle and the 1920 Santa Monica 15-minute topographic quadrangle (TopoView, 2024). Sanborn maps were available for the years 1924, 1929, 1949, 1950 (Los Angeles Public Library, 2024; Northgate Environmental Management, Inc., 2023).

The 1894, 1896, 1898, 1900, and 1902 historic topographic maps depict the Project Site as undeveloped and Ballona Creek is shown approximately 0.60 miles east of the Project Site. Nearby streets that are also depicted on these topographic maps include the existing Washington Boulevard and Overland Avenue (although their names are not labeled). However, the immediate vicinity of the Project Site appears as mostly undeveloped (**Figure 4**). Review of the 1920 topographic map still shows the Project Site as undeveloped, but by this time the Pacific Electric Route is observed as located south of the southern portion of the Project Site (**Figure 5**).

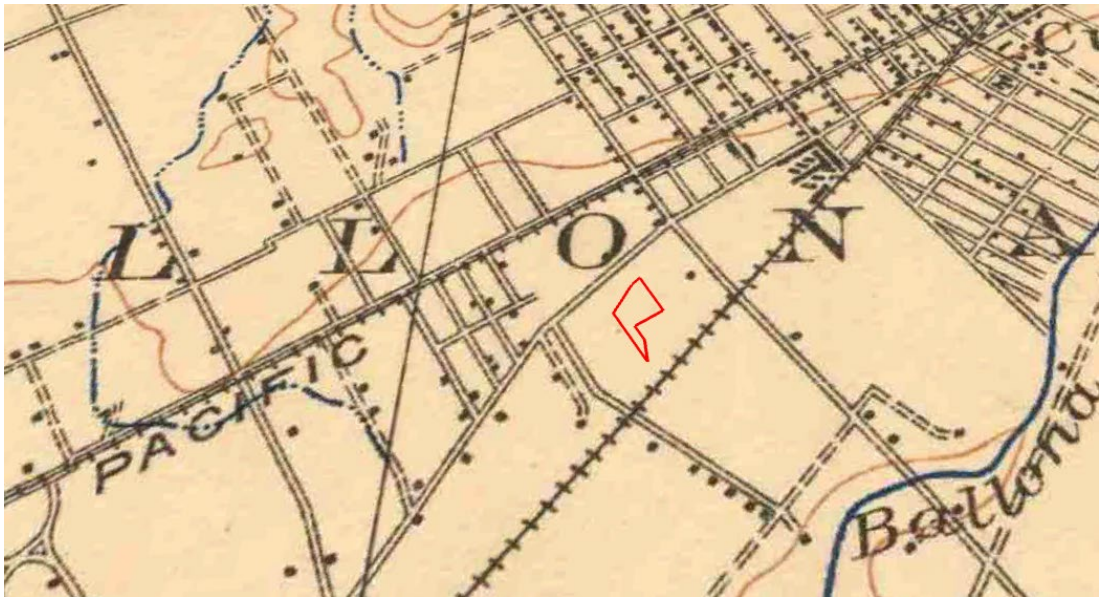
Overview of Project Site (in red) on the 1894 topographic map.



10950 Washington Boulevard Project / D202300392.00
SOURCE: TopoView, 2024

Figure 5
Overview of Project Site (in red) on the 1920 topographic map.

The 1924, 1929, and 1950 Sanborn maps cover approximately 85 percent of the Project Site. The Sanborn maps show no coverage for a portion of the easternmost and southernmost portions of the Project Site, which account for approximately 15 percent of the overall Project Site. The 1924 Sanborn map for instance shows that a commercial restaurant (labeled as "Plantation Road House"), dance hall and a transformer were present in the north central portion of the Project Site. The 1929 Sanborn map depicts a residential dwelling along the southern portion of the Project Site (**Figure 6**). The 1949 Sanborn map shows that the restaurant and dance hall had been expanded and renamed "Foreman Phillips Country Barn". An "Auto Trailer Camp" is shown as located north of the restaurant/dance hall. The 1950 Sanborn map shows that Foreman Phillips Country Barn" has been renamed "Aircraft Parts W. Ho" and includes an office, a warehouse, and a chemical storage area. A store is also depicted in the westernmost portion, along with the residential dwelling in the southern portion, as previously observed in the 1929 Sanborn map (**Figure 7**).

1950 Sanborn Map

Review of Phase I Environmental Site Assessment

Review of the Phase I Environmental Site Assessment for the Project indicates that the Project Site encompasses an office building, a parking garage, and a commercial building with sound stage. By 1964, the northern portion of the Project Site was developed with a large commercial structure and that surface parking occupied the central portion of the Project Site. The southwestern portion of the Project Site was vacant land. By 1977, a parking structure was built on the central portion and a paved parking lot in the southern portion. Since then, the Project Site has remained in its current configuration and contained the same uses (Northgate Environmental Management, Inc., 2023).

Subsurface Sensitivity Assessment

Prehistoric Archaeological Analysis

Review of the geotechnical report by Geotechnologies, Inc. (2023) indicates that a total of one boring and six test pits were excavated at the Project Site. The borings were drilled to a depth of 60 feet below grade, while the test pits were excavated to depths between 5 and 10 feet below grade. Fill materials (consisting of a mixture of clayey silt, sandy silt, and silty sand) were found to depths ranging between 1 and 3 feet below the existing grade. Native alluvial soils (consisting of interlayered mixtures of sand, silt and clay) were found beneath the fill. The alluvial soils are described as ranging "in color from medium brown, yellowish brown, and grayish brown, and are moist to wet, medium dense to very dense, or stiff to very stiff, and fine to coarse grained" (Geotechnologies, Inc., 2023:2).

The review of the geologic map covering the Project Site indicates that the surface of the Project Site is underlain by Holocene-aged younger Quaternary alluvium (mapped as Qa) composed of sand and silt-clay derived from the Santa Monica Mountains, as well as gravel and sand from stream channels (Dibblee and Ehrenspeck, 1991). These geologic deposits date back to the time period (11,700 years ago to present) – the period for which there is widely accepted evidence for human occupation of southern California (Byrd and Raab, 2007).

Researchers have indicated that the presence of prehistoric archaeological sites is positively correlated with proximity to water, as well as flat to gently sloped landforms, with proximity to water as the most important factor to consider when assessing archaeological site sensitivity (Meyer and Brandy, 2019; Meyer et al. ,2010). The Project Site is located approximately 0.60 miles west of Ballona Creek (former Los Angeles River), and as such, the area of the Project Site would have attracted prehistoric inhabitants for the exploitation of floral and faunal resources. Moreover, alluvial deposition often results in the burial and preservation of prehistoric archaeological materials. The results of the SCCIC records search indicate that a total of five prehistoric archaeological sites are recorded within the 0.50 to 1-mile radius of the Project Site, which confirms that prehistoric occupation has occurred in the vicinity of the Project Site. Moreover, the Native American villages of *Saa'anga* and *Waachnga* were formerly located in the vicinity of Ballona Creek, which demonstrates that prehistoric occupation has occurred in this region in an environmental setting similar to that of the Project Site's. Nevertheless, approximately 50 percent of the Project Site is developed with buildings and a parking structure, while the remaining 50 percent is developed with a surface parking lot. In cases where later development does disturb native sediments,

archaeological materials can become intermixed within historic fill such as in the case with the two prehistoric metates encountered during monitoring in connection with a development project in Downtown Culver City located in the vicinity of the Project Site in a similar geologic setting and underneath similar buildings. For these reasons stated above, there is a moderate to high potential for prehistoric archaeological materials to be encountered as a result of Project-related ground-disturbing activities.

Historical Archaeological Analysis

Development of the Project Site began in the 1920s with the construction of a commercial restaurant labeled as "Plantation Road House", a dance hall and a transformer within the northcentral portion. Sanborn maps from 1929, 1949, and 1950 show changes to the original restaurant and dance hall throughout the years but also exhibit a residential dwelling along the southern portion of the Project Site and a store along the western portion of the Project Site. By 1964, the Project Site had been redeveloped with a large commercial structure and surface parking. By 1977, a parking structure was built on the central portion of the Project Site. Currently, the eastern and southern portions of the Project Site are developed with surface parking lot. Parking lots have the potential to cap and preserve archaeological resources below the surface as excavations for parking lots are typically shallow and would therefore not disturb or displace deeper archaeological resources, and the asphalt pavement could have served as a barrier that could have prevented further impacts to any such resources. During construction activities for another project located near the Project Site, a total of three isolated historic-period artifacts (consisting of whole glass bottle containers) were identified within the upper five feet of disturbed fill sediments at a property that had a similar land use history as the Project Site. Given the identification of historic-period archaeological resources in the vicinity and the potential for past and current land uses to have capped and sealed archaeological resources, the potential to encounter historic-period archaeological resources, especially in the central portion of the Project Site, is considered moderate to high.

Summary of Results and Recommended Mitigation Measures

The archaeological sensitivity assessment has indicated that the potential for encountering prehistoric archaeological resources is moderate to high across the Project Site while the potential for historic-period archaeological resources, is also considered moderate to high. Therefore, impacts to previously unknown buried archaeological resources would be potentially significant, and the following mitigation measures are recommended to reduce impacts to archaeological resources to a less-than-significant level under CEQA:

- Mitigation Measure CUL-1: Prior to the issuance of a demolition permit, the Applicant shall retain an archaeologist who meets the Secretary of the Interior's Professional Qualifications Standards for Archaeology (Qualified Archaeologist) to oversee an archaeological monitor who shall be present during construction excavations such as demolition, clearing/grubbing, grading, trenching, or any other construction excavation activity associated with the Project. The frequency of monitoring shall be based on the rate of excavation and grading activities, proximity to known archaeological resources, the materials being excavated (younger alluvium vs. older alluvium), and the depth of excavation, and if found, the abundance and type of archaeological resources encountered, as determined by the Qualified Archaeologist). The frequency of monitoring shall be determined based on the factors presented above, and can be reduced to part-time

inspections or ceased entirely if determined appropriate by the Qualified Archaeologist. Prior to commencement of excavation activities, an Archaeological and Cultural Resources Sensitivity Training shall be given for construction personnel. The training session shall be carried out by the Qualified Archaeologist and shall focus on how to identify archaeological resources that may be encountered during earthmoving activities and the procedures to be followed in such an event.

- Mitigation Measure CUL-2: In the event that historic or prehistoric archaeological resources (e.g., bottles, foundations, refuse dumps, Native American artifacts or features, etc.) are unearthed, ground-disturbing activities shall be halted or diverted away from the vicinity of the find so that the find can be evaluated. An appropriate buffer area shall be established by the Qualified Archaeologist around the find where construction activities shall not be allowed to continue. Work shall be allowed to continue outside of the buffer area. All archaeological resources unearthed by project construction activities shall be evaluated by the Qualified Archaeologist and a Gabrielino Tribe. If the resources are Native American in origin, the Gabrielino Tribe shall consult with the City and Qualified Archaeologist regarding the treatment and curation of any prehistoric archaeological resources. If a resource is determined by the Qualified Archaeologist to constitute a "historical resource" pursuant to CEQA Guidelines Section 15064.5(a) or a "unique archaeological resource" pursuant to Public Resources Code Section 21083.2(g), the Qualified Archaeologist shall coordinate with the Applicant and the City to develop a formal treatment plan that would serve to reduce impacts to the resources. The treatment plan established for the resources shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and Public Resources Code Sections 21083.2(b) for unique archaeological resources. The treatment plan shall incorporate the Gabrielino Tribe's treatment and curation recommendations. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If preservation in place is not feasible, treatment may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. The treatment plan shall include measures regarding the curation of the recovered resources that may include curation at a public, non-profit institution with a research interest in the materials, such as the Natural History Museum of Los Angeles County or the Fowler Museum, if such an institution agrees to accept the material and/or the Gabrielino Tribe. If no institution or the Gabrielino Tribe accept the resources, they may be donated to a local school or historical society in the area (such as the Culver City Historical Society) for educational purposes.

- Mitigation Measure CUL-3: Prior to the release of the grading bond, the Qualified Archaeologist shall prepare a final report and appropriate California Department of Parks and Recreation Site Forms at the conclusion of archaeological monitoring. The report shall include a description of resources unearthed, if any, treatment of the resources, results of the artifact processing, analysis, and research, and evaluation of the resources with respect to the California Register of Historical Resources and CEQA. The report and the Site Forms shall be submitted by the Applicant to the City, the South Central Coastal Information Center, and representatives of other appropriate or concerned agencies to signify the satisfactory completion of the Project and required mitigation measures.

Society for California Archaeology

Pacific Coast Archaeological Society

Kyle Garcia has over 21 years of experience in the archaeology and prehistory of southern California, and meets and exceeds the Secretary of Interior Standards qualificaitons for a prehistoric and historic archaeolgoist. During his career, he has authored or contributed to more than 800 projects subject to the requirements of the California Environmental Quality Act, the National Environmental Policy Act (NEPA), and regulations implementing Section 106 of the National Historic Preservation Act (Section 106 of the NHPA). He is well-versed in the archaeological resources of California's coastal, interior, and island settings. He is skilled in evaluation historic and prehistoric archaeological resources; agency and Native American consultation; pedestrian surveys, testing and evaluation excavations as well as archaeological and paleontological construction monitoring, and laboratory processing. During his tenure, he has authored or contributed to more than 400 technical reports and sections to support all levels of CEQA and NEPA documents. Kyle's portfolio of projects includes energy, water, and transportation infrastructure as well as residential, commercial, mixed-use, institutional, and urban redevelopment serving public and private sector clients. Kyle has conducted archaeological work throughout California and is a certified archaeologist and paleontologist in Riverside, Santa Barbara, and Orange counties.

Relevant Experience

Archaeological/Paleontological Monitoring. Kyle has managed more than 120 archaeological and/or paleontological construction monitoring projects in Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. He has a commanding knowledge of the procedures to implement in the event of an inadvertent discovery during construction, and how to navigate an applicant or lead agency though that process to ensure compliance with the project's mitigation measures or conditions of approval and to reach consensus on treatment of the discovery, especially if the discovery is Native American in origin.

Paleontology. In addition to his archaeological work, Kyle has been cross-trained in paleontological mitigation monitoring and assisted in the excavations of a Miocene whale fossil near Irvine and a new species of extinct tuna in Laguna Niguel, California. Kyle has also managed or conducted more than 200 paleontological assessments and 40 paleontological monitoring projects throughout southern California. He has assisted ESA's paleontologists with the preparation of paleontological reports in compliance with CEQA and local paleontological guidelines, including guidelines for the Society for Vertebrate Paleontology.

Project Experience

Archaeological and Paleontological Monitoring for the LAX Crossfield Taxiway Improvements, Los Angeles, CA. *Project Manager/Archaeological Monitor.* Between 2009-2010, Kyle performed archaeological and paleontological monitoring services during

earthmoving operations associated with the development of the Crossfield Taxiway project in accordance with established mitigation measures from the LAX Crossfield Taxiway Project (CFTP) EIR. PCR conducted archaeological and paleontological field visits, paleontological sediment sampling, and monitoring of earthmoving operations associated with the construction of CFTP until activities requiring monitoring ended. These operations included excavations for filter boxes, water pipeline installation, and the realignment of World Way West. In addition to monitoring, Kyle performed an archaeology and paleontology training session for appropriate project personnel involved with construction of the project. The training session focused on how to identify archaeological and paleontological resources that may be encountered during earthmoving activities, and the procedures to be followed in such an event. No resources were identified during the monitoring effort and these findings were summarized in a report that was submitted to Los Angeles World Airports. Kyle served as project director/manager, crew chief, monitor, and co-author of the final report.

University High School Beautification Project, Los Angeles, CA. *Archaeologist*. Kyle performed archaeological monitoring during earth-moving activities on the campus. The archaeological monitoring program ensured the protection of the village site and springs, and resulted in the discovery of remains of the original portico of the Administration Building which was destroyed by the Long Beach Earthquake of 1933.

Rancho Campana High School and Performing Arts Center Construction Monitoring, Camarillo, CA. *Project Manager*. Kyle led the archaeological and paleontological monitoring for the project as a part of ESA's on-call contract with Oxnard Union High School. He managed and coordinated the effort and prepared the associated report. ESA identified two archaeological resources (56-001512/CA-VEN-1512 and 56-001513/CA-VEN-1513H) during monitoring efforts and several paleontological localities during the monitoring and sediment screening activities and worked together with the Ventureño Chumash regarding treatment for the archaeological resources. Although several archaeological and paleontological resources were encountered during the construction monitoring efforts, the resources were treated in accordance with the mitigation measures and, as a result, the impacts to the resources were reduced to a less than significant level pursuant to the CEQA.

Citron (Stella Park) Townhome Development, Escondido, CA: *Project Manager.* Kyle served as the project manager responsible for overseeing the archaeological and Native American monitoring at the project in accordance with the Conditions of Approval. The project included the construction of a 65-unit townhome development on a vacant 2.29-acre site in the City of Escondido.

Archaeological Monitoring, Test Excavations, and Data Recovery Excavations During Construction of the Crystal Geyser Roxane Cabin Bar Ranch Water Bottling Facility, Olancha, Inyo County, CA. *Principal Investigator/Project Director/Manager/Crew Chief.* Kyle managed/directed archaeological construction monitoring services in accordance with the Cultural Resources mitigation measures in the Mitigation Monitoring and Reporting Program (MMRP) of the EIR for the project. During initial clearing and grubbing activities associated with the project, five prehistoric archeological resources were encountered. Kyle assisted the Applicant in developing a cultural resources treatment plan to address identify, evaluate, and mitigate project impacts to these resources to a less than significant level. Pursuant to the MMRP, this treatment plan was developed in coordination with ESA (Kyle), the County, CG Roxane, and the Lone-Pine Pauite-Shoshone Reservation. The treatment plan included measures for resource avoidance, additional survey, and the excavation of nine controlled excavation units and multiple mechanical backhoe trenches across the project site. More than a 1,000 artifacts have been recovered from this project. This project began in 2015 and continues today.

Fatima Clark

Archaeologist

EDUCATION

BA, Anthropology, California State University, Fullerton

16 YEARS' EXPERIENCE

CERTIFICATIONS/ REGISTRATION

Orange County Certified Archaeologist

HAZWOPER Certified

PROFESSIONAL AFFILIATIONS

Society for California Archaeology

Fatima has 16 years of hands-on archaeological experience and is practiced in project management and client and agency coordination. Her field experience is complimented by the course study and participation in numerous archaeological excavations in California, Arizona, and Peru. Fatima has written California Environmental Quality Act (CEQA)-level technical reports, Environmental Impact Report (EIR) sections, Initial Study sections, archaeological peer reviews, archaeological monitoring reports, and reports pursuant to California Department of Transportation (Caltrans) requirements. She is also experienced in performing archaeological testing, site recordation, laboratory analysis, pedestrian surveys, records searches through several California Historical Resources Information Systems-Information Centers, and monitoring for a wide variety of projects, including mixed-use, residential, and energy, water, and road infrastructure projects. In addition to her archaeology background, Fatima has been cross-trained in conducting paleontological surveys and monitoring and has co-authored and managed associated reports.

Relevant Experience

Los Angeles Department of Water and Power, Fort Independence Travel Plaza Power Project, Independence (Owens Valley), CA. *Project Manager*. Fatima is in the process of preparing the cultural resources assessment in compliance with NEPA, Section 106, and CEQA. LADWP proposes to install 13 new temporary poles, one (1) anchor, and replace one (1) existing pole for a 34.5 kV line extension to provide power during construction of a new Travel Center at 141 N. Highway 395 in Fort Independence, Inyo County, California.

Landify ECT Corporation, Lower Sweetwater Park Project, City of Chula Vista, CA. *Project Manager*. Fatima has prepared a cultural resources assessment in compliance with CEQA. The Project proposes to redevelop the existing 21.3 acre Project Site with sports facilities within the City of Chula Vista.

County of Los Angeles, Department of Public Works, Whittier Boulevard Underground Utility Project, Los Angeles County, CA. *Project Co-Manager.* Fatima prepared the cultural resources assessment in support of a Class 2 Categorical Exemption. The project consists of the removal of utility poles and overhead lines, and the excavation for underground utility lines along Whittier Boulevard right-of-way. One historical resource, the early-to-mid 20th century Los Angeles Railway (or Yellow Cars), was identified in the project area as a result of archival research and geotechnical investigations. Fatima also managed the archaeological monitoring of construction activities and prepared the monitoring report.

City of Carson, Avocet Energy Storage System Project, City of Carson, CA. *Archaeologist.* Fatima managed the preparation of the archaeological and paleontological resources assessment reports in compliance with CEQA. The proposed Project includes the development of an approximately 200-megawatt battery energy storage system on a

6.96-acre site (BESS site), improvements and upgrades to the existing SCE Hinson Substation (SCE Hinson Substation site), the construction of a gen-tie line to connect to substation to the BESS site (proposed gen-tie line route), and other associated improvements. The proposed gen-tie route would cross three jurisdictions including: the City of Carson, the City of Los Angeles, and the City of Long Beach.

Storm Properties, Inc. Storm Hill Lane Project, Rolling Hills, CA. *Project Manager.* Fatima managed the day-to-day coordination for the monitoring and preparation of the archaeological/paleontological monitoring report pursuant to CEQA. As a result of the monitoring, several fossils were identified and these are currently being analyzed. The Project requires the reconstruction and expansion of Storm Hill Lane from the currently addressed and developed lot at 4 Storm Hill Lane to the three undeveloped lots.

Kiewit Infrastructure West Co., Ballona Wetlands Sequence 1 & 2 Restoration, Culver City, CA. *Project Manager.* Fatima managed the coordination for the monitoring with the archaeological and biological monitors, as well as coordination with the client. ESA's monitors were present during trenching and grading within portions of Ballona Creek in Culver City.

Southern California Association of Governments (SCAG) 2024 Connect SoCal Program PEIR, Los Angeles, Riverside, San Bernardino, Orange, Imperial and Ventura, CA. *Deputy Project Manager.* Fatima led the preparation of the PEIR Sections (cultural, paleontological, and tribal resources), as well as coordinated the Native American consultation efforts. Connect SoCal 2024 is a long-range comprehensive plan for the region's multi-modal transportation system. Preparing the Plan is one of SCAG's primary statutory responsibilities under federal and state law. A regional transportation plan (RTP) is the mechanism used in California by both metropolitan planning organizations and regional transportation planning agencies to conduct long-range (at least 20-year) planning in their regions. SCAG must adopt an RTP and update it every four years, or more frequently, if the region is to receive federal and state transportation dollars for public transit, streets/roads, and bicycle and pedestrian improvements.

Culver City, Crossings Campus (Culver City & City of Los Angeles, CA). *Deputy Project Manager.* Fatima led the preparation of the archaeological resources report and coordinated the preparation of the paleontological resources report. Fatima also led the preparation of the EIR sections (cultural, paleo, tribal). Culver Crossings Properties LLC, the Applicant, proposes to develop an office project (Project) on an approximately 4.46-acre site (Project Site) comprised of two properties: one 1.63-acre parcel is located in the City of Culver City (City), while the second 2.83-acre parcel is located in the City of Los Angeles.

County of San Diego Department of Parks and Recreation, Sweetwater Campground Geotech Boring Monitoring, San Diego County, CA. *Project Co- Manager.* Fatima co-managed the archaeological monitoring and coordinated with Red Tail for Native American monitoring and the County of San Diego Department of Parks and Recreation during Geotech borings for the Project.

Los Angeles County Department of Regional Planning, East San Gabriel Valley Area Plan (ESGVAP) Program EIR, Eastern Portion of Los Angeles County, CA. *Deputy Project Manager.* Fatima managed the preparation of the PEIR Sections (cultural, paleontological, and tribal resources). The ESGVAP is part of the Los Angeles County 2035 General Plan, which will require an amendment. The ESGVAP is a long-range policy document developed to guide long-term growth of the area through development of a guiding vision, goals, policies, and implementation actions for the unincorporated communities in the East San Gabriel Valley. The ESGVAP's planning area consists of 24 unincorporated islands and communities and encompasses a total land area of 210.5 square miles.

Fatima Clark (Continued)

Archaeologist

Los Angeles County Department of Regional Planning, Los Angeles County 2045 Climate Action Plan (CAP) Update and PEIR, Los Angeles County, CA. *Deputy Project Manager.* Fatima managed the preparation of the PEIR Sections (cultural, paleontological, and tribal resources). The County adopted the *Unincorporated Los Angeles County Community Climate Action Plan 2020* (2020 CCAP) in 2015 as a component of the Air Quality Element of the General Plan. The 2020 CCAP aligned with General Plan goals, policies, and programs, as well as several other existing programs in Los Angeles County. The 2020 CCAP was the first attempt to set greenhouse gas (GHG) emissions reduction goals in Los Angeles County. Although the targets for the 2020 CCAP were ultimately not fully met, the plan provided a road map for implementing the County's GHG reduction measures. The 2020 CCAP actions were implemented through County Code amendments and programs related to climate action. The Draft 2045 CAP builds on previous work and defines new reduction targets beyond the year 2020.

Eastern Municipal Water District, San Jacinto Valley Groundwater Treatment Facility Project, San Jacinto, CA. *Archaeologist.* Fatima assisted with the Phase II archaeological testing for the Project. The site was the location of the region's first trading post/general store, established ca. 1868. It later became the Palma Hotel, constructed by Henry T. Hewitt. The hotel was also used as a Riverside County hospital before it was destroyed in an earthquake in 1899.

San Manuel Band of Mission Indians, Sand Canyon Flood Control Permitting Project, San Bernardino County, CA. *Archaeologist.* Fatima was in charge of preparing the cultural resources assessment in compliance with Section 106. Fatima also conducted the pedestrian survey. The San Manuel Band of Mission Indians is considering taking over operation and maintenance of a concrete-lined channel and debris basin (known as Sand Creek) along Sand Canyon, within unincorporated San Bernardino County.

City of Long Beach, 615 E. Ocean Boulevard Project, Long Beach, CA. *Deputy Project Manager.* Fatima led the preparation of the cultural and paleontological resources reports in support of an addendum to the Certified City of Long Beach Downtown Plan Program Environmental Impact Report. The Project would develop a 21-story high-rise residential building on an approximately 0.4-acre site located at 615 East Ocean Boulevard within the City's limits (Project site).

City of Long Beach Department of Development Services, Planning Bureau, 7250 Carson Street Project, City of Long Beach, CA. *Deputy Project Manager.* Fatima led the preparation of the cultural and paleontological resources reports in compliance with CEQA. The Project Applicant proposes to subdivide a 20-acre parcel into two parcels (Parcel A and Parcel B). Other than the approval of the tentative parcel map to subdivide the existing parcel, no proposed improvements or development for Parcel A are included as part of the Project. Development of Parcel B (Project Site) would include the development of two fast-food restaurants and parking spaces.

City of Diamond Bar, Crooked Creek Residential Subdivision Project, Los Angeles County, CA. *Archaeologist.* Fatima conducted the archaeological and paleontological resources assessments in compliance with CEQA and the City of Diamond Bar General Plan Policy RC-P-42. The studies included records searches, pedestrian survey, and subsurface sensitivity assessments. No cultural resources were identified in the project site, but the area was found to have the potential to contain subsurface prehistoric archaeological resources and paleontological resources. The project consisted of the development of seven single-family residences and associated infrastructure on approximately 2.5 acres. The project required approval of a Vesting Tentative Tract Map, Conditional Use Permit, Tree Permit, and Development Review.

Re: 10950 Washington Blvd Mixed-Use Project, Los Angeles County

To Whom It May Concern:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

Subject: Environmental Impact Report, Soils and Geology Issues
Proposed Mixed-Use Development
10950 Washington Boulevard, Culver City, California

Dear Mr. Pearson:

1.0 INTRODUCTION

This document is intended to discuss potential soil and geological issues for the proposed development, as required by Appendix G of the California Environmental Quality Act (CEQA) Guidelines. This report included seven exploratory excavations, information from previous geotechnical investigations performed at the site, collection of representative samples, laboratory testing, engineering analysis, review of published geologic data, review of available geotechnical engineering information and the preparation of this report.

2.0 SITE CONDITIONS

The Project Site is located at 10950 Washington Boulevard in Culver City, California. The Project Site is roughly 5.8 acres in area, bounded by Washington Boulevard to the northwest, commercial and residential developments to the northeast, residential developments to the southeast, and a mosque and residential developments to the southwest. The Project Site is shown relative to nearby topographic features in the enclosed Vicinity Map.

The Project Site grade descends gently to the south. Based on review of the elevation contours presented in the NavigateLA Website, developed by the City of Los Angeles Bureau of Engineering, the site grade ranges from approximate elevation 66 feet Above Mean Sea Level (AMSL) near the northern portion of the site, to approximate elevation 52 feet at the southern portion of the site.

The Project Site is currently developed with a one- and two-story commercial building, a three-story commercial building, and surface parking lots. Vegetation at the Project Site is minimal, and consists of mature trees and bushes, contained in planter areas. Drainage across the site appears to be by sheetflow to the south.

3.0 PROJECT SCOPE

Preliminary information concerning the proposed development was provided by the client. In addition, the preliminary architectural plans prepared by KFA, dated January 15, 2025, were reviewed for the preparation of this report. The proposed mixed-use development will consist of two 5-story buildings over one common subterranean parking level. It is anticipated that the finished floor of the subterranean parking level will extend to an approximate depth of 11 feet below the proposed ground floor level.

The proposed development will be designed in accordance with the applicable California Building Code.

4.0 FIELD EXPLORATION

This firm has conducted previous explorations at the Project Site, pertaining to previously proposed projects. The explorations were conducted on October 20, 2012, and May 20, 2017, and consisted of excavating one boring and six test pits. The boring was drilled to a depth of 60 feet below grade with the aid of a truck-mounted drilling machine using 8-inch diameter hollowstem augers. The test pits were excavated to depths ranging between 5 and 10 feet below grade with the aid of a 4-inch diameter hand auger. The exploration locations are shown on the Plot Plan and the geologic materials encountered are logged on Plates A-1 through A-7.

The location of exploratory excavations was determined from hardscaped features shown in the enclosed Plot Plan. Elevations of the exploratory excavations were determined from elevation contours presented in the NavigateLA Website. The location and elevation of the exploratory excavations should be considered accurate only to the degree implied by the method used.

5.0 SUBSURFACE CONDITIONS

5.1 Geologic Materials

Fill materials were encountered in the exploratory excavations to depths ranging between 1 and 3 feet below the existing grade. Fill materials observed in the excavations consist of a mixture of clayey silt, sandy silt, and silty sand. The fill ranges from medium brown to reddish brown in color, and is slightly moist to moist, stiff, or medium dense, and fine to coarse grained.

The fill is in turn underlain by native alluvial soils consisting of interlayered mixtures of sand, silt and clay. The alluvial soils range in color from medium brown, yellowish brown, and grayish brown, and are moist to wet, medium dense to very dense, or stiff to very stiff, and fine to coarse grained. More detailed descriptions of the earth materials encountered may be obtained from individual logs of the subsurface excavations.

The geologic materials consist of detrital sediments deposited by river and stream action typical to this area of Los Angeles County. More detailed descriptions of the earth materials encountered may be obtained from individual logs of the subsurface excavations.

5.2 Groundwater

Groundwater was encountered in Boring B1, at an approximate depth of 27 feet below the ground surface. Based on the elevation contours presented in the NavigateLA Website, the observed groundwater elevation corresponds to approximate elevation 26.5 feet AMSL.

The historically highest groundwater level was established by review of California Geological Survey Seismic Hazard Evaluation Report 023 Plate 1.2 entitled "Historically Highest Ground Water Contours". Review of this plate indicates that the historically highest groundwater level is on the order of 20 feet below grade. A copy of this map is included in the appendix as Historically Highest Groundwater Levels.

Fluctuations in the level of groundwater may occur due to variations in rainfall, temperature, and other factors not evident at the time of the measurements reported herein. Fluctuations also may occur across the site.

6.0 REGIONAL GEOLOGIC SETTINGS AND FAULTING

6.1 Regional Geologic Settings

The Project Site is located in the Los Angeles Basin and within the Peninsular Ranges Geomorphic Province. The Peninsular Ranges are characterized by northwest-trending blocks of mountain ridges and sediment-floored valleys. The dominant geologic structural features are northwest trending fault zones that either die out to the northwest or terminate at east-west trending reverse faults that form the southern margin of the Transverse Ranges (Yerkes, 1965).

The Los Angeles Basin is located at the northern end of the Peninsular Ranges Geomorphic Province. The basin is bounded by the east and southeast by the Santa Ana Mountains and San Joaquin Hills. It is bounded to the northwest by the Santa Monica Mountains. Over 22 million years ago the Los Angeles basin was a deep marine basin formed by tectonic forces between the North American and Pacific plates. Since that time, over 5 miles of marine and non-marine sedimentary rock as well as intrusive and extrusive igneous rocks have filled the basin. During the last 2 million years, defined by the Pleistocene and Holocene epochs, the Los Angeles basin and surrounding mountain ranges have been uplifted to form the present-day landscape. Erosion of the surrounding mountains has resulted in deposition of unconsolidated sediments in low-lying areas by rivers such as the Los Angeles River. Areas that have experienced subtle uplift have been eroded with gullies.

6.2 Regional Faulting

The enclosed "Regional Fault Location Map" shows the location of faults mapped in the greater Los Angeles area. Buried thrust faults are faults without a surface expression but are a significant source of seismic activity. They are typically broadly defined based on the analysis of seismic wave recordings of hundreds of small and large earthquakes in the southern California area. Due to the buried nature of these thrust faults, their existence is usually not known until they produce an earthquake. The risk for surface rupture potential of these buried thrust faults is inferred to be negligible (Leighton, 1990). However, the seismic risk of these buried structures in terms of recurrence and maximum potential magnitude is not well established.

Two major buried thrust fault structures in the Los Angeles area are the Elysian Park fold and thrust belt and the Torrance-Wilmington fold and thrust belt. It is postulated that the Elysian Park structure was responsible for the magnitude 5.9, October 1, 1987, Whittier Narrows earthquake, and that the Torrance-Wilmington structure was responsible for the magnitude 5.0, January 19, 1989, Malibu earthquake. The magnitude 6.7, January 17, 1994, Northridge earthquake was caused by a buried thrust fault located beneath the San Fernando Valley.

7.0 SOIL AND GEOLOGY ISSUES

a) Fault Activity

Based on criteria established by the California Division of Mines and Geology (CDMG) now called California Geologic Survey (CGS), faults may be categorized as Holocene-active, Pre-Holocene faults, and Age-undetermined faults. Holocene-active faults are those which show evidence of surface displacement within the last 11,700 years. Pre-Holocene faults are those that have not moved in the past 11,700 years. Age-undetermined faults are faults where the recency of fault movement has not been determined. Faults showing no evidence of surface displacement within the last 1.6 million years are considered inactive for most purposes, with the exception of design of some critical structures.

Buried thrust faults are faults without a surface expression but are a significant source of seismic activity. They are typically broadly defined based on the analysis of seismic wave recordings of hundreds of small and large earthquakes in the Southern California area. Due to the buried nature of these thrust faults, their existence is usually not known until they produce an earthquake. The risk for surface rupture potential of these buried thrust faults is inferred to be low (Leighton, 1990). However, the seismic risk of these buried structures in terms of recurrence and maximum potential magnitude is not well established. Therefore, the potential for surface rupture on these surface-verging splays at magnitudes higher than 6.0 cannot be precluded.

The enclosed "Regional Fault Location Map" shows the location of faults mapped in the greater Los Angeles area. A list of faults located within 60 miles (100 kilometers) from the Project Site has been provided in the enclosed table titled: Seismic Source Summary Table.

This table is based on information provided by the USGS in their 2008 National Seismic Hazard Maps – Source Parameters database. The distances provided in this table are measured from a point selected near the center of the site. The following sections describe some of the regional Holocene-Active faults, Pre-Holocene faults, and blind thrust faults.

i) Holocene-Active Faults

Newport-Inglewood Fault System

The Newport-Inglewood Fault System is located 1.86 miles to the east of the Project Site. The Newport-Inglewood Fault System is a broad zone of discontinuous north to northwestern en echelon faults and northwest to west trending folds. The fault zone extends southeastward from West Los Angeles, across the Los Angeles Basin, to Newport Beach and possibly offshore beyond San Diego (Barrows, 1974; Weber, 1982; Ziony, 1985).

The onshore segment of the Newport-Inglewood Fault System extends for about 37 miles from the Santa Ana River to the Santa Monica Mountains. Here it is overridden by, or merges with, the east-west trending Santa Monica zone of reverse faults.

The surface expression of the Newport-Inglewood Fault System is made up of a strikingly linear alignment of domal hills and mesas that rise on the order of 400 feet above the surrounding plains. From the northern end to its southernmost onshore expression, the Newport-Inglewood Fault System is made up of: Cheviot Hills, Baldwin Hills, Rosecrans Hills, Dominguez Hills, Signal Hill-Reservoir Hill, Alamitos Heights, Landing Hill, Bolsa Chica Mesa, Huntington Beach Mesa, and Newport Mesa. Several single and multiple fault strands, arranged in a roughly left stepping en echelon arrangement, make up the fault zone and account for the uplifted mesas.

The most significant earthquake associated with the Newport-Inglewood Fault System was the Long Beach earthquake of 1933 with a magnitude of 6.3 on the Richter scale. It is believed that the Newport-Inglewood Fault System is capable of producing a 7.5 magnitude earthquake.

Santa Monica Fault

The Santa Monica Fault, located approximately 2.96 miles to the north of the Project Site, is a part of the Transverse Ranges Southern Boundary Fault System. The Santa Monica Fault extends east from the coastline in Pacific Palisades through Santa Monica and West Los Angeles and merges with the Hollywood Fault at the West Beverly Hills Lineament in Beverly Hills where its strike is northeast. It is believed that at least six surface ruptures have occurred in the past 50 thousand

years. In addition, a well-documented surface rupture occurred between 10 and 17 thousand years ago, although a more recent earthquake probably occurred 1 to 3 thousand years ago. This leads to an average earthquake recurrence interval of 7 to 8 thousand years.[a] It is thought that the Santa Monica Fault may produce earthquakes with a maximum magnitude of 7.4.

In 2018, the California Geological Survey established an Earthquake Fault Zone for the Santa Monica Fault. A copy of this map may be found in the Appendix.

Hollywood Fault

The Hollywood Fault is part of the Transverse Ranges Southern Boundary fault system. The Hollywood Fault is located approximately 4.96 miles north of the Project Site. This fault trends east-west along the base of the Santa Monica Mountains from the West Beverly Hills Lineament in the West Hollywood–Beverly Hills area to the Los Feliz area of Los Angeles. The Hollywood Fault is the eastern segment of the reverse oblique Santa Monica–Hollywood Fault. Based on geomorphic evidence, stratigraphic correlation between exploratory borings, and fault trenching studies, this fault is classified as active.

Until recently, the approximately 9.3-mile-long Hollywood Fault was considered to be expressed as a series of linear ground-surface geomorphic expressions and south-facing ridges along the south margin of the eastern Santa Monica Mountains and the Hollywood Hills. Multiple recent fault rupture hazard investigations have shown that the Hollywood Fault is located south of the ridges and bedrock outcroppings along portions of Sunset Boulevard. The Hollywood Fault has not produced any damaging earthquakes during the historical period and has had relatively minor micro-seismic activity. It is estimated that the Hollywood Fault is capable of producing a maximum 6.7 magnitude earthquake. In 2014, the CGS established an Earthquake Fault Zone for the Hollywood Fault.

Malibu Coast Fault

The Malibu Coast Fault is part of the Transverse Ranges Southern Boundary fault system, a west-trending system of reverse, oblique-slip, and strike-slip faults that extends for more than approximately 124 miles along the southern edge of the Transverse Ranges and includes the Hollywood, Raymond, Anacapa–Dume, Malibu Coast, Santa Cruz Island, and Santa Rosa Island Faults.

[a] *Southern California Earthquake Center, a National Science Foundation and U.S. Geological Survey Center. Active Faults in the Los Angeles Metropolitan Region, www.scec.org/research/special/SCEC001activefaultsLA.pdf; accessed August 2023.*

The Malibu Coast Fault System runs in an east-west orientation onshore subparallel to and along the shoreline for a linear distance of about 17 miles through the Malibu City limits, but also extends offshore to the east and west for a total length of approximately 37.5 miles. The onshore Malibu Coast Fault System involves a broad, wide zone of faulting and shearing as much as 1 mile in width. While the Malibu Coast Fault System has not been officially designated as an active fault zone by the State of California and no Special Studies Zones have been delineated along any part of the fault zone under the Alquist-Priolo Act of 1972, evidence for Holocene activity (movement in the last 11,000 years) has been established in several locations along individual fault splays within the fault system. Due to such evidence, several fault splays within the onshore portion of the fault system are identified as active.[b]

Large historic earthquakes along the Malibu Coast Fault include the 1979, 5.2 magnitude earthquake and the 1989, 5.0 magnitude earthquake.[c] The Malibu Coast Fault System is approximately 6.80 miles northwest of the Project Site and is believed to be capable of producing a maximum 7.0 magnitude earthquake.

Palos Verdes Fault

Studies indicate that there are several active on-shore extensions of the strike-slip Palos Verdes Fault, which is located approximately 8.58 miles southwest of the Project Site. Geophysical data also indicate the offshore extensions of the fault are active, offsetting Holocene age deposits. No historic large magnitude earthquakes are associated with this fault. However, the fault is considered active by the California Geological Survey. It is estimated that the Palos Verdes Fault is capable of producing a maximum 7.7 magnitude earthquake.

Raymond Fault

The Raymond Fault is located approximately 13.03 miles to the northeast of the Project Site. The Raymond Fault is an effective groundwater barrier which divides the San Gabriel Valley into groundwater sub-basins. Much of the geomorphic evidence for the Raymond Fault has been obliterated by urbanization of the San Gabriel Valley. However, a discontinuous escarpment can be traced from Monrovia to the Arroyo Seco in South Pasadena. The very bold, “knife edge” escarpment in Monrovia parallel to Scenic Drive is believed to be a fault scarp of the Raymond Fault. Trenching of the Raymond Fault is reported to have revealed Holocene movement (Weaver and Dolan, 1997).

[b] *City of Malibu Planning Department, Malibu General Plan, Chapter 5.0, Safety and Health Element, http://qcode.us/codes/malibu-general-plan/; accessed August 2023.*
[c] *California Institute of Technology, Southern California Data Center. Chronological Earthquake Index, www.data.scec.org/significant/malibu1979.html; accessed August 2023.*

The recurrence interval for the Raymond Fault is probably slightly less than 3,000 years, with the most recent documented event occurring approximately 1,600 years ago (Crook, et al, 1978). However, historical accounts of an earthquake that occurred in July 1855 as reported by Toppozada and others, 1981, places the epicenter of a Richter Magnitude 6 earthquake within the Raymond Fault. It is believed that the Raymond Fault is capable of producing a 6.8 magnitude earthquake. The Raymond Fault is considered active by the California Geological Survey.

Verdugo Fault

The Verdugo Fault is located approximately 14.14 miles to the northeast of the Project Site. The Verdugo Fault runs along the southwest edge of the Verdugo Mountains. The fault displays a reverse motion. According to Weber, et. al., (1980) 2 to 3 meters high scarps were identified in alluvial fan deposits in the Burbank and Glendale areas. Further to the northeast, in Sun Valley, a fault was reportedly identified at a depth of 40 feet in a sand and gravel pit. Although considered active by the County of Los Angeles, Department of Public Works (Leighton, 1990), and the United States Geological Survey, the fault is not designated with an Earthquake Fault Zone by the California Geological Survey. It is estimated that the Verdugo Fault is capable of producing a maximum 6.9 magnitude earthquake.

Sierra Madre Fault System

The Sierra Madre Fault alone forms the southern tectonic boundary of the San Gabriel Mountains in the northern San Fernando Valley. It consists of a system of faults approximately 75 miles in length. The individual segments of the Sierra Madre Fault system range up to 16 miles in length and display a reverse sense of displacement and dip to the north. The most recently active portions of the zone include the Mission Hills, Sylmar and Lakeview segments, which produced an earthquake in 1971 of magnitude 6.4. Tectonic rupture along the Lakeview Segment during the San Fernando Earthquake of 1971 produced displacements of approximately 2½ to 4 feet upward and southwestward.

It is believed that the Sierra Madre Fault System is capable of producing an earthquake of magnitude 7.3. The closest trace of the fault is located approximately 18.37 miles northeast of the Project Site.

Whittier-Elsinore Fault System

The Whittier Fault is located approximately 20.71 miles to the southeast of the Project Site. The Whittier Fault together with the Chino Fault comprises the northernmost extension of the northwest trending Elsinore fault system. The mapped surface of the Whittier Fault extends in a west-northwest direction for a

distance of 20 miles from the Santa Ana River to the terminus of the Puente Hills. The Whittier Fault is essentially a strike-slip, northeast dipping fault zone which also exhibits evidence of reverse movement along with en echelon[d] fault segments, en echelon folds and anatomizing (braided) fault segments. Right lateral offsets of stream drainages of up to 8800 feet (Durham and Yerkes, 1964) and vertical separation of the basement complex of 6,000 to 12,000 feet (Yerkes, 1972), have been documented. It is believed that the Whittier fault is capable of producing a 7.8 magnitude earthquake.

The Whittier Narrows earthquakes of October 1, 1987, and October 4, 1987, occurred in the area between the westernmost terminus of the mapped trace of the Whittier Fault and the frontal fault system. The main 5.9 magnitude shock of October 1, 1987, was not caused by slip on the Whittier Fault. The quake ruptured a gently dipping thrust fault with an east-west strike (Haukson, Jones, Davis and others, 1988). In contrast, the earthquake of October 4, 1987, is assumed to have occurred on the Whittier Fault as focal mechanisms show mostly strike-slip movement with a small reverse component on a steeply dipping northwest striking plane (Haukson, Jones, Davis and others, 1988).

Santa Susana Fault

The Santa Susana Fault extends approximately 17 miles west-northwest from the northwest edge of the San Fernando Valley into Ventura County and is at the surface high on the south flank of the Santa Susana Mountains. The fault ends near the point where it overrides the south-side-up South strand of the Oak Ridge fault. The Santa Susana Fault strikes northeast at the Fernando lateral ramp and turns east at the northern margin of the Sylmar Basin to become the Sierra Madre Fault. This fault is exposed near the base of the San Gabriel Mountains for approximately 46 miles from the San Fernando Pass at the Fernando lateral ramp east to its intersection with the San Antonio Canyon fault in the eastern San Gabriel Mountains, east of which the range front is formed by the Cucamonga Fault. The Santa Susana Fault has not experienced any recent major ruptures except for a slight rupture during the 6.5 magnitude 1971 Sylmar earthquake.[e] The Santa Susana Fault is considered to be active by the County of Los Angeles. It is believed that the Santa Susana Fault has the potential to produce a 6.9 magnitude earthquake. The closest trace of the fault is located approximately 21.25 miles northwest of the Project Site.

[d] *En echelon refers to closely spaced, parallel or subparallel, overlapping or step-like minor structural features.*
[e] *California Institute of Technology, Southern California Data Center. Chronological Earthquake Index, www.data.scec.org/significant/santasusana.html; accessed August 2023.*

San Gabriel Fault System

The San Gabriel Fault System is located approximately 22.31 miles northeast of the Project Site. The San Gabriel Fault system comprises a series of subparallel, steeply north-dipping faults trending approximately north 40 degrees west with a right-lateral sense of displacement. There is also a small component of vertical dip-slip separation. The fault system exhibits a strong topographic expression and extends approximately 90 miles from San Antonio Canyon on the southeast to Frazier Mountain on the northwest. The estimated right lateral displacement on the fault varies from 34 miles (Crowell, 1982) to 40 miles (Ehlig, 1986), to 10 miles (Weber, 1982). Most scholars accept the larger displacement values and place the majority of activity between the Late Miocene and Late Pliocene Epochs of the Tertiary Era (65 to 1.8 million years before present).

Portions of the San Gabriel Fault System are considered active by California Geological Survey. Recent seismic exploration in the Valencia area (Cotton and others, 1983; Cotton, 1985) has established Holocene offset. Radiocarbon data acquired by Cotton (1985) indicate that faulting in the Valencia area occurred between 3,500 and 1,500 years before present.

It is hypothesized by Ehlig (1986) and Stitt (1986) that the Holocene offset on the San Gabriel Fault System is due to sympathetic (passive) movement as a result of north-south compression of the upper Santa Susana thrust sheet. Seismic evidence indicates that the San Gabriel Fault System is truncated at depth by the younger, north-dipping Santa Susana-Sierra Madre Faults (Oakeshott, 1975; Namson and Davis, 1988).

San Andreas Fault System

The San Andreas Fault system forms a major plate tectonic boundary along the western portion of North America. The system is predominantly a series of northwest trending faults characterized by a predominant right lateral sense of movement. At its closest point the San Andreas Fault system is located approximately 40.82 miles to the northeast of the Project Site.

The San Andreas and associated faults have had a long history of inferred and historic earthquakes. Cumulative displacement along the system exceeds 150 miles in the past 25 million years (Jahns, 1973). Large historic earthquakes have occurred at Fort Tejon in 1857, at Point Reyes in 1906, and at Loma Prieta in 1989. Based on single-event rupture length, the maximum Richter magnitude earthquake is expected to be approximately 8.25 (Allen, 1968). The recurrence interval for large earthquakes on the southern portion of the fault system is on the order of 100 to 200 years.

ii) Pre-Holocene Faults

Overland Avenue Fault

The National Seismic Hazard Maps – Source Parameters database (USGS, 2008) does not include the Overland Fault. But based on the studies of Poland, et al. (1959) the concealed trace of the Overland Avenue Fault is located approximately ¼-mile to the east of the Project Site, along Overland Avenue. The location of this fault is shown in the enclosed Local Geologic Map.

The Overland Fault extends from the northwest flank of the Baldwin Hills to Santa Monica Boulevard, in the Vicinity of Overland Avenue. The fault trends northwest between the Charnock Fault and the Newport-Inglewood Fault Zone. The Overland Fault is depicted by Poland, et al. (1959) as an inferred fault, cutting late Pleistocene terrace deposits and concealed under alluvium. Ziony, et al. (1979) note that the alluvium is not cut by the fault, an interpretation that is in agreement with more recent work by Ziony and Jones (1989).

The dip of the Overland Avenue fault is unknown; however, based on historical water levels, displacement along the fault is believed to be vertical, with an offset of approximately 30 feet. It is anticipated that the west site of the fault has moved downward relative to the east side. The fault apparently has not been observed at the surface. The Overland Fault has been designated as a Pre-Holocene fault by the California Geological Survey (CGS), having its most recent surface displacement within the late Quaternary Age (last 1.6 million years).

No Special Studies Zones have been delineated by the State of California, or any other jurisdiction, along any part of the Overland Fault. Based on the poorly constrained location of the Overland Fault near the site, its concealment under the alluvium, and the age of its most recent displacement, it is the opinion of this firm that the potential for surface rupture at the site due to this fault is considered remote.

Anacapa-Dume Fault

The Anacapa–Dume Fault, located approximately 8.27 miles to the northwest of the Project Site, is a near-vertical offshore escarpment exceeding 600 meters locally, with a total length exceeding 62 miles. This fault is also part of the Transverse Ranges Southern Boundary fault system. It occurs as close as 3.6 miles offshore south of Malibu at its western end, but trends northeast where it merges with the offshore segments of the Santa Monica Fault Zone. It is believed that the Anacapa–Dume Fault is responsible for generating the historic 1930 magnitude 5.2 Santa Monica earthquake, the 1973 magnitude 5.3 Point Mugu earthquake, and the 1979 and 1989 Malibu earthquakes, each of which possessed a magnitude of 5.0.[f]

[f] *City of Malibu Planning Department. Malibu General Plan, Chapter 5.0, Safety and Health Element,*

The Anacapa–Dume fault is thought to be capable of producing a maximum magnitude 7.2 earthquake.

iii) Blind Thrusts Faults

Blind or buried thrust faults are faults without a surface expression but are a significant source of seismic activity. By definition, these faults have no surface trace, therefore the potential for ground surface rupture is considered remote. They are typically broadly defined based on the analysis of seismic wave recordings of hundreds of small and large earthquakes in the Southern California area. Due to the buried nature of these thrust faults, their existence is sometimes not known until they produce an earthquake. Two blind thrust faults in the Los Angeles metropolitan area are the Puente Hills Blind Thrust and the Elysian Park Blind Thrust. Another blind thrust fault of note is the Northridge Fault located in the northwestern portion of the San Fernando Valley.

The Puente Hills Blind Thrust fault extends eastward from Downtown Los Angeles to the City of Brea in northern Orange County. The Puente Hills Blind Thrust Fault includes three north-dipping segments, named from east to west as the Coyote Hills segment, the Santa Fe Springs segment, and the Los Angeles segment. These segments are overlain by folds expressed at the surface as the Coyote Hills, Santa Fe Springs Anticline, and the Montebello Hills. The Los Angeles segment of the Puente Hills Blind Thrust is located approximately 4.44 miles to the east of the Project Site.

The Santa Fe Springs segment of the Puente Hills Blind Thrust fault is believed to be the cause of the October 1, 1987, Whittier Narrows Earthquake. Based on deformation of late Quaternary age sediments above this fault system and the occurrence of the Whittier Narrows earthquake, the Puente Hills Blind Thrust Fault is considered an active fault capable of generating future earthquakes beneath the Los Angeles Basin. A maximum moment magnitude of 7.0 is estimated by researchers for the Puente Hills Blind Thrust Fault.

The Elysian Park anticline is thought to overlie the Elysian Park Blind Thrust. This fault has been estimated to cause an earthquake every 500 to 1,300 years in the magnitude range 6.2 to 6.7. The Elysian Park anticline is approximately 9.43 miles to the southeast of the subject site.

The Mw 6.7 Northridge earthquake was caused by the sudden rupture of a previously unknown, blind thrust fault. This fault has since been named the Northridge Thrust, however it is also known in some of the literature as the Pico Thrust. It has been assigned a maximum magnitude of 6.9 and a 1,500-to-1,800-year recurrence interval. The Northridge Thrust is located 20.58 miles to the northwest of the Project Site.

http://qcode.us/codes/malibu-general-plan/; accessed August 2023.

b) Surface Ground Rupture

In 1972, the Alquist-Priolo Special Studies Zones Act (now known as the Alquist-Priolo Earthquake Fault Zoning Act) was passed into law. As revised in 2018, The Act defines "Holocene-active" Faults utilizing the same aging criteria as that used by California Geological Survey (CGS). However, established state policy has been to zone only those faults which have direct evidence of movement within the last 11,700 years. It is this recency of fault movement that the CGS considers as a characteristic for faults that have a relatively high potential for ground rupture in the future.

CGS policy is to delineate a boundary from 200 to 500 feet wide on each side of the Holocene-Active fault trace based on the location precision, the complexity, or the regional significance of the fault. If a site lies within an Earthquake Fault Zone, a geologic fault rupture investigation must be performed that demonstrates that the proposed building site is not threatened by surface displacement from the fault before development permits may be issued.

Ground rupture is defined as surface displacement which occurs along the surface trace of the causative fault during an earthquake. Based on research of available literature and results of site reconnaissance, no known Holocene-active or Pre-Holocene faults underlie the subject site. In addition, the subject site is not located within an Alquist-Priolo Earthquake Fault Zone. As shown in the enclosed Earthquake Zones of Required Investigation Map, the nearest Earthquake Fault Zone is located approximately 1.75 miles to the east of the Project Site, for the Newport-Inglewood Fault. Based on these considerations, the potential for surface ground rupture at the subject site is considered low.

c) Seismicity

As with all of Southern California, the Project Site is subject to potential strong ground motion, should a moderate to strong earthquake occur on a local or regional fault. Design of any proposed structures on the site in accordance with the provisions of the applicable California Building Code will mitigate the potential effects of strong ground shaking.

d) Deaggregated Seismic Source Parameters

The peak ground acceleration (PGA) and modal magnitude for the Project Site was obtained from the USGS Probabilistic Seismic Hazard Deaggregation program (USGS, 2014). The parameters are based on a 2 percent in 50 years ground motion (2475-year return period). A shear wave velocity (Vs30) of 259 meters per second was utilized in the computation. The deaggregation program indicates a PGA of 0.87g and a mean magnitude of 6.69 for the site.

e) California Building Code Seismic Parameters

Based on information derived from the subsurface exploration, the Project Site is classified as Site Class D, which corresponds to a "Stiff Soil" Profile, according to Table 20.3-1 of ASCE 7-16. This information and the site coordinates were input into the OSHPD seismic utility program in order to calculate ground motion parameters for the site.

CALIFORNIA BUILDING CODE SEISMIC PARAMETERS	
California Building Code	2022
ASCE Design Standard	7-16
Site Class	D
Mapped Spectral Acceleration at Short Periods (S_S)	1.952g
Site Coefficient (F_a)	1.0
Maximum Considered Earthquake Spectral Response for Short Periods (S_{MS})	1.952g
Five-Percent Damped Design Spectral Response Acceleration at Short Periods (S_{DS})	1.301g
Mapped Spectral Acceleration at One-Second Period (S_1)	0.691g
Site Coefficient (F_v)	1.7*
Maximum Considered Earthquake Spectral Response for One-Second Period (S_{M1})	1.175g*
Five-Percent Damped Design Spectral Response Acceleration for One-Second Period (S_{D1})	0.783g*

** These values are determined based on the tabulated values shown on ASCE 7-16, Table 11.4-2 for the Long-Period Site Coefficient, F_v. It should be noted that the exception to performing a site-specific hazard analysis for structures on Site Class D for values of S_1 greater than or equal to 0.2 presented by ASCE 7-16 may be followed, provided the conditions outlined in the ASCE 7-16 Section 11.4.8 (including Supplement 3 of the ASCE 7 Standards) are implemented in the structural design and analyses. This exception recommends that, where a site-specific ground motion hazard analysis is not required, the S_{M1} determined by eq. (11.4-2) is increased by 50% for all applications of S_{M1} in this standard. The resulting value of the parameter S_{D1} determined by Eq. (11.4-4) shall be used for all applications of S_{D1} in this standard. This would require that the S_{M1} and S_{D1} values provided in the above table are increased by 50%.*

f) Liquefaction

Liquefaction is a phenomenon in which saturated silty to cohesionless soils below the groundwater table are subject to a temporary loss of strength due to the buildup of excess pore pressure during cyclic loading conditions such as those induced by an earthquake. Liquefaction-related effects include loss of bearing strength, amplified ground oscillations, lateral spreading, and flow failures.

Based on review of the Earthquake Zones of Required Investigation for the Beverly Hills Quadrangle (CGS, 2018), a very small portion of the southern area of the Project Site is located within a "Liquefiable" area. This determination is based on groundwater depth records, soil type and distance to a fault capable of producing a substantial earthquake. A copy of this map is included in the Appendix.

A site-specific liquefaction analysis was performed following the Recommended Procedures for Implementation of the California Geologic Survey Special Publication 117A, Guidelines for Analyzing and Mitigating Seismic Hazards in California (CGS, 2008), and the EERI Monograph (MNO-12) by Idriss and Boulanger (2008). This semi-empirical method is based on a correlation between measured values of Standard Penetration Test (SPT) resistance and field performance data.

Groundwater was encountered during exploration at a depth of 27 feet below the existing grade. Based on review of the seismic hazard zone report of the Beverly Hills 7½-minute quadrangle (CDMG, 1998), the historically highest groundwater level for the site is mapped at a depth of 20 feet below the ground surface. Both the historically highest groundwater level and the current groundwater level were utilized for the enclosed liquefaction analysis.

Section 11.8.3 of ASCE 7-16 indicates that the potential for liquefaction shall be evaluated utilizing an acceleration consistent with the MCE_G PGA. Utilizing the OSHPD seismic utility program, this corresponds to a PGA_M of 0.92g. The USGS Probabilistic Seismic Hazard Deaggregation program (USGS, 2014) indicates a PGA of 0.87g (2 percent in 50 years ground motion) and a mean magnitude of 6.69 for the site. The liquefaction potential evaluation was performed by utilizing a magnitude 6.69 earthquake, and a peak horizontal acceleration of 0.92g.

The enclosed "Empirical Estimation of Liquefaction Potential" is based on Boring B1, which was excavated within the area of the site classified as susceptible to liquefaction. Standard Penetration Test (SPT) data were collected at 5-foot intervals. Soil samples were collected and conveyed to the laboratory for testing and analysis. The percent passing Number 200 sieve, Atterberg Limits, and Plasticity Index (PI) of the representative soil samples collected during our field exploration are presented on Plates E and F.

The procedure presented in the SP117A guidelines was followed in analyzing the liquefaction potential of the subject site. The SP 117A guidelines were developed based on a paper titled, "Assessment of the Liquefaction Susceptibility of Fine-Grained Soils", by Bray and Sancio (2006). According to the SP117A, soils having a Plastic Index greater than 18 exhibit clay-like behavior, and the liquefaction potential of these soils are considered to be low. Therefore, where the results of Atterberg Limits testing showed a Plastic Index greater than 18, the soils would be considered non-liquefiable, and the analysis of these soil layers was turned off in the liquefaction susceptibility column.

Based on CGS Special Publication 117A (CDMG, 2008), a factor of safety against the occurrence of liquefaction greater than about 1.3 can be considered an acceptable level of risk where high-quality, site-specific penetration resistance and geotechnical laboratory data is collected. The site-specific liquefaction analysis included in the Appendix indicates that the Project Site soils would not be susceptible to liquefaction during the ground motion expected during the design-based seismic event. Furthermore, the Project Site is not expected to be affected by potential impacts related to liquefaction, such as lateral spreading and surface manifestation.

g) Dynamic Settlement

Seismically-induced settlement or compaction of dry or moist, cohesionless soils can be an effect related to earthquake ground motion. Such settlements are typically most damaging when the settlements are differential in nature across the length of structures.

Some seismically-induced settlement of the proposed structure should be expected as a result of strong ground-shaking, however, due to the uniform nature of the underlying geologic materials, excessive differential settlements are not expected to occur.

h) Regional Subsidence

The Project Site is not located within a zone on known subsidence due to oil or other fluid withdrawal.

i) Landsliding

The Earthquake Zones of Required Investigation for the Beverly Hills Quadrangle (CGS, 2018) indicates that the Project Site is not located within an "Earthquake Induced Landslide" zone.

The probability of seismically-induced landslides occurring on the Project Site is considered to be negligible due to the gentle topographic relief observed across the Project Site. Therefore, potential impacts related to landsliding would be less than significant.

j) Collapsible Soils

Based on review of the enclosed consolidation curves, the soils to underlain the proposed structure are not considered prone to hydroconsolidation.

k) Tsunamis, Seiches and Flooding

Tsunamis are large ocean waves generated by sudden water displacement caused by a submarine earthquake, landslide, or volcanic eruption. Review of the County of Los Angeles Flood and Inundation Hazards Map, Leighton (1990), indicates the Project Site does not lie within the mapped tsunami inundation boundaries.

Review of the County of Los Angeles Flood and Inundation Hazards Map, Leighton (1990), indicates the Project Site lies within the potential mapped inundation boundaries of the Stone Canyon Dam, should the dam retaining these reservoirs fail during a seismic event. A determination of whether a higher site elevation would remove the Project Site from the potential inundation zones is beyond the scope of this investigation.

Review of the applicable Flood Insurance Rate Map (06037C1595G) indicates the Project Site lies within an area of minimal flood hazard (Zone X).

l) City of Los Angeles Methane Zone

Based on review of the NavigateLA Website, developed by the City of Los Angeles, Bureau of Engineering, Department of Public Works, the Project Site is located within the limits of a City of Los Angeles Methane Zone.

m) Oil Fields and Oil Wells

Based on review of the California Geologic Energy Management Division (CalGEM) On-line Mapping System, the Project Site is not located within the limits of an oil field. In addition, no oil or gas wells have been drilled at the site. The nearest oil well is located approximately ¼-mile to the southwest of the Project Site.

n) Temporary Excavations

All required excavations are expected to be conducted in accordance with the provisions of the applicable California Building Code. Therefore, the project would not result in any on-site or off-site landslide.

o) Ground Failure

The proposed construction will not cause or increase the potential for any seismic related ground failure on the subject site or adjacent sites.

p) Expansive Soils

The native site soils were found to be in the Very Low expansion range. The Expansion Index was found to be 7 for a bulk sample representative of the upper soils.

q) Sedimentation and Erosion

Grading, excavation and other earth moving activities could potentially result in erosion and sedimentation. For any grading proposed in the site from November to April (generally considered the rainy season) an erosion control plan consistent with the City of Culver City requirements would need to be prepared. Compliance with minimum code requirements will render project impacts related to sedimentation and erosion less than significant.

r) Landform Alterations

There are no significant hills, canyons, ravines, outcrops or other geologic or topographic features on the Project Site. Therefore, any proposed project would not adversely affect any prominent geologic or topographic features.

s) Septic Tanks

It is the understanding of this firm that sewers are available at the Project Site for wastewater disposal. No septic tanks or alternative disposal systems are necessary or anticipated for any future site projects.

8.0 GENERAL PRELIMINARY CONCLUSIONS AND RECOMMENDATIONS

Based upon the exploration, laboratory testing, and research, it is the preliminary finding of Geotechnologies, Inc. that construction of the proposed development is considered feasible from a geotechnical engineering standpoint.

During exploration, it was observed that the Project Site is underlain by a thin mantle of fill materials and native alluvial soils. The fill materials are not suitable for support of foundation systems or slabs-on-grade but may be reused for the preparation of compacted fill pads.

It is anticipated that excavation of the proposed subterranean parking garage will remove the existing fill materials, exposing competent native alluvial soils at the bottom. The proposed structure may be supported by conventional foundations bearing in the native alluvial soils expected at the subterranean subgrade.

It is anticipated that the installation of temporary shoring will be required for construction of the proposed subterranean parking garage. Where sufficient space is available, temporary excavations may be sloped at a 1:1 gradient.

Groundwater was encountered in Boring B1, at a depth of 27 feet below the ground surface. Based on the elevation contours presented in the NavigateLA Website, the observed groundwater elevation corresponds to approximate elevation 26.5 feet AMSL. The historically highest groundwater level for the site is on the order of 20 feet below grade. Based on review of the Level P1 Plan prepared by KFA, dated January 15, 2025, the lowest finished floor elevation of the proposed subterranean parking level will extend to an approximate depth of 11 feet below the proposed ground level. This depth corresponds to elevation 51.5 feet AMSL. Therefore, the bottom of the proposed structure is not expected to extend deeper than the current or historically highest groundwater levels, and implementation of temporary or permanent dewatering is not anticipated for the proposed project.

It is anticipated that on-site stormwater infiltration will not be feasible for the project. The groundwater level was observed during exploration at a depth of 27 feet below the existing grade. Current regulations require that the bottom of infiltration systems maintain a minimum vertical separation of 10 feet above the groundwater level. Based on this vertical separation, infiltration would have to occur within the upper 17 feet strata, which would be expected to overlap with the anticipated depth of the subterranean parking level and its foundation system. Infiltrating above the subterranean subgrade elevation is not recommended for areas located outside the proposed building footprint.

As with all of Southern California, the site is subject to potential strong ground motion from a moderate to strong earthquake on a local or regional fault. Design of the proposed development in accordance with the provisions of the most current California Building Code and Culver City provisions will mitigate the potential effects of strong ground shaking.

9.0 CLOSURE

The conditions identified in this document are typical of sites within this area of the City of Culver City, and of a type that are routinely addressed through regulatory measures. Geotechnologies, Inc. appreciates the opportunity to provide our services on this project. Should you have any questions please contact this office.

Respectfully submitted,

9770 Culver Boulevard
Culver City, CA 90232

Subject: Paleontological Resources Assessment for the 10950 Washington Boulevard Project; City of Culver City, Los Angeles County, California.

Dear Mr. Mendivil:

This letter report presents the methods, results, and recommendations of a paleontological resources assessment conducted by Environmental Science Associates (ESA) for the 10950 Washington Boulevard Project (Project). The City of Culver City (City) certified a programmatic Environmental Impact Report (Programmatic EIR) to evaluate the potential environmental impacts of approving the Culver City General Plan 2045 and Zoning Code Update Project in September 2024. The General Plan 2045 and Zoning Code Update Program EIR (State Clearinghouse No. 2022030144) (Programmatic EIR or Certified PEIR) evaluated the anticipated future development within the City, including the anticipated development on the Project Site. The Programmatic EIR listed one mitigation measure (GEO-1) for paleontological resources. The City is the lead agency responsible for compliance with the California Environmental Quality Act (CEQA). Section 15168(c) of the CEQA Guidelines sets forth criteria to utilize a Program EIR for "later activities" within the scope of a Program EIR. This assessment has been prepared in compliance with CEQA and Mitigation Measure GEO-1, provided below:

> Prior to development of individual projects that are subject to CEQA review and involve ground disturbance, the project proponent shall retain a Qualified Paleontologist, defined as an individual meeting the Society of vertebrate Paleontology (SVP) Standard, to conduct a site-specific paleontological resources assessment. This assessment shall include a records search at the Natura History Museum of Los Angeles County and/or other appropriate facilities, geologic map and scientific literature and/or a local register. If a resource is determined to be significant and the Project would cause a potentially significant impact to the resource, then mitigation measures shall be prescribed to reduce impacts from the Project to that resource. An analysis regarding the Project's potential to encounter buried resources during the construction shall be conducted. If there is a potential to encounter resources during construction of the Project, paleontological construction monitoring shall be prescribed as a mitigation measure. The methods and results of the paleontological assessment shall be included in a technical report that is prepared prior to the city's approval of project plans and publication of subsequent CEQA documents.

The paleontological resources assessment is in partial fulfillment of Mitigation Measure GEO-1 and includes a geologic map review, a literature review, a paleontological resources database search through the Natural History Museum of Los Angeles County (LACM), and a paleontological sensitivity analysis.

This report was prepared by ESA Principal Paleontologist J.D. Stewart, Ph.D. and Cultural Resources Specialist/Archaeologist Fatima Clark, B.A. Dr. Stewart meets the Society of Vertebrate Paleontology (SVP) definition for Qualified Professional Paleontologist. ESA Principal Archaeologist, Kyle Garcia M.A., RPA, provided senior review of this document. Resumes of key personnel are provided in **Appendix A**.

Project Location

The approximately 5.8-acre (250,932 gross sf) Project Site is located at 10950 Washington Boulevard within the Clarkdale neighborhood of the City's limits (**Figure 1**). The Project Site is located on Assessor Parcel Numbers (APN) 4208-024-001, 4028-024-002, and 4208-025-018 and within an unsectioned portion of Township 2 South, Range 15 West of the Beverly Hills, CA U.S. Geological Survey (USGS) 7.5-minute topographic quadrangle (**Figure 2**). Generally, the Project Site is located just beyond the southwest corner of the Washington Boulevard and Elenda Street intersection, with direct local access to the Project Site provided via Washington Boulevard (**Figure 3**).

Project Description

The Project Site is currently occupied by two commercial buildings that total approximately 160,438 square feet (sf) of commercial floor area. The eastern building (Building 1) is a one- and two-story building containing approximately 70,808 sf of floor area. The western building (Building 2) is a three-story building with rooftop parking, with a height of approximately 49 feet from grade. Building 2 contains approximately 89,630 sf floor area. The Project Site also includes two connected surface parking lots (the "North Lot" and "South Lot"). The sidewalks adjoining the Project Site to the north are landscaped with street trees and trees are scattered throughout the existing surface parking lots. The Project Site currently provides a combined total of 439 surface parking spaces.

The Project would demolish all existing buildings and parking facilities on the Project Site and construct a new 5-story (up to a height of 61-feet) mixed-use development over one level of subterranean parking. The Project would include two, 5-story buildings (Building A and Building B) up to 61 feet in height that would include a total of 508 multi-family dwelling units (including 79 Low Income units) and 14,087 sf commercial use. The Project would include a total of 715 vehicular parking spaces, with 606 spaces provided within one subterranean level and 109 spaces provided on the enclosed first level of the building.

10950 Washington Boulevard Project

Figure 3
Aerial Photograph

ESA

The Project would require excavation to accommodate one level of subterranean parking, footings, and foundations. Earthwork would require a net export of approximately 110,000 cubic yards (cy) of soil. Construction staging would be entirely internal to the Project Site. The Project would excavate to a maximum depth of 13 feet below grade.

Regulatory Framework

Paleontological resources are limited, nonrenewable resources of scientific, cultural, and educational value that are afforded protection under state laws and regulations. The following section summarizes the applicable state laws and regulations, as well as professional standards that related to paleontological resources.

State

California Environmental Quality Act

The CEQA Guidelines (California Code of Regulations Title 14, Chapter 3, Section 15000 et seq.), define the procedures, types of activities, individuals, and public agencies required to comply with CEQA. As part of CEQA's Initial Study process, one of the questions that must be answered by the lead agency relates to paleontological resources: "Will the proposed project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?" (CEQA Guidelines Appendix G, Section VII, Part f).

The loss of a significant paleontological resource, which includes any identifiable fossil that is unique, unusual, rare, uncommon, diagnostically, or stratigraphically important, and/or those that add to an existing body of knowledge in specific areas—stratigraphically, taxonomically, and/or regionally—would be a significant environmental impact. Direct impacts to paleontological resources primarily concern the potential destruction of nonrenewable paleontological resources and the loss of information associated with these resources. This includes the unauthorized collection of fossil remains. If potentially fossiliferous bedrock or surficial sediments are disturbed, the disturbance could result in the destruction of paleontological resources and subsequent loss of information.

The CEQA threshold of significance for a significant impact to paleontological resources is reached when a project is determined to "directly or indirectly destroy a significant paleontological resource or unique geologic feature" (CEQA Guidelines Appendix G, Section VII, Part f). In general, for project sites that are underlain by paleontologically sensitive geologic units, the greater the amount of ground disturbance, the higher the potential for significant impacts to paleontological resources.

California Penal Code Section 622.5

California Penal Code Section 622.5 provides the following: "Every person, not the owner thereof, who willfully injures, disfigures, defaces, or destroys any object or thing of archeological or historical interest or value, whether situated on private lands or within any public park or place, is guilty of a misdemeanor."

California PRC Section 5097.5

California Public Resources Code (PRC) Section 5097.5 provides protection for paleontological resources on public lands, where Section 5097.5(a) states, in part, that:

> *No person shall knowingly and willfully excavate upon, or remove, destroy, injure, or deface, any historic or prehistoric ruins, burial grounds, paleontological or vertebrate paleontological site, including fossilized footprints, inscriptions made by human agency, rock art, or any other paleontological, paleontological or historical feature, situated on public lands, except with the express permission of the public agency having jurisdiction over the lands.*

Local

City of Culver City General Plan

The City's General Plan 2045 has one goal (Goal C-1) for cultural resources (including paleontological resources), which indicates that "cultural resources are protected and enhanced through proactive measures" (City of Culver City, 2024:248). Measures C-1.15 and C-1.21 provided below are focused on the protection of paleontological resources.

- **C-1.15: Public knowledge promotion.** Promote public knowledge and understanding of cultural resources (including archaeological, tribal cultural resources, historic resources, and paleontological resources) present within the city.

- **C-1.21: Protect Archaeological, Paleontological, and Tribal Cultural Resources.** Promote programs and policies to protect known archaeological and paleontological sites and Tribal Cultural Resources.

The City's General Plan also includes the following implementation actions for the preservation of paleontological resources.

- **IA.C-8: Historic discretionary review.** Require that projects subject to discretionary review are screened to Cultural Affairs to determine if further evaluation by cultural affairs is warranted and, if so, require that projects undergo historic, archaeological, and paleontological assessments and are documented in technical studies by qualified experts to identify the potential for resources to be negatively affected during project implementation and to ensure steps are taken, where warranted, to protect resources.

- **IA.C-10: Standard conditions of development approval.** Continue to implement standard conditions of approval that require and specify the steps to be taken to avoid damage and promote preservation if unknown archaeological or paleontological resources, or Tribal Cultural Resources are uncovered during construction.

Society for Vertebrate Paleontology Standard Guidelines

The Society of Vertebrate Paleontology (SVP) Guidelines (SVP, 2010) outline professional protocols and practices for conducting paleontological resource assessments and surveys, monitoring and mitigation, data and fossil recovery, sampling procedures, specimen preparation, identification, analysis, and curation. Most practicing professional vertebrate paleontologists adhere closely to the SVP's assessment, mitigation, and monitoring requirements as specifically provided in its standard guidelines. Most state and local regulatory agencies accept and use the professional standards set forth by the SVP.

Paleontological Resources Significance Criteria

As defined by the SVP (2010:11), significant nonrenewable paleontological resources are:

> *Fossils and fossiliferous deposits, here defined as consisting of identifiable vertebrate fossils, large or small, uncommon invertebrate, plant, and trace fossils, and other data that provide taphonomic, taxonomic, phylogenetic, paleoecologic, stratigraphic, and/or biochronologic information. Paleontological resources are considered to be older than recorded human history and/or older than middle Holocene (i.e., older than about 5,000 radiocarbon years).*

Thus, any identifiable vertebrate fossil older than 5,000 years is considered significant.

Multiple paleontological studies have additional criteria for the assessment of significance for fossil discoveries (e.g., Murphey et al., 2019; Murphey and Daitch, 2007; Scott and Springer, 2003). In general, these studies assess fossils as significant if one or more of the following criteria apply:

1. The fossils provide information on the evolutionary relationships and developmental trends among organisms, living or extinct.
2. The fossils provide data useful in determining the age(s) of the rock unit or sedimentary stratum, including data important in determining the depositional history of the region and the timing of geologic events therein.
3. The fossils provide data regarding the development of biological communities or interaction between paleobotanical and paleozoological biotas.
4. The fossils demonstrate unusual or spectacular circumstances in the history of life.
5. The fossils are in short supply and/or in danger of being depleted or destroyed by the elements, vandalism, or commercial exploitation, and are not found in other geographic locations.

In summary, significant paleontological resources are determined to be fossils or assemblages of fossils that are unique, unusual, rare, uncommon, or diagnostically important (Murphey et al., 2019; Murphey and Daitch, 2007; Scott and Springer, 2003). Any identifiable vertebrate fossil is significant (SVP, 2010). Significant fossils can include remains of large to very small aquatic and terrestrial vertebrates or remains of plants and animals previously not represented in certain portions of the stratigraphy. Assemblages of fossils that might aid stratigraphic correlation, particularly those offering data for the interpretation of tectonic events, geomorphologic evolution, and paleoclimatology are also critically important (Scott and Springer, 2003; Scott et al., 2004).

Paleontological Potential

Paleontological potential is defined as the potential for a geologic unit to produce scientifically significant fossils. This is determined by rock type, the past history of the geologic unit in producing significant fossils, and the fossil localities recorded from that unit. Paleontological potential is derived from the known fossil data collected from the entire geologic unit and not just from one specific survey. In its "Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources," the SVP (2010) defines four categories of paleontological sensitivity (potential) for rock units: high, low, undetermined, and no potential.

- **High Potential.** Rock units from which vertebrate or significant invertebrate, plant, or trace fossils have been recovered are considered to have a high potential for containing additional significant paleontological resources. Rocks units classified as having high potential for producing paleontological resources include, but are not limited to, sedimentary formations and some volcaniclastic formations (e. g., ashes or tephras), and some low-grade metamorphic rocks which contain significant paleontological resources anywhere within their geographical extent, and sedimentary rock units temporally or lithologically suitable for the preservation of fossils (e. g., middle Holocene and older, fine-grained fluvial sandstones, argillaceous and carbonate-rich paleosols, cross-bedded point bar sandstones, fine-grained marine sandstones, etc.).
- **Low Potential.** Reports in the paleontological literature or field surveys by a qualified professional paleontologist may allow determination that some rock units have low potential for yielding significant fossils. Such rock units will be poorly represented by fossil specimens in institutional collections, or based on general scientific consensus only preserve fossils in rare circumstances and the presence of fossils is the exception not the rule, e. g. basalt flows or Recent colluvium. Rock units with low potential typically will not require impact mitigation measures to protect fossils.
- **Undetermined Potential.** Rock units for which little information is available concerning their paleontological content, geologic age, and depositional environment are considered to have undetermined potential. Further study is necessary to determine if these rock units have high or low potential to contain significant paleontological resources. A field survey by a qualified professional paleontologist to specifically determine the paleontological resource potential of these rock units is required before a paleontological resource impact mitigation program can be developed. In cases where no subsurface data are available, paleontological potential can sometimes be determined by strategically located excavations into subsurface stratigraphy.
- **No Potential.** Some rock units have no potential to contain significant paleontological resources, for instance high-grade metamorphic rocks (such as gneisses and schists) and plutonic igneous rocks (such as granites and

diorites). Rock units with no potential require no protection nor impact mitigation measures relative to paleontological resources.

For geologic units with high potential, full-time monitoring is generally recommended during any project-related ground disturbance. For geologic units with low potential, monitoring will not generally be required. For geologic units with undetermined potential, field surveys by a qualified vertebrate paleontologist should be conducted to specifically determine the paleontological potential of the rock units present within the study area.

Methods

The Project Site was the subject of thorough background research and analysis to assess its paleontological sensitivity. The research included geologic map and literature review, review of the *Environmental Impact Report, Soils, and Geology Issues* report (Soils and Geology report) prepared for the Project, and a paleontological records search conducted by the LACM.

Results

Geologic Setting

The Project Site is situated in the northern portion of the Los Angeles Basin (Basin), a structural depression approximately 50 miles long and 20 miles wide (Yerkes et al., 1965; Ingersoll and Rumelhart, 1999). The Basin is within the Transverse Ranges physiographic-structural province, a series of east-west trending mountains and valleys that interrupt the northwest-southeast orientation of other major California ranges, including the Peninsular Ranges, Coast Ranges, and the Sierra Nevada. The Basin is bounded on the north by the Santa Monica Mountains, the Elysian, Repetto, and Puente Hills and on the east, and by the Santa Ana Mountains and San Joaquin Hills to the southeast. The Basin formed between 18 and 3 million years ago as a result of tectonic subsidence (Critelli et al., 1995). Continuous sedimentation into the Basin began during the middle Miocene around 13 million years ago, as thousands of feet of sediments were deposited in a marine environment (Yerkes et al., 1965). Deposition of terrestrial alluvial sediments commenced during the Pleistocene. Sea level fluctuated during the Pleistocene Epoch, thus exposing, submerging, and re-exposing parts of what is today Culver City.

Geologic Map and Literature Review

Geologic mapping indicates that the surface of the Project Site is underlain by Holocene-aged younger Quaternary alluvium (mapped as Qa) (**Figure 4**). The alluvial sediments were deposited on the ancient floodplain of the Los Angeles River and consist of well-sorted silts and sands, interbedded with stream channel deposits of sands and gravels (Dibblee and Ehrenspeck, 1991). At the surface, these sediments have low sensitivity due to the young age of the deposits and are unlikely to preserve fossil resources. However, these sediments increase in age with depth, such that the deeper layers of this unit are of an age and have the potential to preserve fossil resources (i.e., over 5,000 years old, as per the SVP [2010]).

10950 Washington Blvd Mixed-Use Project

Figure 4
Geologic Map

ESA

Alluvial sediments that date to the middle Holocene or older have a rich fossil history in southern California and particularly the Los Angeles Basin. The most common fossils include the bones of mammoth, bison, horse, wolf, camel, antelope, and giant ground sloth, as well as small animals such as rodents, birds, and lizards (Graham and Lundelius, 1994; Jefferson, 1991a and b; Miller, 1971). In addition to illuminating the striking differences between Southern California in the Pleistocene and today, this abundant fossil record has been vital in studies of extinction (e.g., Sandom, et al., 2014; Barnosky et al., 2004), ecology (e.g., Connin et al., 1998), and climate change (e.g., Roy et al., 1996).

From 2016 through 2018, multiple paleontological monitoring projects in the City located in the general vicinity of the current Project have yielded an extensive collection of fossils. For instance, in 2016, SWCA conducted paleontological resources monitoring which yielded the identification of 78 fossil specimens from sediments at 28 to 29 feet below ground surface (bgs), both *in situ* and from spoil piles excavated at that level. The taxa represented by the collected fossils range from mammal (*Camelops hesternus*) and plant (*Pinus* sp.) remains, to a large number of mollusks (Bivalvia and Gastropoda) (SWCA, 2016). From 2017 to 2018, ESA conducted paleontological resources monitoring producing several paleontological specimens (gastropod and clam shells) at depths of 25 to 41 feet bgs that extended past the artificial fill, throughout the entire property (ESA, 2018). Lastly, in 2018, ESA conducted paleontological resources monitoring and identified approximately 100 specimens. The specimens consist of marine mammal (otariid, and cetacean), terrestrial mammals (*Bison* sp.), invertebrate, microvertebrate (amphibians, snakes, gophers, kangaroo rats, harvest mice, wood rats, voles, and rabbits), and plant fossils, encountered between 15 to 35 feet bgs, exclusively within bluish gray silty sand and clay layers. These fossils are associated with the marine facies of the Lakewood Formation (ESA, 2021; Stewart, personal communication, 2022). Pleistocene terrestrial fossils (*Bison* sp.) have also been found in the same neighborhood above the bluish gray layers at depths of 10 to 12 feet (Stewart, pers. obs. 2024). Pleistocene terrestrial plant fossils such as Torrey pine and Monterey cypress, sometimes occur at depths greater than 30 feet (Stewart, pers. obs. 2024). Surficial sediments at all four of these sites are mapped as Holocene-aged younger Quaternary alluvium, the same as the Project site.

Review of the Geotechnical Report

Review of the geotechnical report by Geotechnologies, Inc. (2023) indicates that a total of one boring and six test pits were excavated at the Project Site. The borings were drilled to a depth of 60 feet below grade, while the test pits were excavated to depths between 5 and 10 feet below grade. Fill materials (consisting of a mixture of clayey silt, sandy silt, and silty sand) were found to depths ranging between 1 and 3 feet below the existing grade. Native alluvial soils (consisting of interlayered mixtures of sand, silt and clay) were found beneath the fill. “The alluvial soils range in color from medium brown, yellowish brown, and grayish brown, and are moist to wet, medium dense to very dense, or stiff to very stiff, and fine to coarse grained” (Geotechnologies, Inc., 2023:2) No attempt was made to assign any of these sediments to known formations. The drill logs indicate that gray to dark gray clay, silt, and sand occur in various combinations below 30 feet (Geotechnologies, Inc., 2023: Plate A). These are the marine sediments that have produced a mixture of terrestrial and marine organisms at nearby project sites

(SWCA, 2016; ESA 2018; 2021; Stewart, pers. obs., 2024). These reports from nearby project sites assign the gray marine sediments to the Lakewood Formation.

Natural History Museum of Los Angeles County

A paleontological resources database search was conducted by the LACM on December 30, 2024 (Bell, 2024). The search entailed an examination of current geologic maps and known fossil localities within the Project Site and vicinity. The purpose of the records search was to: (1) determine whether any previously recorded fossil localities occur in the Project Site or vicinity; (2) assess the potential for disturbance of these localities during construction; and (3) assist in evaluating the paleontological sensitivity of the Project.

The results indicate that no fossil localities fall within the Project Site, but that fossil localities do exist nearby from the same sedimentary deposits that occur in the Project Site, either at surface or at depth (**Table 1**). Fossil localities (including gastropods, elephant, uncatalogued invertebrates, American lion, rodent, ground sloth, and horse) are situated in the vicinity of the Project Site. These localities were found at unknown depths and depths between surface and 130 feet bgs.

TABLE 1
SUMMARY OF NHMLAC FOSSIL LOCALITIES

Locality Number	Formation	Taxa	Depth
LACM IP 4982	Palos Verdes Sand	Gastropods (*Turbonilla halia*)	Unknown
LACM VP 4250	Unknown formation (Pleistocene)	Elephant (*Elephas*)	Unknown
LACM IP 7049, 26031, 426	Unknown formation (Upper Pleistocene)	Uncatalogued invertebrates	Surface exposure
LACM VP 5462	Unknown formation (Pleistocene)	American lion (*Felis atrox*)	6 ft bgs
LACM VP 7879	Unknown formation (Pleistocene; sandy silty clay)	Rodent (Rodentia); ground sloth (*Paramylodon*); horse (*Equus*)	11 - 130 ft bgs

SOURCE: Bell, 2024

Paleontological Sensitivity Analysis

The literature and geologic mapping review and the records search results presented above were used to assign paleontological sensitivity to the geologic units at surface and underlying the Project Site, following the guidelines of the SVP (2010):

- **Fill Material:** As indicated by geotechnical testing (Geotechnologies, Inc., 2023), fill material is present at the surface of the Project Site and extends to depths between 1 and 3 feet. It is unclear as to where the fill material came from and so assigning an age is not possible. Given that the fill is described as artificial and is likely the result of past grading or construction activities at the Project Site, it is unlikely to contain intact fossiliferous deposits. Therefore, this unit is assigned **No Potential** to contain significant paleontological resources.
- **Qa:** Holocene alluvial gravel, sand and silt-clay, derived from Santa Monica Mountains; includes gravel and sand of stream channels. This geologic unit is mapped as covering the Project vicinity for several blocks in all directions (Dibblee and Ehrenspeck, 1991). Those authors imply that it is of Holocene age. The geotechnical report for this Project (Geotechnologies, Inc., 2023) identified the sediments below the artificial fill only as "native alluvial soils." The upper layers of this unit are assigned **Low Potential** to contain paleontological resources given their young age. However, these sediments increase in age with depth, such that the deeper layers of this unit have a **higher potential** to preserve paleontological resources. Therefore, this unit is assigned a **Low to High Potential** for significant paleontological resources such that the potential increases with depth.
- **Lakewood Formation:** This formation consists of Pleistocene alluvium deposited in both marine and non-marine settings and is only found subsurface in the Project vicinity. When uncovered through excavation in this area, this unit ranges from rust to brown to gray to bluish gray to greenish gray. Brown and rust-colored sediments above the gray and green sediments have produced Pleistocene mammal fossils (*Bison* sp.; Stewart, pers. obs., 2024). Given the fairly extensive vertebrate and invertebrate paleontological collections that resulted from nearby projects, the Lakewood Formation is assigned **High Potential** for significant paleontological resources.

Summary of Findings and Recommendations

Geologic mapping indicates that the surface of the Project Site is underlain by Holocene-age alluvium (Qa), which have a low sensitivity for paleontological resources due to the young age of the deposits and are unlikely to preserve fossil resources. However, these sediments increase in age with depth, such that the deeper layers of this unit have a higher potential to preserve paleontological resources. Moreover, numerous paleontological resources have been recovered from deeper deposits during construction of three development projects in the general vicinity of the Project Site in association with the Lakewood Formation—a geological unit which consists of a Pleistocene-age alluvium deposited in both marine and non-marine settings, which is considered to have high potential for encountering paleontological resources. In particular, these projects yielded the identification of more than 200 fossil specimens from these deposits that were encountered at depths between 15 feet bgs to 41 feet bgs. In addition, the paleontological records search conducted through the LACM also indicates that older (Pleistocene-age) geologic units in the vicinity of the Project Site have produced paleontological resources (including gastropods, elephant, uncatalogued invertebrates, American lion, rodent, ground sloth, and horse) situated within approximately 0.40 and 3.4 miles from the Project Site. These localities were found at unknown

depths and depths between surface and 130 feet bgs. Given the identification of numerous fossil specimens at depth during construction projects in the general vicinity, the positive results of LACM records search, and since excavations for the Project would extend to a maximum depth of 13 feet bgs, the potential to encounter buried paleontological resources during construction of the Project is considered high. Therefore, as the Project could directly or indirectly destroy unique paleontological resources, impacts on buried paleontological resources are considered potentially significant. As such, the following recommendations are provided below in order to reduce impacts to paleontological resources to a less than significant level under CEQA.

1. **Mitigation Measure GEO-1**: Prior to the issuance of grading permits, the Applicant shall retain a Qualified Paleontologist meeting the Society of Vertebrate Paleontology (SVP) Standards. The Qualified Paleontologist shall provide technical and compliance oversight of all work as it relates to paleontological resources, shall attend the Project kick-off meeting, and Project progress meetings, and shall be responsible for monitoring and overseeing paleontological monitors (meeting SVP standards) that will observe grading and excavation activities as required in GEO-3.
2. **Mitigation Measure GEO-2:** The Qualified Paleontologist shall prepare a Paleontological Resources Mitigation Plan (Plan) prior to the start of paleontological construction monitoring (see GEO-3). The Plan shall be prepared in accordance with guidelines of the Society of Vertebrate Paleontology (2010) and make provisions for the monitoring of excavations and a testing (e.g., wet screening) of sediment samples, particularly in the lower levels of the excavation. The Plan shall include a geological context discussion, methods for the construction monitoring, and describe the protocols when a paleontological discovery is made during construction.
3. **Mitigation Measure GEO-3**: Paleontological monitoring shall be conducted during construction excavations into undisturbed older alluvial sediments that exceed 10 feet in depth. Monitoring shall consist of visually inspecting fresh exposures of rock for larger fossil remains and, where appropriate, collecting and wet screening sediment samples of promising horizons for smaller fossil remains. If significant vertebrate fossils are found by screening, it will be necessary to collect a 6,000-pound sample for screening, per SVP Guidelines (2010). The sample can be collected by construction machinery and stockpiled and processed in a safe location on site, or transported to another site for processing. The frequency of monitoring inspections shall be determined by the Qualified Paleontologist and shall be based on the rate of excavation and grading activities, the materials being excavated, and the depth of excavation, and if found, the abundance and type of fossils encountered. Full-time monitoring can be reduced to part-time inspections, or ceased entirely, if determined adequate by the Qualified Paleontologist. If a potential fossil is found, the Qualified Paleontologist shall have authority to temporarily stop excavation activity or to temporarily divert or redirect grading and excavation activities in the area of the exposed fossil to facilitate evaluation of the discovery. An appropriate buffer area shall be established by the Qualified Paleontologist around the find where construction activities shall not be allowed to continue. Work shall be allowed to continue outside of the buffer area. At the Qualified Paleontologist's discretion, and to reduce any construction delay, the grading and excavation contractor shall assist in removing rock/sediment samples for initial processing and evaluation. If preservation in place is not feasible, the Qualified Paleontologist shall implement a paleontological salvage program to remove the resources from their location.
4. **Mitigation Measure GEO-4**: Any significant fossils recovered during Project-related excavations shall be prepared to the point of identification. The residue form sediment samples shall be dried and sorted with a binocular dissecting microscope. Both macrofossils and vertebrate microfossils shall be prepared to the point of identification, identified, and curated into an accredited repository. The Qualified Paleontologist shall

prepare a final report summarizing the results of the monitoring and salvaging efforts, the methodology used in these efforts, as well as a description of the fossils collected and their significance. The report shall accompany the specimens to the accredited repository. The report shall also be submitted by the Applicant to the City of Culver City to signify the satisfactory completion of the Project and required mitigation measures.

Kyle Garcia has over 21 years of experience in the archaeology and prehistory of southern California, and meets and exceeds the Secretary of Interior Standards qualificaitons for a prehistoric and historic archaeolgoist. During his career, he has authored or contributed to more than 800 projects subject to the requirements of the California Environmental Quality Act, the National Environmental Policy Act (NEPA), and regulations implementing Section 106 of the National Historic Preservation Act (Section 106 of the NHPA). He is well-versed in the archaeological resources of California's coastal, interior, and island settings. He is skilled in evaluation historic and prehistoric archaeological resources; agency and Native American consultation; pedestrian surveys, testing and evaluation excavations as well as archaeological and paleontological construction monitoring, and laboratory processing. During his tenure, he has authored or contributed to more than 400 technical reports and sections to support all levels of CEQA and NEPA documents. Kyle's portfolio of projects includes energy, water, and transportation infrastructure as well as residential, commercial, mixed-use, institutional, and urban redevelopment serving public and private sector clients. Kyle has conducted archaeological work throughout California and is a certified archaeologist and paleontologist in Riverside, Santa Barbara, and Orange counties.

Relevant Experience

Archaeological/Paleontological Monitoring. Kyle has managed more than 120 archaeological and/or paleontological construction monitoring projects in Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. He has a commanding knowledge of the procedures to implement in the event of an inadvertent discovery during construction, and how to navigate an applicant or lead agency though that process to ensure compliance with the project's mitigation measures or conditions of approval and to reach consensus on treatment of the discovery, especially if the discovery is Native American in origin.

Paleontology. In addition to his archaeological work, Kyle has been cross-trained in paleontological mitigation monitoring and assisted in the excavations of a Miocene whale fossil near Irvine and a new species of extinct tuna in Laguna Niguel, California. Kyle has also managed or conducted more than 200 paleontological assessments and 40 paleontological monitoring projects throughout southern California. He has assisted ESA's paleontologists with the preparation of paleontological reports in compliance with CEQA and local paleontological guidelines, including guidelines for the Society for Vertebrate Paleontology.

Project Experience

Archaeological and Paleontological Monitoring for the LAX Crossfield Taxiway Improvements, Los Angeles, CA. *Project Manager/Archaeological Monitor.* Between 2009-2010, Kyle performed archaeological and paleontological monitoring services during

earthmoving operations associated with the development of the Crossfield Taxiway project in accordance with established mitigation measures from the LAX Crossfield Taxiway Project (CFTP) EIR. PCR conducted archaeological and paleontological field visits, paleontological sediment sampling, and monitoring of earthmoving operations associated with the construction of CFTP until activities requiring monitoring ended. These operations included excavations for filter boxes, water pipeline installation, and the realignment of World Way West. In addition to monitoring, Kyle performed an archaeology and paleontology training session for appropriate project personnel involved with construction of the project. The training session focused on how to identify archaeological and paleontological resources that may be encountered during earthmoving activities, and the procedures to be followed in such an event. No resources were identified during the monitoring effort and these findings were summarized in a report that was submitted to Los Angeles World Airports. Kyle served as project director/manager, crew chief, monitor, and co-author of the final report.

University High School Beautification Project, Los Angeles, CA. *Archaeologist*. Kyle performed archaeological monitoring during earth-moving activities on the campus. The archaeological monitoring program ensured the protection of the village site and springs, and resulted in the discovery of remains of the original portico of the Administration Building which was destroyed by the Long Beach Earthquake of 1933.

Rancho Campana High School and Performing Arts Center Construction Monitoring, Camarillo, CA. *Project Manager*. Kyle led the archaeological and paleontological monitoring for the project as a part of ESA's on-call contract with Oxnard Union High School. He managed and coordinated the effort and prepared the associated report. ESA identified two archaeological resources (56-001512/CA-VEN-1512 and 56-001513/CA-VEN-1513H) during monitoring efforts and several paleontological localities during the monitoring and sediment screening activities and worked together with the Ventureño Chumash regarding treatment for the archaeological resources. Although several archaeological and paleontological resources were encountered during the construction monitoring efforts, the resources were treated in accordance with the mitigation measures and, as a result, the impacts to the resources were reduced to a less than significant level pursuant to the CEQA.

Citron (Stella Park) Townhome Development, Escondido, CA: *Project Manager.* Kyle served as the project manager responsible for overseeing the archaeological and Native American monitoring at the project in accordance with the Conditions of Approval. The project included the construction of a 65-unit townhome development on a vacant 2.29-acre site in the City of Escondido.

Archaeological Monitoring, Test Excavations, and Data Recovery Excavations During Construction of the Crystal Geyser Roxane Cabin Bar Ranch Water Bottling Facility, Olancha, Inyo County, CA. *Principal Investigator/Project Director/Manager/Crew Chief.* Kyle managed/directed archaeological construction monitoring services in accordance with the Cultural Resources mitigation measures in the Mitigation Monitoring and Reporting Program (MMRP) of the EIR for the project. During initial clearing and grubbing activities associated with the project, five prehistoric archeological resources were encountered. Kyle assisted the Applicant in developing a cultural resources treatment plan to address identify, evaluate, and mitigate project impacts to these resources to a less than significant level. Pursuant to the MMRP, this treatment plan was developed in coordination with ESA (Kyle), the County, CG Roxane, and the Lone-Pine Pauite-Shoshone Reservation. The treatment plan included measures for resource avoidance, additional survey, and the excavation of nine controlled excavation units and multiple mechanical backhoe trenches across the project site. More than a 1,000 artifacts have been recovered from this project. This project began in 2015 and continues today.

Dr. J.D. Stewart has more than 40 years' experience in the field of paleontology, with 30 years' experience in California. He has authored or co-authored 40 peer-reviewed articles for scientific journals and books. Within these, he has authored or co-authored descriptions of three new genera and three new species.

He is a recognized authority on fossil fishes of Cretaceous rocks of North America and Cenozoic rocks of the western coast of North America. As a result, Dr. Stewart is often called upon to identify paleontological and archaeological specimens. He has served as expert witness for the U.S. Department of Justice.

Dr. Stewart has extensive experience finding and excavating fossils for county, state, and provincial institutions. His field work includes projects in cooperation with the U.S. Bureau of Land Management, National Parks Service, U.S. Army Corps of Engineers, U.S. Navy, U. S. Department of Energy, Federal Aviation Administration, California Energy Commission, Caltrans, and California State Parks. The Bureau of Land Management's national website features one of his excavations from 2004. He has supervised monitoring of construction activity in numerous California counties and municipalities. In addition to fieldwork, he has experience in the supervision of preparators, surveyors, curatorial assistants, and excavators. He also has extensive experience preparing fossils, and has processed, recovered, and identified thousands of microvertebrate fossils.

Relevant Experience

Salton Sea Mitigation Implementation Plan, Riverside and Imperial Counties, CA. *Paleontologist.* ESA prepared an adaptive management and monitoring plan for the Salton Sea basin for the Salton Sea Management Program, which is a partnership between the California Natural Resources Agency, DWR, and CDFW. The monitoring plan will prioritize and guide monitoring for biological resources, including avian species, fish and invertebrates, as well as water quality, hydrology, air quality, and socioeconomics. The monitoring plan will inform status and trends of resources, as well as the implementation of future habitat and dust suppression projects. JD compiled the paleontological resource mitigation and monitoring plan and prepared the team for monitoring.

California Water Service Company, Palos Verdes Peninsula Water Reliability Project, Rolling Hills Estates, CA. Paleontologist. ESA provided a full suite of environmental services for the Palos Verdes Peninsula Water Reliability project. The proposed project involves the construction of approximately seven miles of buried potable water pipelines and a new booster pump station to replace the current water distribution system serving the Palos Verdes Peninsula. The large 7-mile utility/infrastructure project, which crossed multiple jurisdictions, including the cities of Rolling Hills Estates and Rancho Palos Verdes, and the County of Los Angeles. JD oversaw paleontological monitoring for reaches 3 and 4 and the pump station, coordinating finds, identifying fossils, and processing the fossils at the lab.

J.D. Stewart, Ph.D. (Continued)

Principal Paleontologist

Syphon Reservoir Geotechnical Investigations Project IS/MND, Orange County, CA. *Principal Paleontologist.* IRWD implemented the Geotechnical Investigations Project to characterize the geologic and geotechnical conditions of the Syphon Reservoir site to support the potential development of a future reservoir expansion. The Project included a combination of exploratory test pits, borings, and geophysical surveys to characterize the subsurface conditions of the soil at the Syphon Reservoir site and verified the characteristics of the Center Valley Fault. ESA provided extensive biological surveys and cultural surveys, assisted IRWD with AB 52 process for Tribal consultation. Dr. Stewart supervised paleontological monitoring during geotechnical explorations (including borings, exploratory test pits, and abutment/seismic trenches) at the Syphon Reservoir, as the project is located within geologic formations (Silverado and Sespe/Vaqueros) that have a high paleontological potential for yielding paleontological resources. Sediment sampling was conducted to identify the presence/absence of microvertebrate fossils.

Goetz Road Potable Water Storage Tank and Pipeline Project EIR, Riverside, CA. *Paleontologist.* ESA prepared an EIR and conducted supporting biological, archaeological, and paleontological surveys, as well as prepared visual simulations and a shade and shadow report for the Goetz Road Potable Water Storage Tank and Pipeline project. The project would involve construction and operation of an 8-million-gallon potable water storage tank in the City of Perris. JD led the paleontology survey.

City of Menifee, On-Call Consulting and Peer Review Services, Menifee, CA. *Paleontologist.* For 5 years, ESA has provided on-call peer reviews of more than 30 applicant-prepared cultural resources technical reports. ESA has become a trusted advisor to the City. JD has provided peer review of paleontology sections and reports for the City.

Rosedale-Rio Bravo Water Storage District, Onyx Ranch South Fork Valley Water Project EIR, Kern County, CA. *Paleontologist.* ESA prepared the EIR and associated technical studies to support the Onyx Ranch South Fork Valley Water Project. RRBWSD proposes to change the point of diversion and place of use for the water rights associated with Onyx Ranch and Smith Ranch on the South Fork of the Kern River. The intent of the project is to allow water to be delivered in the RRBWSD service area on the San Joaquin Valley floor and used for irrigation and groundwater recharge. The proposed project would assist the RRBWSD in meeting its sustainability goals under the Sustainable Groundwater Management Act. JD prepared the paleontology report to support the CEQA section.

Guild GC, 8777 Washington Boulevard MND, Culver City, CA. *Paleontologist.* ESA prepared an MND to address the proposed redevelopment of an approximately 1-acre property at 8777 Washington Boulevard north of the intersection at Washington Boulevard and National Boulevard in Culver City. The project is proposing a four-story building up to 56 feet. The project is proposing approximately 128,000 square feet of office space on Levels 2 through 4 and 4,500 square feet of retail/food retail on the ground level. JD provided monitoring oversight, oversaw fossil discovery, and processed fossil samples.

I-805 Managed Lanes South Project, Caltrans District 11, San Diego County, CA. *Paleontologist.* Dr. Stewart supervised the pedestrian survey of the project footprint and wrote the Paleontological Resource Assessment.

I-805 North Corridor Project, Caltrans District 11, San Diego County, CA. *Paleontologist.* Dr. Stewart supervised the pedestrian survey of the project footprint and wrote the Paleontological Resource Assessment.

Crestavilla Retirement and Assisted Living Community Project, Laguna Niguel, CA. *Principal Paleontologist.* Dr. Stewart supervised paleontological monitoring during the construction of a new 224-unit retirement and assisted living facility and an approximately 1,870 square-foot Spiritual Resource Center (Shepherd of the Hills Church) within a four-story structure located over a one-level subterranean parking structure. The monitoring led to the identification of a

remarkable collection of vertebrate fossils, including the first record of a gulper shark (*Centrophorus*) from any Neogene sediments of coastal California and the first reported specimens of the cookie-cutter shark (*Isistius*) from the Capistrano Formation. Additionally, the project yielded the most complete fossil tuna ever found in California and it probably represents a species new to science.

Palos Verdes Peninsula Water Reliability Project, Palos Verdes Peninsula, CA. *Principal Paleontologist.* Dr. Stewart supervised paleontological monitoring during construction of new potable water pipelines and a new booster pump station to replace the current water distribution system serving the Palos Verdes Peninsula. The monitoring led to the identification and salvage of numerous fossils from Altamira Shale deposits of the Monterey Formation, including fossils of leaf imprints, sardine scales, fish parts (vertebrae, dentary, mandible) and the fossil appendage (dactyl) of a type of Mantis shrimp (Stomatopod). The Mantis shrimp specimen is believed to be the only second known occurrence in southern California of *Angelosquilla altamierensis*, and the only one with a known precise locality and provenience.

Oaks at Monte Nido, Santa Monica Mountains, Unincorporated Los Angeles County, CA. *Principal Paleontologist.* Dr. Stewart was in charge of the preparation of the Paleontological Resources Assessment Report, which included a pedestrian survey. The pedestrian survey yielded the identification of a sandstone boulder that contains a fossil impression of the skull of a small-toothed cetacean “dolphin” and the identification of fossilized shells of pelecypods (e.g., bivalves such as clams, mussels, oysters, and cockles) and gastropods (e.g., snails and slugs). The project proposes the development of 15 single-family residences on separate individual recorded parcels within the Monte Nido Community, along the scenic route of Piuma Road.

Heritage Fields/Great Park Paleontological Review, Orange County, CA. *Principal Paleontologist.* Dr. Stewart conducted Phase I and II paleontological assessments at the Heritage Fields / Great Park in Orange County, California where he and his team discovered significant portions of a Miocene-aged (15 million years ago) whale fossil, and a Pleistocene microvertebrate fauna dating to before 28,000 years ago.

Calnev Pipeline Project, San Bernardino County, CA, and Clark County, NV. *Principal Paleontologist.* Dr. Stewart directed paleontological survey of a 234-mile-long project area in San Bernardino County, California and Clark County, Nevada and wrote the paleontological assessment.

Fatima Clark

Archaeologist

EDUCATION

BA, Anthropology, California State University, Fullerton

16 YEARS' EXPERIENCE

CERTIFICATIONS/ REGISTRATION

Orange County Certified Archaeologist

HAZWOPER Certified

PROFESSIONAL AFFILIATIONS

Society for California Archaeology

Fatima has 16 years of hands-on archaeological experience and is practiced in project management and client and agency coordination. Her field experience is complimented by the course study and participation in numerous archaeological excavations in California, Arizona, and Peru. Fatima has written California Environmental Quality Act (CEQA)-level technical reports, Environmental Impact Report (EIR) sections, Initial Study sections, archaeological peer reviews, archaeological monitoring reports, and reports pursuant to California Department of Transportation (Caltrans) requirements. She is also experienced in performing archaeological testing, site recordation, laboratory analysis, pedestrian surveys, records searches through several California Historical Resources Information Systems-Information Centers, and monitoring for a wide variety of projects, including mixed-use, residential, and energy, water, and road infrastructure projects. In addition to her archaeology background, Fatima has been cross-trained in conducting paleontological surveys and monitoring and has co-authored and managed associated reports.

Relevant Experience

Los Angeles Department of Water and Power, Fort Independence Travel Plaza Power Project, Independence (Owens Valley), CA. *Project Manager*. Fatima is in the process of preparing the cultural resources assessment in compliance with NEPA, Section 106, and CEQA. LADWP proposes to install 13 new temporary poles, one (1) anchor, and replace one (1) existing pole for a 34.5 kV line extension to provide power during construction of a new Travel Center at 141 N. Highway 395 in Fort Independence, Inyo County, California.

Landify ECT Corporation, Lower Sweetwater Park Project, City of Chula Vista, CA. *Project Manager*. Fatima has prepared a cultural resources assessment in compliance with CEQA. The Project proposes to redevelop the existing 21.3 acre Project Site with sports facilities within the City of Chula Vista.

County of Los Angeles, Department of Public Works, Whittier Boulevard Underground Utility Project, Los Angeles County, CA. *Project Co-Manager.* Fatima prepared the cultural resources assessment in support of a Class 2 Categorical Exemption. The project consists of the removal of utility poles and overhead lines, and the excavation for underground utility lines along Whittier Boulevard right-of-way. One historical resource, the early-to-mid 20th century Los Angeles Railway (or Yellow Cars), was identified in the project area as a result of archival research and geotechnical investigations. Fatima also managed the archaeological monitoring of construction activities and prepared the monitoring report.

City of Carson, Avocet Energy Storage System Project, City of Carson, CA. *Archaeologist.* Fatima managed the preparation of the archaeological and paleontological resources assessment reports in compliance with CEQA. The proposed Project includes the development of an approximately 200-megawatt battery energy storage system on a

6.96-acre site (BESS site), improvements and upgrades to the existing SCE Hinson Substation (SCE Hinson Substation site), the construction of a gen-tie line to connect to substation to the BESS site (proposed gen-tie line route), and other associated improvements. The proposed gen-tie route would cross three jurisdictions including: the City of Carson, the City of Los Angeles, and the City of Long Beach.

Storm Properties, Inc. Storm Hill Lane Project, Rolling Hills, CA. *Project Manager.* Fatima managed the day-to-day coordination for the monitoring and preparation of the archaeological/paleontological monitoring report pursuant to CEQA. As a result of the monitoring, several fossils were identified and these are currently being analyzed. The Project requires the reconstruction and expansion of Storm Hill Lane from the currently addressed and developed lot at 4 Storm Hill Lane to the three undeveloped lots.

Kiewit Infrastructure West Co., Ballona Wetlands Sequence 1 & 2 Restoration, Culver City, CA. *Project Manager.* Fatima managed the coordination for the monitoring with the archaeological and biological monitors, as well as coordination with the client. ESA's monitors were present during trenching and grading within portions of Ballona Creek in Culver City.

Southern California Association of Governments (SCAG) 2024 Connect SoCal Program PEIR, Los Angeles, Riverside, San Bernardino, Orange, Imperial and Ventura, CA. *Deputy Project Manager.* Fatima led the preparation of the PEIR Sections (cultural, paleontological, and tribal resources), as well as coordinated the Native American consultation efforts. Connect SoCal 2024 is a long-range comprehensive plan for the region's multi-modal transportation system. Preparing the Plan is one of SCAG's primary statutory responsibilities under federal and state law. A regional transportation plan (RTP) is the mechanism used in California by both metropolitan planning organizations and regional transportation planning agencies to conduct long-range (at least 20-year) planning in their regions. SCAG must adopt an RTP and update it every four years, or more frequently, if the region is to receive federal and state transportation dollars for public transit, streets/roads, and bicycle and pedestrian improvements.

Culver City, Crossings Campus (Culver City & City of Los Angeles, CA). *Deputy Project Manager.* Fatima led the preparation of the archaeological resources report and coordinated the preparation of the paleontological resources report. Fatima also led the preparation of the EIR sections (cultural, paleo, tribal). Culver Crossings Properties LLC, the Applicant, proposes to develop an office project (Project) on an approximately 4.46-acre site (Project Site) comprised of two properties: one 1.63-acre parcel is located in the City of Culver City (City), while the second 2.83-acre parcel is located in the City of Los Angeles.

County of San Diego Department of Parks and Recreation, Sweetwater Campground Geotech Boring Monitoring, San Diego County, CA. *Project Co- Manager.* Fatima co-managed the archaeological monitoring and coordinated with Red Tail for Native American monitoring and the County of San Diego Department of Parks and Recreation during Geotech borings for the Project.

Los Angeles County Department of Regional Planning, East San Gabriel Valley Area Plan (ESGVAP) Program EIR, Eastern Portion of Los Angeles County, CA. *Deputy Project Manager.* Fatima managed the preparation of the PEIR Sections (cultural, paleontological, and tribal resources). The ESGVAP is part of the Los Angeles County 2035 General Plan, which will require an amendment. The ESGVAP is a long-range policy document developed to guide long-term growth of the area through development of a guiding vision, goals, policies, and implementation actions for the unincorporated communities in the East San Gabriel Valley. The ESGVAP's planning area consists of 24 unincorporated islands and communities and encompasses a total land area of 210.5 square miles.

Fatima Clark (Continued)

Archaeologist

Los Angeles County Department of Regional Planning, Los Angeles County 2045 Climate Action Plan (CAP) Update and PEIR, Los Angeles County, CA. *Deputy Project Manager.* Fatima managed the preparation of the PEIR Sections (cultural, paleontological, and tribal resources). The County adopted the *Unincorporated Los Angeles County Community Climate Action Plan 2020* (2020 CCAP) in 2015 as a component of the Air Quality Element of the General Plan. The 2020 CCAP aligned with General Plan goals, policies, and programs, as well as several other existing programs in Los Angeles County. The 2020 CCAP was the first attempt to set greenhouse gas (GHG) emissions reduction goals in Los Angeles County. Although the targets for the 2020 CCAP were ultimately not fully met, the plan provided a road map for implementing the County's GHG reduction measures. The 2020 CCAP actions were implemented through County Code amendments and programs related to climate action. The Draft 2045 CAP builds on previous work and defines new reduction targets beyond the year 2020.

Eastern Municipal Water District, San Jacinto Valley Groundwater Treatment Facility Project, San Jacinto, CA. *Archaeologist.* Fatima assisted with the Phase II archaeological testing for the Project. The site was the location of the region's first trading post/general store, established ca. 1868. It later became the Palma Hotel, constructed by Henry T. Hewitt. The hotel was also used as a Riverside County hospital before it was destroyed in an earthquake in 1899.

San Manuel Band of Mission Indians, Sand Canyon Flood Control Permitting Project, San Bernardino County, CA. *Archaeologist.* Fatima was in charge of preparing the cultural resources assessment in compliance with Section 106. Fatima also conducted the pedestrian survey. The San Manuel Band of Mission Indians is considering taking over operation and maintenance of a concrete-lined channel and debris basin (known as Sand Creek) along Sand Canyon, within unincorporated San Bernardino County.

City of Long Beach, 615 E. Ocean Boulevard Project, Long Beach, CA. *Deputy Project Manager.* Fatima led the preparation of the cultural and paleontological resources reports in support of an addendum to the Certified City of Long Beach Downtown Plan Program Environmental Impact Report. The Project would develop a 21-story high-rise residential building on an approximately 0.4-acre site located at 615 East Ocean Boulevard within the City's limits (Project site).

City of Long Beach Department of Development Services, Planning Bureau, 7250 Carson Street Project, City of Long Beach, CA. *Deputy Project Manager.* Fatima led the preparation of the cultural and paleontological resources reports in compliance with CEQA. The Project Applicant proposes to subdivide a 20-acre parcel into two parcels (Parcel A and Parcel B). Other than the approval of the tentative parcel map to subdivide the existing parcel, no proposed improvements or development for Parcel A are included as part of the Project. Development of Parcel B (Project Site) would include the development of two fast-food restaurants and parking spaces.

City of Diamond Bar, Crooked Creek Residential Subdivision Project, Los Angeles County, CA. *Archaeologist.* Fatima conducted the archaeological and paleontological resources assessments in compliance with CEQA and the City of Diamond Bar General Plan Policy RC-P-42. The studies included records searches, pedestrian survey, and subsurface sensitivity assessments. No cultural resources were identified in the project site, but the area was found to have the potential to contain subsurface prehistoric archaeological resources and paleontological resources. The project consisted of the development of seven single-family residences and associated infrastructure on approximately 2.5 acres. The project required approval of a Vesting Tentative Tract Map, Conditional Use Permit, Tree Permit, and Development Review.

1.0 SUMMARY

This report presents the results of a Phase I Environmental Site Assessment (ESA) at a property located at 10950 Washington Boulevard in Culver City, California (the Subject Property) prepared by Northgate Environmental Management, Inc. (Northgate) for Hudson Pacific Properties. The Subject Property consists of approximately 5.8-acres of land with commercial development including an office building, a parking garage, and a commercial building with a sound stage. The Subject Property is situated on a parcel identified as Assessor's Parcel Numbers (APNs) 4208-025-018, 4208-024-001, 4208-024-002, and 4208-024-018 in Los Angeles County. A Subject Property Vicinity Map is shown on Figure 1 and a Subject Property Plan is shown on Figure 2.

Available historical information indicates that the Subject Property was undeveloped from at least 1894 until the mid-1920's when a commercial restaurant and dance hall with a surface parking lot and a transformer were present in the north-central portion of the Subject Property. A residential dwelling with a detached garage was present in the south-central portion of the Subject Property by 1929. The restaurant and dance hall expanded by 1949 and a sound stage was also present in this area at this time. By 1964, the Subject Property was developed with a large commercial structure in the northwestern portion of the Subject Property with surface parking occupying the central and southern portions of the Subject Property and vacant land in the southeastern portion of the Subject Property. Among the occupants of the commercial structure was Hamilton-Avent Electronics, which was an electronics manufacturer. Information obtained regarding this occupant indicated that they utilized chlorinated and halogenated solvents, and were a small quantity generator of hazardous waste from 1990 until 1997. Records reviewed from the South Coast Air Quality Management District (SCAQMD) included permits for a 280-gallon chlorinated hydrocarbon storage tank and degreaser in 1982. The Subject Property has remained in this configuration to the present. At the time of the reconnaissance for this Phase I ESA in 2023, the commercial development was vacant.

Land use in the vicinity of the Subject Property has historically included sparsely populated residential development, until at least the late 1930's when commercial and industrial developments begin to appear in the region surrounding the Subject Property. From 1947 onward, residential developments expanded throughout the region, with commercial and industrial developments scattered across the region and fronting Washington Boulevard. A large parcel just east of the Subject Property contained an aggregate yard and office complex from the late 1920's until it began to be replaced by a housing development in the late 1970s. The configuration of large residential developments with commercial/industrial development scattered throughout has remained to this day.

The Subject Property is listed on the Hazardous Waste Tracking System (HWTS), the Facility and Manifest Data (HAZNET), the Resource Conservation Recovery Act (RCRA) Small Quantity Generator (SQG), and California Environmental Reporting System (CERS) regulatory agency databases related to the use, storage, or release of hazardous materials by onsite tenants. It is listed for the disposal of oxygenated and halogenated solvents in the mid to late 1980's; organic aqueous solutions and latex waste in the late 1990s; and unspecified solvents, polymeric resin waste, acid liquids, liquids with halogenated organic compounds, and photochemical & photo processing waste throughout the 1990's. Additionally, a permit for the removal of a 10,000-gallon storage tank containing gasoline was provided by Culver City on July 18, 1983. No further information was available on the permit nor was any information available to indicate if this was an aboveground or underground storage tank. No tank closure documentation was available.

In summary, Northgate has performed a Phase I ESA of a property located at 10950 Washington Boulevard in Culver City, California in conformance with the scope and limitations of ASTM Practice E 1527-21, which was adopted as the new standard by the EPA on February 13, 2023, and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). Any exceptions to, or deletions from, these practices are described in Section 2.3 of this report. This assessment did not reveal any Recognized Environmental Conditions (RECS) associated with the Subject Property.

The assessment did not reveal any Historic RECs (HRECs) or Controlled RECs (CRECs) associated with the Subject Property. However, the following Business Environmental Risks (BERs) were identified:

- A permit for the removal of a 10,000-gallon storage tank containing gasoline was provided by Culver City on July 18, 1983 (Appendix C). No further information was available on the permit. Given that it is unknown whether this was an above or below ground storage tank and considering that no tank closure documentation could be reviewed, the potential for subsurface contamination at the Subject Property cannot be ruled out.
- Records indicate the Subject Property was permitted for a 280-gallon chlorinated and halogenated hydrocarbon storage tank and degreaser in 1982. While no further information regarding this tank or degreaser was provided, the use and storage of chlorinated and halogenated materials onsite during that time period is potential concern.
- Based on the age of the commercial structure, we suspect asbestos containing material (ACM) and lead based paint (LBP) are present in building materials within the structure. This is being evaluated by another consultant.

2.0 INTRODUCTION

This report presents the results of a Phase I ESA of a property located at 10950 Washington Boulevard in Culver City, California. The Subject Property consists of approximately 5.8-acres of land with commercial development including an office building, a parking garage, and a commercial building with a sound stage. The Subject Property is situated on a parcel identified as APNs 4208-025-018, 4208-024-001, 4208-024-002, and 4208-024-018 in Los Angeles County. A Subject Property Vicinity Map is shown on Figure 1 and a Subject Property Plan is shown on Figure 2.

2.1 Purpose

The purpose of Phase I ESA has been to identify and evaluate the presence of RECs at the Subject Property. The term "REC" means *(1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment*. The term is not intended to include *de minimus* conditions that generally do not present a threat to human health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Scope of Services

Northgate has performed this Phase I ESA in general conformance with the scope and limitations of ASTM E-1527-21, *Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and 40 Code of Federal Regulations (CFR) Part 312, *Standards and Practices for All Appropriate Inquiry – Final Rule*, which was adopted as the new standard by the EPA on February 13, 2023. This investigation was conducted by Environmental Professional Jacob Lacy, with review from Nicky Robinson, PE, QSD/P, Senior Engineer and Derrick Willis, Northgate Principal. The scope of work for the investigation included the following services:

- Review of readily available information regarding the history of the Subject Property, including historic aerial photographs, maps, previous reports, and other information, and discussions with individuals familiar with the Subject Property;
- A reconnaissance of the Subject Property and near vicinity;

- Review of regulatory agency files for the Subject Property and surrounding area, as applicable;
- Interview with the Subject property owner, tenants, and others as appropriate regarding land use at the Subject property;
- Evaluation of potential RECs, development of conclusions and recommendations as appropriate; and
- Preparation of this report.

2.3 Limitations and Exceptions

2.3.1 Limitations

The purpose of an environmental assessment is to reasonably evaluate the potential for RECs arising from past practices on a given site area. In performing an environmental assessment, it is understood that a balance must be struck between a reasonable inquiry into the environmental issues and an exhaustive analysis of each conceivable issue of potential concern. No investigation is thorough enough to absolutely rule out the presence of hazardous materials at a given site. If hazardous conditions have not been identified during the assessment, such a finding should not be construed as a guarantee of the absence of such materials on the Subject Property, but rather as the result of the services performed within the scope, limitations, and cost of the work performed.

Environmental conditions may exist at the Subject Property that cannot be identified by visual observation. Where subsurface work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at un-sampled locations.

Except where there is express concern of Northgate's client, or where specific environmental contaminants have been previously reported by others, naturally occurring toxic substances, potential environmental contaminants inside buildings, or contaminant concentrations that are not of current environmental concern may not be reflected in this document.

Where the scope of services is limited to interview and/or review of readily available reports and literature, any conclusions and/or recommendations are necessarily based largely on information supplied by others, the accuracy or sufficiency of which may not be independently reviewed by Northgate.

Any opinions and/or recommendations presented apply to Subject Property conditions existing at the time of performance of services. Northgate is unable to report on, or accurately predict,

generally unforeseeable events that may impact the Subject Property following performance of services, whether occurring naturally or caused by external forces. Therefore, Northgate cannot assume responsibility for such events or their impact. Northgate also cannot assume responsibility for changes in environmental standards, practices, or regulations.

2.3.2 Exceptions

The time intervals between some historical information sources may exceed five years due to the unavailability of such records. However, in Northgate's opinion, this data gap does not significantly impact our ability to evaluate historic land use conditions at the Subject Property given the availability of other sources for this information.

At the time this report was prepared, no response had yet been received from the Los Angeles County Department of Public Works, and the Los Angeles County Fire Department. Northgate will issue an addendum to this report if any public records received from these agencies within 90 days of the date of this report significantly changes the conclusions or recommendations of this report.

There were no other limiting conditions.

2.4 Phase I ESA Report Shelf Life

As defined in the ASTM Standard, a Phase I ESA report remains viable if it was completed no more than 180 days prior to the date of acquisitions or up to one year if the Phase I ESA Report have been updated including the following five components: 1) Interviews; 2) Searches for recorded environmental cleanup liens; 3) Review of government records; 4) Reconnaissance of the Subject Property and adjoining properties; and 5) Environmental Professional Declaration.

The shelf-life date begins with the date upon which the first of these components was completed. The table below summarizes the date of completion of these components of this Phase I ESA report, with the report shelf life initiating from the earliest of the dates provided below.

Report Component	Date
Interviews	December 1, 2023
Searches for recorded environmental cleanup liens	December 7, 2023
Review of government records	
Government records requests	November 21, 2023
Aerial photographs	December 8, 2023
Sanborn maps	December 11, 2023

Report Component	Date
Historic topographic maps	December 7, 2023
City directories	December 7, 2023
Subject Property reconnaissance	December 1, 2023
Environmental Professional Declaration	December 12, 2023

2.5 User Reliance

This report has been prepared for the exclusive use of Hudson Pacific Properties and its subsidiaries, affiliates, partners, and lenders (collectively the Users) in evaluating environmental conditions at the Subject Property. Others may not use or rely on the information contained in this report without the express written consent of Northgate.

3.0 USER PROVIDED INFORMATION

3.1 Environmental Liens or Activity and Use Limitations

An environmental lien and activity and use limitation (AUL) search was conducted for the Subject Property by Environmental Data Resources (EDR). EDR's review indicates that there are no environmental liens or AULs of record for this parcel of the Subject Property. A copy of the Environmental Lien and AUL Search is included in Appendix A (EDR, 2023a). The Subject Property is not listed on the Federal NPL LIENS database.

3.2 Valuation Reduction for Environmental Issues

Northgate has not been provided with any information that indicates that the value of the property does not reasonably reflect the fair market value of the property.

3.3 Owner, Property Manager, and Occupant Information

Information provided for the Subject Property by EDR in the Environmental Lien and AUL Search indicates that the title to the Subject Property is vested in Hudson 10950 Washington, LLC as of 2010. The Subject Property is currently developed with a commercial development including an office building, a parking garage, and a commercial building with a sound stage.

3.4 Specialized Knowledge

Northgate was not provided any information related to specialized knowledge of the Subject Property. The User provided Northgate with a copy of a previous Phase I ESA, which was reviewed and summarized in Section 6.7.

3.5 Reason for Performing the Phase I ESA

The purpose of this investigation is to assist in evaluating environmental conditions at the Subject Property for general informational purposes.

4.0 SUBJECT PROPETY RECONNAISSANCE

Current Subject Property conditions were observed during a reconnaissance of the Subject Property and near vicinity performed by Mr. Ricardo Munoz, Project Geologist of Northgate on December 1, 2023. Photographs from the reconnaissance are attached at the end of this report.

4.1 Methodology and Limiting Conditions

The Subject Property reconnaissance was performed by traversing the Subject Property and general area on foot. There were no access issues or limiting conditions encountered during the reconnaissance of the Subject Property.

4.2 Subject Property Conditions

4.2.1 Current Use of the Subject Property

The Subject Property is currently developed with a commercial development including an office building, a parking structure, and a commercial building with a sound stage. At the time of the reconnaissance the commercial development was vacant.

4.2.2 Description of Structures, Roads, Sewage, and Potable Water Sources

The Subject Property is occupied by three commercial buildings, a parking structure, and paved parking. The eastern commercial building is utilized as offices and as a television studio The central commercial building is utilized as offices, a battery room, a server room, cafeteria, and television studio. The western commercial building is utilized as offices, television studio, two hydraulic powered elevators, and is attached to a parking structure. The structures were vacant and unoccupied at the time of the reconnaissance.

The Subject Property is bordered to the north by Washington Boulevard, to the east by commercial buildings, residences and Elenda Street, to the south by residences, and to the west by a religious center and residences. Access to the Subject Property is available from driveways from Washington Boulevard and Elenda Street. It appears that potable water service is provided by the City of Los Angeles Department of Water and Power and sewer service is likely provided by the Los Angeles County Public Works.

4.2.3 Inspection Observations

- ***Hazardous Substances and Petroleum Products in Connection with Identified Uses***

No hazardous substances or petroleum products in connection with identified uses were observed during the inspection of the Subject Property.

- ***Storage Tanks***

No evidence of underground storage tanks (USTs) or other storage tanks was observed during the inspection of the Subject Property. Two concrete pads were noted in the eastern portion of the Subject Property that were previously occupied by diesel powered backup generators. No staining or indications of a release were observed during the inspection of these features.

- ***Strong, Pungent, or Obnoxious Odors***

No strong, pungent, or obnoxious odors were observed during the inspection of the Subject Property.

- ***Standing Surface Water, Pools, or Sumps Containing Liquids***

No standing surface water, pools, or sumps containing liquids were observed during the inspection of the Subject Property.

- ***Drums, Totes, and Bulk Containers***

No drums, totes, or bulk containers were observed during the inspection of the Subject Property.

- ***Hazardous Substances and Petroleum Product Containers Not in Connection with Identified Uses***

No hazardous substances or petroleum products not in connection with identified uses were observed during the inspection of the Subject Property.

- ***Unidentified Substance Containers***

No unidentified substance containers were observed during the inspection of the Subject Property.

- ***PCB-Containing Items***

No polychlorinated biphenyl-containing equipment was identified during the inspection of the Subject Property.

- ***Heating / Cooling***

Heating, ventilation, and air conditioning (HVAC) equipment is present at the Subject Property on the roof of each building. The building located on the western portion of the Subject Property maintained a chiller tower on the roof that utilizes refrigerants. No indications of corrosion, leaks, or spills were observed in relation to these features.

- ***Stains or Corrosion on Floors, Walls, or Ceilings***

Stains or corrosion on floors, walls, or ceilings were not observed during the inspection of the Subject Property.

- ***Drains and Sumps***

Several drains were also observed within the structures of the Subject Property including drains located within kitchen and cooking areas and within the restrooms. Several drains were also observed in the exterior portions of the Subject Property including stormwater drains where surface water tends to accumulate.

- ***Pits, Ponds, or Lagoons***

No pits, ponds, or lagoons were observed during the inspection of the Subject Property.

- ***Stained Soil or Pavement***

De minimus staining was noted throughout the parking structure of the Subject Property. No stained soil was observed during the inspection of the Subject Property.

- ***Stressed Vegetation***

No stressed vegetation was observed during the inspection of the Subject Property.

- ***Solid Waste***

A solid waste area was located in the eastern portion of the Subject Property. The solid waste area maintained a hydraulic powered carboard compactor and three trash bins. No indications of a release were observed in relation to these features.

- ***Water / Wastewater***

No water or wastewater was observed on the ground during the inspection of the Subject Property.

- ***Wells***

No wells were observed during the inspection of the Subject Property.

- ***Septic Systems or Cesspools***

No septic systems or cesspools were observed during the inspection of the Subject Property.

4.3 Current Uses of Adjoining Properties

The Subject Property is located in an area of mixed commercial and residential development in urban Los Angeles. The Subject Property is bordered to the north by Washington Boulevard, followed by an elementary school, a senior living center, and retail shops and then residences. To the east, the Subject Property is bordered by a residence, a commercial building, and Elenda

Street followed by residences and retail shops and restaurants. The Subject Property is bordered to the south by residential development. The Subject Property is bordered on the west by a religious center and residential development followed by residences and commercial buildings.

4.4 Subject Property Reconnaissance Summary

In summary, Northgate's reconnaissance of the Subject Property did not indicate the presence of conditions indicating the past use, storage, or release of hazardous materials at the Subject Property.

5.0 SUBJECT PROPERTY PHYSICAL SETTING

5.1 Subject Property Location and Legal Description

The Subject Property is located southeast of Washington Boulevard, in Culver City, California. The Subject Property consists of four parcels totaling approximately 5.8-acres identified as APN 4208-025-018 , 4208-024-001, 4208-024-002, and 4208-024-018 in Los Angeles County. A Subject Property Vicinity Map is shown on Figure 1 and a Subject Property Plan is shown on Figure 2.

5.2 Subject Property Vicinity General Characteristics

The Subject Property is currently developed with a commercial development including an office building, a parking garage, and a commercial building with a sound stage. The Subject Property is locally bordered on the north by commercial and residential developments, on the east by commercial and residential development, to the south by residential developments, and to the west by a commercial and residential developments, and Washington Boulevard. The Subject Property is located in an area that consists of residential and commercial development.

5.3 Geology and Groundwater

5.3.1 Geology

The Subject Property is located near the northwestern margin of the physiographic area known as the Los Angeles basin or coastal plain. The Los Angeles basin consists of a northwest-trending alluviated lowland plain about 50 miles long and 20 miles wide on the coast of southern California (Yerkes et al., 1965). The Los Angeles Basin is bounded on two sides by major faults (Palos Verdes fault to the south and San Gabriel-Foothill fault to the north). The Los Angeles Basin is bounded to the east and southeast by the Santa Ana Mountains and San Joaquin Hills, and to the northwest by the Santa Monica Mountains. Erosion of the surrounding mountains has resulted in deposition of alluvial materials in low-lying areas by the Los Angeles River and in the Culver City area, the Ballona Creek (Psomas, 2017).

The Subject Property is located within the Peninsular Ranges Geomorphic Province which is characterized by northwest-trending blocks of mountain ridges and sediment-floored valleys. The dominant geologic structure features are northwest-trending fault zones that either fade out to the northwest or terminate at east-trending faults that form the southern margin of the Transverse Ranges. The Subject Property is located approximately 0.2 miles west of the buried Overland Avenue fault (no evidence of surface displacement since the Late Quaternary and considered potentially active) and approximately 2 miles west of the Newport-Inglewood fault

zone (evidence of surface displacement since the Holocene and considered active). The nearby Newport-Inglewood fault zone intersects the Baldwin Hills and is identified as the Inglewood Oil Field, an area with extensive oil and gas exploration located approximately 1.3 miles southeast of the Subject Property (Psomas, 2017).

The Subject Property is situated over Quaternary alluvium consisting of sand and silt-clay derived from nearby Santa Monica Mountains and stream channel deposits (Dibblee, 1991). Below the unconsolidated alluvium are several thousand feet of marine and non-marine sedimentary deposits subdivided into the Lakewood, San Pedro, Inglewood, and Pico Formations (Psomas, 2017).

5.3.2 Groundwater

The Subject Property is located within the Coastal Plain of Los Angeles Groundwater Basin, Santa Monica Subbasin. The Newport-Inglewood fault forms the eastern boundary for the subbasin and appears to restrict the movement of groundwater between the Baldwin Hills and about one-half mile south of Santa Monica Blvd. The Overland Avenue fault in the Ballona gap also appears to restrict groundwater movement, because groundwater levels on the east side of the fault are much higher than on the west side. Groundwater replenishment is mainly from percolation of precipitation and surface runoff from the Santa Monica Mountains (DWR, 2004).

Information related to groundwater depth or quality at the Subject Property was not available for review. Historical groundwater monitoring conducted at a nearby environmental cleanup site located at 11124 Washington Blvd. (a former dry-cleaner facility approximately 0.3 miles southwest of the Subject Property) indicates that the depth to first groundwater ranged from approximately 30 to 35 feet below ground surface (bgs). Groundwater gradient at the former dry-cleaning facility was observed to be toward the south (Wolverine, 2008).

zone (evidence of surface displacement since the Holocene and considered active). The nearby Newport-Inglewood fault zone intersects the Baldwin Hills and is identified as the Inglewood Oil Field, an area with extensive oil and gas exploration located approximately 1.3 miles southeast of the Subject Property (Psomas, 2017).

The Subject Property is situated over Quaternary alluvium consisting of sand and silt-clay derived from nearby Santa Monica Mountains and stream channel deposits (Dibblee, 1991). Below the unconsolidated alluvium are several thousand feet of marine and non-marine sedimentary deposits subdivided into the Lakewood, San Pedro, Inglewood, and Pico Formations (Psomas, 2017).

5.3.1 Groundwater

The Subject Property is located within the Coastal Plain of Los Angeles Groundwater Basin, Santa Monica Subbasin. The Newport-Inglewood fault forms the eastern boundary for the subbasin and appears to restrict the movement of groundwater between the Baldwin Hills and about one-half mile south of Santa Monica Blvd. The Overland Avenue fault in the Ballona gap also appears to restrict groundwater movement, because groundwater levels on the east side of the fault are much higher than on the west side. Groundwater replenishment is mainly from percolation of precipitation and surface runoff from the Santa Monica Mountains (DWR, 2004).

Information related to groundwater depth or quality at the Subject Property was not available for review. Historical groundwater monitoring conducted at a nearby environmental cleanup site located at 11124 Washington Blvd. (a former dry-cleaner facility approximately 0.3 miles southwest of the Subject Property) indicates that the depth to first groundwater ranged from approximately 30 to 35 feet below ground surface (bgs). Groundwater gradient at the former dry-cleaning facility was observed to be toward the south (Wolverine, 2008).

6.0 RECORDS REVIEW

6.1 Standard Environmental Record Sources

To determine if the Subject Property has any documented environmental concerns, or if other sites with documented environmental concerns exist within the search radii of the Subject Property prescribed by ASTM 1527 and *All Appropriate Inquiry* standards, Northgate reviewed a summary of regulatory agency database listings prepared by EDR on November 21, 2023. In addition, where appropriate, Northgate reviewed local regulatory agency files for additional specific information regarding sites identified in the EDR report judged to be of possible concern to the Subject Property. The EDR report presenting a summary of the agency databases reviewed and a map showing the location of the identified sites is provided as Appendix B (EDR, 2023b). The results of the database search and follow-up agency file review are summarized below.

6.1.1 Subject Property

The Subject Property is listed on various regulatory agency databases related to the use, storage, or release of hazardous materials by onsite tenants, but is not on the EDR Historic Automobile or Drycleaner proprietary (non-regulatory) databases searched by EDR (Appendix B), as summarized below:

- Southern California Edison is identified at the Subject Property and is listed on the HWTS database, but no further information was provided.
- Hamilton-Avnet Electronics is identified at the Subject Property and is listed on the HWTS for the disposal of oxygenated and halogenated solvents in the mid to late 1980's. It is also registered as a RCRA SQG.
- Hamilton Avnet Electronics is identified at the Subject Property and is listed on the HAZNET and HWTS databases for the generation of unspecified solvents, polymeric resin waste, acid liquids, liquids with halogenated organic compounds, and photochemical & photo processing waste beginning in 1990 through 1997.
- Undressed Production is identified at the Subject Property and is listed on the HWTS database for the disposal of organic aqueous solutions in the late 1990's.
- Ken Cross is identified at the Subject Property and is listed on the HWTS database for disposal of latex waste from the late 1990's to the early 2000's.
- Blast from the Past is identified at the Subject Property and is listed on the HWTS database for the disposal of organic aqueous solutions in the late 1990's.
- Tracy Takes on Tracy Ullman is identified at the Subject Property and is listed on the HWTS database, but no further information was provided.

- AT&T Mobility is identified at the Subject Property and is listed on the CERS database as a chemical storage facility. No further information is provided, other than a 2022 compliance evaluation inspection which revealed no violations.

6.1.2 Subject Property Vicinity Sources

The regulatory agency database search prepared by EDR (Appendix B) indicates the presence of 220 regulatory and other database listings for properties located within an approximate one-mile radius of the Subject Property. Sites with documented releases impacting groundwater located within about 0.25-mile upgradient of the Subject Property, or otherwise judged to be of potential impact to soil, soil vapor, or groundwater quality at the Subject Property, are summarized in the following table.

Property Name	Agency Database	Location Relative to Subject Property	Potential Environmental Concern
Ron Rothstein – 4063 Huron Ave, Culver City, CA	RCRA NonGen/NLR	Adjacent to the southwest of the Subject Property & across Huron Ave (downgradient)	Information in the EDR report indicates that the facility was identified as a non-generator of hazardous waste. No violations or releases are reported. No further information was provided for this facility. Given the lack of reported releases or spills and the downgradient location relative to the Subject Property, this facility is not likely to represent a significant potential threat to soil, soil vapor, or groundwater quality at the Subject Property.
North Thomas L – 4117 Huron Ave, Culver City, CA	EDR HIST AUTO	Adjacent to the south of the Subject Property & across Huron Ave (downgradient)	Information in the EDR report indicates that a gasoline service station existed at this location from 1989 through 1993. No further information was reported. Given the lack of releases or spills and the downgradient location relative to the Subject Property, this facility is not likely to represent a significant potential threat to soil, soil vapor, or groundwater quality at the Subject Property.
Leonard Guerrero – 4136 Charles Ave, Culver City, CA	RCRA NonGen/NLR	Adjacent to the east of the Subject Property & across Charles Ave (downgradient)	Information in the EDR report indicates that the facility was identified as a non-generator of hazardous waste. No violations or releases are reported. No further information was provided for this facility. Given the lack of reported releases or spills and the downgradient location relative to the Subject Property, this facility is not likely to represent a significant potential threat to soil, soil vapor, or groundwater quality at the Subject Property.

Property Name	Agency Database	Location Relative to Subject Property	Potential Environmental Concern
Hudson Pacific Properties LP/Hudson 10950 Washington, The Mica Corp – 10900 Washington Blvd, Culver City, CA	RCRA NONGEN/NLR, FINDS, ECHO	Adjacent to the north of the Subject Property (upgradient)	Information in the EDR report indicates that the facility was identified as a non-generator of hazardous waste. The facility appears to be a computer and electronic product manufacturing operation. No violations or releases are reported. No further information was provided for this facility. Given the lack of reported releases, this facility is not likely to represent a significant potential threat to soil, soil vapor, or groundwater quality at the Subject Property.
Ohmega Tech Inc, The Mica Corp – 4031 Elenda St, Culver City, CA	RCRA-SQG, ENVIROSTOR, CERS HAZ WASTE, FINDS, ECHO, LOS ANGELES CO. HMS, HWTS, HAZNET, WDS, CERS, SWEEPS UST, SEMS-ARCHIVE	Adjacent to the north of the Subject Property (upgradient)	Information in the EDR report indicates that the facility is a SQG of hazardous waste, including ignitable waste, liquids containing nickel, alkaline solutions, acidic liquids, inorganic solids, and oil-containing waste. The facility is listed as having an industrial discharge permit, applicable to any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements. A number of administrative violations were issued to the facility from 2013 to 2023, none of which were related to the release of hazardous materials. The Envirostor website indicates that this facility has a tiered permit and has been referred to another agency with no cleanup specified and no further information available. Given the lack of reported releases, this facility is not likely to represent a significant potential threat to soil, soil vapor, or groundwater quality at the Subject Property.

In summary, the Subject Property is bordered to the north, east and southwest by RCRA non-generating facilities. Immediately adjacent to the north is a facility that produces electronic parts and components (Ohmega Tech), is a small quantity generator of hazardous waste, and holds an industrial discharge permit. While this facility could potentially cause environmental impacts, no record of hazardous materials release could be located.

6.2 Vapor Encroachment Screening

Northgate evaluated the Subject Property as well as surrounding properties for potential vapor encroachment concerns. The evaluation took into consideration current or past activities that could cause vapor encroachment concerns. A "Tier I" VES was performed to evaluate the potential for vapors associated with contaminated soil and/or groundwater to impact the Subject Property, whether originating from the Subject Property or from nearby vicinity Subject Property sources (EDR, 2023c). For properties where a vapor encroachment concern (VEC) could not be ruled out, existing subsurface investigation reports, if available, were used to evaluate potential impacts to the Subject Property (Tier 2 screening).-The following table presents a summary of the VES Findings.

Potential for Vapor Intrusion on Subject Property	
Areas of Concern	*Conclusion*
Subject Property (existing land use)	VEC not identified
Subject Property (former land use)	VEC identified.
Adjoining Property or near-by Property Operations or Existing Conditions	VEC not identified
Historical Uses of Adjoining Property or Near-by Properties	VEC not identified

Northgate's review identified the historic use of chlorinated and halogenated solvents by the former occupant of the Subject Property, Hamilton-Avnet Electronics, as a potential contamination source that could have directly impacted soil, soil vapor, or groundwater quality at the Subject Property. Concerning off Subject Property contamination sources, the adjacent Ohmega Technologies Inc. was evaluated for their generation of a variety of hazardous waste and the use of an industrial discharge permit, but found that this facility does not have a history of documented releases of any hazardous material. No other sites were considered as a VEC concern. As a result, the only VEC concern with the potential to be present for the Subject Property or related to historic land use is the former occupant, Hamilton-Avnet Electronics and their use of chlorinated and halogenated solvents.

6.3 Additional Environmental Record Sources

Northgate contacted local regulatory agencies for information regarding the use or storage of hazardous materials at the Subject Property, and reviewed files at any agency maintaining a file for the Subject Property beginning on November 8, 2023. The following agencies were contacted for information regarding the use or storage of hazardous materials at the Subject Property:

- California Department of Toxic Substances Control EnviroStor Website;
- State Water Resources Control Board GeoTracker Website;
- California Environmental Protection Agency Website;
- Regional Water Quality Control Board – Los Angeles Region;
- Los Angeles County, Department of Public Health;
- Los Angeles County Fire Department;
- Culver City Public Works Department;
- Air Quality Management District, South Coast; and
- Oil and Gas Wells.

The results of the records review are described in the following sections. Copies of pertinent records and reports for the Subject Property obtained during this review are included in Appendix C.

6.3.1 Department of Toxic Substances Control EnviroStor Website

The Subject Property is not listed on the Department of Toxic Substances Control (DTSC) EnviroStor website, and thus, there are no files related to the property.

6.3.2 State Water Resources Control Board GeoTracker Website

The Subject Property is not listed on the State Water Resources Control Board (SWRCB) GeoTracker website, and thus, there are no files related to the property.

6.3.3 California Environmental Protection Agency Website

The Subject Property is listed on the California Environmental Protection Agency (CalEPA) Regulated Site Portal as having a chemical storage facility for the onsite occupant, AT&T Mobility. The Subject Property further indicated that AT&T Mobility, a tenant operating at the Subject Property, appears to be subject to Tier II reporting under the Emergency Planning and Community Right-to-Know Act (EPCRA) which involve notifying local authorities on an annual basis concerning the storage of hazardous chemicals in quantities above certain prescribed thresholds.

6.3.4 Regional Water Quality Control Board – Los Angeles Region

Northgate submitted a file review request to the Regional Water Quality Control Board – Los Angeles Region (RWQCB). The RWQCB indicated that they did not have any records relating to the Subject Property.

6.3.5 Los Angeles County, Department of Public Health

Northgate reviewed an online file review system maintained by the Los Angeles County Department of Public Works for industrial waste, USTs, and stormwater discharge permits. The online system did not contain a listing for any of the addresses associated with the Subject Property.

Additionally, Northgate submitted a file review request to the Los Angeles County Department of Public Works. At the time this report was prepared, no response was received from this agency. Northgate will issue an addendum to this report if any public records received from this agency within 90 days of the date of this report significantly changes the conclusions or recommendations of this report.

6.3.6 Los Angeles County Fire Department

Northgate submitted a file review request to the Los Angeles County Fire Department. At the time this report was prepared, no response was received from this agency. Northgate will issue an addendum to this report if any public records received from this agency within 90 days of the date of this report significantly changes the conclusions or recommendations of this report.

6.3.7 Culver City Public Works Department

Northgate submitted a file review request to Culver City. Culver City provided copies of multiple permits associated with the Subject Property. Most permits were associated with various building improvements (electrical, plumbing, general remodeling). However, one permit from July 18, 1983, was for the removal of one 10,000-gallon fuel storage tank (Appendix C). The one-page permit document does not provide any further information nor was any information available to indicate if this was an aboveground or underground storage tank. No tank closure documentation was available.

6.3.8 Air Quality Management District, South Coast

Northgate submitted a file review request to the Air Quality Management District (AQMD) for the South Coast. On November 29, 2023, the AQMD provided a series of records relating to prior and current tenants at the Subject Property. This included the following:

- 10950 Washington Hudson: The record provided by the AQMD for this tenant indicated two rejected applications for natural gas fired boilers from 2011, an approved air conditioning installation plan (Rule 1415) from 2013, and an approved boiler application from 2014. No further information was provided.
- Centropolis Effects: The record provided by the AQMD for this tenant indicated a canceled application for a film cleaning machine and another canceled application for an activated carbon adsorber drum vent. Both canceled applications were from 1999. No further information was provided.
- Hamilton/Avnet Electronics: The records provided by the AQMD for this former occupant indicated three granted permits for a 280-gallon chlorinated and halogenated hydrocarbon storage tank in 1982, a baking oven in 1979, and a degreaser in 1979. A copy of the permit to operate for each of these devices was also provided. An inspection form from 1989, which was left largely blank, was provided citing "a failure to submit AP Trip Reduction Plan". A subsequent inspection form from the same year was provided and stated that the tenant had corrected this issue. No further information was provided.
- Hudson Pacific Prop.: The records provided by the AQMD for this tenant indicated two granted permits, one for a boiler in 2017 and one for an air conditioning installation (Rule 1415) in 2019. No further information was provided.
- NFL Network: The records provided by the AQMD for this tenant indicated two approved permits for emergency generators (>500HP) in 2010 & 2011, and a rejected application for an emergency generator in 2010. Two approved permits for air conditioning installations (Rule 1415) were also included from 2013 & 2016. An inspection report from 2010 was provided citing a violation stemming from the installation and operation of two emergency generators without first obtaining permits to construct and operate. A copy of a permit to operate was provided for two generators dated August 8, 2012. Documents were also provided from 2006 pertaining to the abatement of asbestos roofing materials. No further information was provided.

6.3.9 Oil and Gas Wells

According to the EDR GeoCheck® - Physical Setting Source Addendum located in the EDR Radius Report (Appendix B), there are no oil or gas wells located on the Subject Property and there are no wells located within one-quarter mile of the Subject Property. There are at least two oil & gas wells located within one half-mile of the Subject Property, and another four wells located between one half-mile and one mile of the Subject Property. Information available on the California Department of Conservation, Geologic Energy Management Division's (CalGEM) website also confirms the location and status of these oil and gas wells located in the vicinity of

the Subject Property, which appear to be either plugged or idle. There are no wells that appear to represent an environmental concern to the Subject Property.

6.4 Historical Records Review

Information on historical land use at the Subject Property and adjacent area was evaluated by reviewing historic aerial photographs, maps, and other documents. Summaries of these investigation findings are presented below.

6.4.1 Aerial Photographs

Northgate reviewed historic aerial photographs of the Subject Property from 1928, 1938, 1947, 1953, 1964, 1977, 1979, 1981, 1989, 1994, 2002, 2005, 2009, 2012, 2016, and 2020 obtained from EDR on December 8, 2023. Copies of the aerial photographs are provided in Appendix D (EDR, 2023d). A summary of the aerial photograph review is presented below.

Year: 1928	**Scale:** 1” = 500’	**Source:** FAIR
Subject Property Description: The Subject Property is shown as a combination of open land with two small residential structures on the southwestern portion of the property, and a large commercial structure in the northern portion of the property.		
North:	Washington Boulevard followed by residential and commercial developments .	
East:	Commercial structures adjacent to the property boundary with an aggregate stockyard further east.	
South:	Sparse residential developments with open undeveloped lots further south.	
West:	Residential developments with open lots and an agricultural field further west.	

Year: 1938	**Scale:** 1” = 500’	**Source:** USDA
Subject Property Description: The Subject Property appears similar to the 1928 photograph.		
North:	Appears similar to the 1928 photograph.	
East:	Appears similar to the 1928 photograph.	
South:	Appears similar to the 1928 photograph.	
West:	Appears similar to the 1928 photograph.	

Year: 1947	**Scale:** 1” = 500’	**Source:** FAIR
Subject Property Description: The Subject Property appears similar to the 1938 photograph, except that the surface parking associated with the commercial development appears to have expanded in the northern portion of the Subject Property.		
North:	Appears similar to the 1938 photograph.	
East:	Appears similar to the 1938 photograph, but with additional residential developments beyond the border of the Subject Property.	
South:	Densely populated residential developments appear just south of the border of the Subject Property, and beyond.	
West:	Densely populated residential developments appear just west of the border of the Subject Property, and beyond.	

Year: 1953	**Scale:** 1” = 500’	**Source:** USDA
Subject Property Description: The Subject Property appears similar to the 1947 photograph.		
North:	Appears similar to the 1947 photograph.	
East:	Appears similar to the 1947 photograph.	
South:	Appears similar to the 1947 photograph.	
West:	Appears similar to the 1947 photograph.	

Year: 1964	**Scale:** 1” = 500’	**Source:** USGS
Subject Property Description: The northern portion of the Subject Property has been developed with a large commercial structure, the central portion of the Subject Property has been developed with a paved parking lot that is associated with the commercial building, and the southeastern portion of the Subject Property remains shown as vacant land.		
North:	Appears similar to the 1953 photograph.	
East:	Appears similar to the 1953 photograph.	
South:	Appears similar to the 1953 photograph.	
West:	Appears similar to the 1953 photograph, except for a new freeway that has been constructed approximately one-half-mile from the Subject Property.	

Year: 1977	**Scale:** 1” = 500’	**Source:** EDR/Bruster Pacific
Subject Property Description: Appears similar to the 1964 photograph, except that a parking structure has been constructed to replace the surface parking in the central portion of the Subject Property and the southeastern portion of the Subject Property has been paved and is utilized as a surface parking lot.		
North:	Appears similar to the 1964 photograph, except for previous buildings having been replaced with what appears to be a new school.	
East:	Appears similar to the 1964 photograph.	
South:	Appears similar to the 1964 photograph.	
West:	Appears similar to the 1964 photograph.	

Year: 1979	**Scale:** 1” = 500’	**Source:** EDR/Bruster Pacific
Subject Property Description: The Subject Property appears similar to the 1977 photograph.		
North:	Appears similar to the 1977 photograph.	
East:	Appears similar to the 1977 photograph, except for a large residential development being constructed further east of the Subject Property.	
South:	Appears similar to the 1977 photograph.	
West:	Appears similar to the 1977 photograph.	

Year: 1981	**Scale:** 1” = 500’	**Source:** EDR/Bruster Pacific
Subject Property Description: The Subject Property appears similar to the 1979 photograph.		
North:	Appears similar to the 1979 photograph.	
East:	Appears similar to the 1979 photograph, except for additional residential development filling in further east of the Subject Property.	
South:	Appears similar to the 1979 photograph.	
West:	Appears similar to the 1979 photograph.	

Year: 1989	**Scale:** 1” = 500’	**Source:** USGS/DOQQ
Subject Property Description: The Subject Property appears similar to the 1981 photograph.		
North:	Appears similar to the 1981 photograph.	
East:	Appears similar to the 1981 photograph.	
South:	Appears similar to the 1981 photograph.	
West:	Appears similar to the 1981 photograph.	

Year: 1994	**Scale:** 1” = 500’	**Source:** USGS/DOQQ
Subject Property Description: The Subject Property appears similar to the 1989 photograph.		
North:	Appears similar to the 1989 photograph.	
East:	Appears similar to the 1989 photograph.	
South:	Appears similar to the 1989 photograph.	
West:	Appears similar to the 1989 photograph.	

Year: 2002	**Scale:** 1” = 500’	**Source:** USDA
Subject Property Description: The Subject Property appears similar to the 1994 photograph.		
North:	Appears similar to the 1994 photograph.	
East:	Appears similar to the 1994 photograph.	
South:	Appears similar to the 1994 photograph.

In summary, historical aerial photographs of the Subject Property depicted small residential structures on the southwestern portion of the property and a commercial structure on the northern portion of the property, with large portions of undeveloped land, since at least 1928. The Subject Property remained in this configuration through the early 1940s. By 1964, the northern portion of the Subject Property was occupied by a new commercial structure, the central portion of the Subject Property was occupied by a paved parking lot, and the southwestern portion of the Subject Property was vacant land. In 1977, a parking structure was developed to replace the surface parking on the central portion of the Subject Property and the southern portion was developed with a paved parking lot. The Subject Property has remained in this configuration to the present.

Land use in the vicinity of the Subject Property was sparsely populated residential development, until at least the late 1930's when commercial and industrial developments begin to appear in the region surrounding the subject property. From 1947 onward, residential developments expanded throughout the region, with commercial and industrial developments scattered across the region and fronting Washington Boulevard. A large parcel just east of the Subject Property contained an aggregate yard and office complex from the late 1920's, until it began to be replaced by a housing development in the late 1970s. The configuration of large residential developments with commercial/industrial development scattered throughout has remained to this day.

6.4.2 Sanborn Maps

Northgate reviewed Sanborn fire insurance maps for the Subject Property for the years 1924, 1929, 1949, 1950, and 1970 obtained from EDR on December 11, 2023. A copy of the Sanborn Map Report is provided in Appendix E (EDR, 2023e).

1924:	A restaurant and dance hall, named the "Plantation Roadhouse," is mapped on the north-central portion of the Subject Property. A transformer is labeled in the rear of the Plantation Roadhouse establishment. The remainder of the Subject Property is shown as vacant land or unmapped.
North:	Not mapped.
East:	Not mapped.
South:	Not mapped
West:	Not mapped.

1929:	A restaurant and dance hall, named the "Plantation Roadhouse," is mapped on the north-central portion of the Subject Property. A transformer is labeled in the rear of the Plantation Roadhouse establishment. A small residential dwelling with a small detached automotive garage is mapped in the south-central portion of the property.
North:	Additional lots are depicted across Washington Boulevard, north of the Subject Property, with a grocery store being situated upon one of the lots.
East:	A residential dwelling borders the Subject Property, along with commercial structures against Elenda Street. The remainder of the area is unmapped.
South:	Not mapped
West:	Several undeveloped lots border the Subject Property, three of which are occupied by residential dwellings. Additional undeveloped lots are present across Huron and Tilden Avenues further west.

1949:	The restaurant and dance hall on the northern portion of the Subject Property have been renamed the "Foreman Phillips Country Barn," and a stage has been added to this area. The parking area fronting Washington Boulevard has been labeled "Auto Trailer Camp". A store identified as "Trailer Sales" is situated on the southwestern portion of the Subject Property. The small automotive garage is no longer depicted in the southeastern portion of the Subject Property.
North:	Appears similar to the 1929 map, except for commercial development has expanded just across Washington Boulevard
East:	Appears similar to the 1929 map, except that the commercial structures between the Subject Property boundary and Elenda Street are now labeled with "MFG Photo Equipment," which appears to be a facility for manufacturing photography equipment.
South:	Not mapped
West:	Appears similar to the 1929 map, except for several residential dwellings now occupying the previously mentioned undeveloped lots, and an Auto Parts & Sales establishment adjacent to the Subject Property.

1950:	Appears similar to the 1949 map, except that the restaurant and dance hall is now labeled “Aircraft Parts Warehouse” that includes an office, a warehouse, and a chemical storage area that is identified in the southern portion of this commercial area..
North:	Appears similar to the 1949 map.
East:	Appears similar to the 1949 map.
South:	Not mapped
West:	Appears similar to the 1949 map.

1970:	A large commercial structure occupies the northern portion of the Subject Property with the remainder of the Subject Property identified as parking.
North:	A large commercial building now sits adjacent to the Subject Property, with a transformer in the rear.
East:	Appears similar to the 1950 map.
South:	Not mapped
West:	Appears similar to the 1950 map.

In summary, the Subject Property was occupied by a restaurant and dance hall in the northern portion of the Subject Property in the 1920s with a small residence and detached garage in the southwestern portion of the Subject Property in 1929. At that same time, residential lots begin to appear within the vicinity of the Subject Property. In 1949, the restaurant and dance hall expanded to include a stage and the residential dwelling and detached garage are no longer depicted, and commercial and residential development continues to expand in the vicinity, with eastern adjacent commercial structures appearing to serve as a manufacturing facility of photography equipment. In 1950, the structures in the northern portion of the Subject Property were identified as an aircraft parts warehouse that included an office, a warehouse, and a chemical storage area. By 1970, the Subject Property was developed with a large commercial structure int eh northern portion of the Subject property with the remainder of the Subject Property shown as parking. At this time, commercial and residential developments surround the Subject Property.

6.4.3 Topographic Maps

Northgate reviewed historic topographic maps for the Subject Property for the years 1894, 1896, 1898, 1900, 1902, 1920, 1921, 1925/1926, 1930/1934, 1950, 1964/1966, 1972, 1981, 1994, 1995, 2012, 2015, 2018, and 2021/2022 obtained from EDR on December 7, 2023. Copies of the topographic maps are provided in Appendix F (EDR, 2023f).

Quadrangle:	Los Angeles	**Scale:** 1:62,500	**Series:** 15 Minute
1894:	The Subject Property and vicinity are shown as vacant land, with sparsely clustered development throughout the region. Roads are mapped in the area, including adjacent to the north and east of the Subject Property. A small river is mapped to the west of the Subject Property, and Ballona Creek is mapped to the south of the Subject Property. The topography in the vicinity of the Subject Property slopes gently towards the west.		
Quadrangle:	Redondo/Santa Monica	**Scale:** 1:62,500	**Series:** 15 Minute
1896:	The Subject Property and vicinity appear similar to the 1894 map.		
Quadrangle:	Santa Monica	**Scale:** 1:62,500	**Series:** 15 Minute
1898:	The Subject Property and vicinity appear similar to the 1896 map.		
Quadrangle:	Los Angeles	**Scale:** 1:62,500	**Series:** 15 Minute
1900:	The Subject Property and vicinity appear similar to the 1898 map.		
Quadrangle:	Santa Monica	**Scale:** 1:62,500	**Series:** 15 Minute
1902:	The Subject Property and vicinity appear similar to the 1900 map.		
1920:	The Subject Property and vicinity appear similar to the 1902 map, except for a large expansion of development in the general vicinity.		
1921:	The Subject Property and vicinity appear similar to the 1920 map.		
Quadrangle:	Sawtelle/Hollywood	**Scale:** 1:24,000	**Series:** 7.5 Minute
1925/1926:	Two small structures and one large structure are depicted on the Subject Property. Development appears to continue to expand in the overall vicinity.		
Quadrangle:	Inglewood/Sawtelle/Venice	**Scale:** 1:24,000	**Series:** 7.5 Minute
1930/1934:	Appears similar to the 1925/1926 map, except that additional small structures are depicted west and south of the Subject Property, and additional large buildings have been added to the north adjacent parcels.		
Quadrangle:	Beverly Hills/Venice	**Scale:** 1:24,000	**Series:** 7.5 Minute
1950:	The Subject Property and vicinity appear similar to the 1930/1934 map..		
1964/1966:	The Subject Property and vicinity appear similar to the 1950 map, except for the San Diego Freeway is now depicted west of the Subject Property.		
1972:	The Subject Property and vicinity appear similar to the 1964/1966 map.		
1981:	The Subject Property and vicinity appear similar to the 1972 map.		
Quadrangle:	Beverly Hills	**Scale:** 1:24,000	**Series:** 7.5 Minute
1994:	The Subject Property and vicinity appear similar to the 1981 map.		
1995:	The Subject Property and vicinity appear similar to the 1994 map.		
Quadrangle:	Beverly Hills/Venice	**Scale:** 1:24,000	**Series:** 7.5 Minute
2012:	The Subject Property and vicinity appear similar to the 1995 map.		
2015:	The Subject Property and vicinity appear similar to the 2012 map.		
2018:	The Subject Property and vicinity appear similar to the 2015 map.		
2021/2022:	The Subject Property and vicinity appear similar to the 2018 map.		

In summary, the Subject Property has been shown as undeveloped land since at least 1894, until 1925/1926 when residential structures are depicted. Development continues to increase in the vicinity.

6.4.4 City Directories

Northgate reviewed a summary of local city directory listings for the Subject Property available at approximate three- to five-year intervals from 1920 to 2020 obtained from EDR on December 7, 2023. A copy of the EDR city directory search, along with a tabular summary of the directory listings for the Subject Property, is provided in Appendix G (EDR, 2023g).

Directory listings for the Subject Property provided by EDR from 1975 through 2020 list many of the tenant entities that have been associated with the Subject Property overtime. This has included various entertainment studios, property management entities, software service outlets, electronic manufacturers, and restaurants. Listings in the vicinity of the Subject Property have typically included commercial and residential development, as in the table below. There are too many individual properties and tenants to identify in the table below. Pertinent listings have been identified with a full list provided in Appendix G. Additional listings of potential environmental concern are presented in Section 6.1.2 above.

Address	Location Relative to Subject Property	Year	Occupant Type
10950 Washington Boulevard	Subject Property	1975-1995	Hamilton-Avnet Electronic manufacturers
		1992 - 2020	Various commercial tenants, including entertainment studios, property management entities, software service outlets, and restaurants
10916 Washington Boulevard	East Adjacent (upgradient)	1962-2005	Motorola Aviation Electronics/Avnet Electronics/Hamilton Avnet-Fairchild Semiconductor
10996 Washington Boulevard	West Adjacent (downgradient)	1965-1971	Cliff S. City of Cars, Ulrich Auto Leasing, System Rent-a-Car

The Subject Property and vicinity have historically seen a combination of residential and commercial development. The surrounding historic land uses, including a producer of electronic components, can be associated with the usage, storage, generation, and potential release of hazardous materials, which may represent a potential threat to soil, soil vapor, or groundwater quality at the Subject Property.

6.5 Building Permits

Northgate reviewed a summary of building permits for the Subject Property and adjacent properties obtained from EDR on November 20, 2023. Records for the Subject Property from 1994 to 2023 include numerous permits for various renovations including electrical, antenna installs, HVAC, elevators, mechanical, plumbing, building alterations and repairs, and similar improvements. One 2017 permit was for the installation of a battery enclosure at an existing cell site. No permits related to the former storage tank were identified.

Records for the adjacent properties in the vicinity of the Subject Property from 1995 to 2023 generally included similar building alterations and repairs as for the Subject Property including electrical, mechanical, plumbing, building alterations and repairs, and similar improvements. Permits for the construction of buildings including condominiums were also found, with subterranean parking, as well as the demolition of residential dwellings.

Offsite facilities of potential environmental concern to the Subject Property are discussed further in Section 6.1.2 above. A copy of the Building Permit Report is provided in Appendix H (EDR, 2023h).

6.6 Property Tax Map

Northgate requested property tax maps for the Subject Property from EDR. The Subject Property identified as APN 4208-025-018, 4208-024-001, 4208-024-002, and 4208-024-018, was not covered by any current tax maps. A copy of the Property Tax Map Report is provided in Appendix I (EDR, 2023i).

6.7 Previous Reports

Northgate was provided with a previous Phase I ESA report prepared by Citadel Environmental Services, Inc. for the Subject Property. This previous Phase I ESA provided by the User is summarized below. Copies of pertinent reports are included in Appendix C.

Phase I Environmental Site Assessment Report for 10950 West Washington Boulevard, Culver City, California 90212 dated January 10, 2011, prepared by Citadel Environmental Services, Inc. (Citadel, 2011a)

Citadel Environmental Services, Inc. (Citadel) prepared a Phase ESA Report on behalf of Hudson Pacific Properties, LP that evaluated the Subject Property for potential RECs. The study area, that included the Subject Property, was identified as 5.8-acres with a three-story commercial office building, with an attached parking garage, and one building containing interior office space, a café, and two large sound stages. The Subject Property is further

described as having a paved road located between the site buildings that provides access to the parking structure and surface parking lots, as well as two small security buildings located along the central driveway.

During the investigation, Citadel reviewed a 1997 ESA from Dames and Moore which included sampling for asbestos-containing materials. In that report, limited quantities of asbestos-containing flooring materials, and roofing mastics were reported. Records with the Culver City Building Department indicated that a major interior renovation had occurred between 1997 and 2001. Most interior improvements were demolished during this renovation. During the Subject Property reconnaissance for the 2011 ESA by Citadel, none of the materials identified in the Dames and Moore Phase I ESA were observed, but no documentation on the removal of ACMs was provided.

Citadel reviewed historical records which listed former tenants of the Subject Property, including Avnet Electronics, which was listed as a RCRA SQG of regulated materials and hazardous waste, and was a tenant at the Subject Property from 1963 through 1997. Citadel concluded that although various chemicals were utilized in this entity's former operations, the lack of any reported release or improper handling of hazardous materials ruled out any significant environmental concern.

Citadel reviewed records provided by the City of Culver Building and Fire Prevention, which included a permit from July 18, 1983, for the removal of a 10,000-gallon storage tank at the Subject Property. No documentation was provided regarding the closure of this tank, which represented an environmental concern. This permit is included in Appendix C.

6.8 Non-Scope Considerations

The following potential environmental concerns that are not within the scope of the ASTM Standard were evaluated as part of this assessment.

6.8.1 Floodplain Maps

Northgate viewed an online version of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for the City of Culver City, California, Panel 06037C1595G. According to the FIRM, the Subject Property is not mapped within any flood hazard area (FEMA, 2018).

6.8.2 Radon

The California Department of Health Services' (DHS) online list of indoor radon levels indicates that radon concentrations from 14 indoor air samples collected in zip code area 90232 were less than 4.0 pico-curies per liter (pCi/L) (DHS, 2016). According to the EDR Radius Report (Appendix B), the federal EPA radon zone for Los Angeles County is Zone 2 (indoor average level less than or equal to 2 pCi/L and greater than or equal to 4 pCi/L).

The State of California Division of Drinking Water and Environmental Management maintains a database of radon test results indicating that out of 63 samples collected in zip code 90232, in the living area-first floor, 98% were below 4 pCi/L and 2% were between 4 and 20 pCi/L. The DHS and the EPA recommend that some form of mitigation be conducted for houses with indoor radon concentrations of 4 pCi/L or greater.

These results indicate that radon gas does not appear to constitute a significant environmental concern at the Subject Property.

7.0 INTERVIEWS

7.1 Owner Interview

Mr. Jim Souter, Senior Vice President of Engineering for Hudson Pacific Properties, The Subject Property owner representative, completed a Phase I Environmental Site Assessment Questionnaire. Mr. Soutter has been associated with the Subject Property as the owner for eight years. He was not aware of any environmental cleanup liens against the Subject Property or any activity or land use restrictions or limitations associated with the Subject Property. With the exception of small quantities of water treatment chemicals at the Subject Property, he was not aware of any specific chemicals, spills, or import fill material at the Subject Property.
Mr. Soutter indicated that he was not aware of the presence of any current or historic underground or aboveground storage tanks at the Subject Property. He was not aware of the presence of any environmental permits, hazardous waste generators, or notices of violation for the Subject Property. Mr. Souter did not identify any areas of environmental concern impacting the Subject Property. He also provided Northgate with a copy of a previous Phase I ESA conducted for the Subject Property. A copy of the completed questionnaire is provided in Appendix J.

7.2 Key Subject Property Manager Interview

The Subject Property is owned and managed by Hudson Pacific Properties. Mr. Jim Soutter was interviewed via a Phase I ESA Questionnaire provided by Northgate, as discussed further in Section 7. 1 above.

7.3 Subject Property Occupants

Northgate did not interview any Subject Property occupants as part of this Phase I ESA as the Subject Property is vacant, and unoccupied.

7.4 Regulatory Agency Interview

Northgate did not interview any regulatory agency personnel as part of this Phase I ESA.

8.0 PHASE I ESA CONCLUSIONS AND RECOMMENDATIONS

This report presents the results of a Phase I Environmental Site Assessment (ESA) at a property located at 10950 Washington Boulevard in Culver City, California. The Subject Property consists of approximately 5.8-acres of land with commercial development including an office building, a parking garage, and a commercial building with a sound stage. The Subject Property is situated on a parcel identified as Assessor's Parcel Numbers (APNs) 4208-025-018 in Los Angeles County.

The purpose of the investigation is to identify the potential presence of RECs at the Subject Property. A REC refers to the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or under conditions that pose a material threat of a future release to the environment. The following REC was identified during this assessment:

- Northgate did not identify any RECs associated with the Subject Property

An HREC refers to a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example AULs, or other property use limitations). The following HREC was identified during this assessment:

- Northgate did not identify any HRECs associated with the Subject Property.

A CREC refers to a REC affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities, with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, AULs or other property limitations). The following CREC was identified during this assessment:

- Northgate did not identify any CRECs associated with the Subject Property.

A Business Environmental Risk (BER) is defined by ASTM E 1527-13 as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations:

- A permit for the removal of a 10,000-gallon storage tank containing gasoline was provided by Culver City on July 18, 1983 (Appendix C). No further information was

available on the permit. Given that it is unknown whether this was an above or below ground storage tank and considering that no tank closure documentation could be reviewed, the potential for subsurface contamination at the Subject Property cannot be ruled out.

- Records indicate the Subject Property was permitted for a 280-gallon chlorinated and halogenated hydrocarbon storage tank and degreaser in 1982. While no further information regarding this tank or degreaser was provided, the use and storage of chlorinated and halogenated materials onsite during that time period is potential concern.
- Based on the age of the commercial structure, we suspect ACM and LBP are present in building materials within the structure. This is being evaluated by another consultant.

10.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/24/2023 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 07/17/2023 has revealed that there are 7 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 40 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/03/2023 has revealed that there are 2

FINDS sites within approximately 0.001 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 04/13/2023 has revealed that there is 1 LOS ANGELES CO LF METHANE site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR

researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NORTH THOMAS L	4117 HURON AVE	SSE 0 - 1/8 (0.060 mi.)	28	119

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Registry ID: 110002693504

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 11/30/2022. OBSERVATION: The business failed to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan or failure to document and maintain training records for a minimum of three years. CORRECTIVE ACTION: Establish and electronically submit an employee training program containing provisions to ensure initial and annual training for all employees in safety procedures in the event of a release or threatened release of a hazardous material and document and maintain training records for a minimum of three years. Manoj displayed the beginnings on their on-going training. Staff had knowledge but will now start signing off and recording regular annual training.

Violation Source: CERS,

Site ID: 139718
Site Name: OHMEGA TECHNOLOGIES
Violation Date: 10-17-2022
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to report program data electronically.
Violation Notes: Returned to compliance on 10/17/2022. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the required due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the required due date. Corrected on site.

OHMEGA TECH INC (Continued) **1000202352**

Eval Date: 10-21-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Manoj Singh. Reviewed HMBP, a few changes made as a previous manger left the business. During the inspection noticed waste oil that was never submitted to CERS. There were also quantity increases for sodium and ammonium hydroxide. Site maps continued to be accurate for these materials, however. After the inspection, Manoj submitted a new inventory to show the changes needed . Some of the emergency response document needs to be updated, coming back out in January to help Manoj create a new one. Fire code violation listed on report.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-28-2023
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Richard Perez. Manoj no longer employed by Ohmega so Richard wanted to perform the annual HMBP early this year to give him an idea what to expect. They are currently working with an risk management coordinator that has improved their site map, emergency response plan, and employee training requirements. All of these items will be uploaded by CERS submittal due date of April 1st, 2023. During inspection, discovered 110 gal. of tin nickel that needs to be added to active inventory.
Eval Division: Culver City Fire Department

Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 03-02-2023
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Inspection by A.Domanski, consent by Richard Perez. Follow-up inspection to view safety data sheets and verify that amounts of ammonium hydroxide and sulfuric acid are below reporting threshold. It was discovered that each barrel of ammonium hydroxide has about 50 lbs. of a regulated substance, which, with two barrels means they have around 100 lbs. which is under the 500 lb state limit to report for CalARP. The sulfuric acid is mostly waste and mixed with other chemicals and does not hit the other measures needed to report for CalARP. Ohmega has never been in the CalARP program with Culver City so the inspection was to verify that nothing had changed to have a

OHMEGA TECH INC (Continued) **1000202352**

need for them to report as a CalARP facility. No issues.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-17-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Manoj Singh. Reviewed HMBP with Manoj. He explained to me their training for employees but was unable to show any records during the inspection - issued a notice to have documented training. Site map was accurate but inventories were not - sulfuric acid and waste sulfuric acid were both well above their maxes by over 100%. Contacts needed to be changed on activities page - corrected on site along with inventory. Training still outstanding.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS ID: 10212643
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 84730
Site Name: WASHINGTON PLACE AUTOMOTIVE
Violation Date: 08-10-2021
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 08/10/2021. OBSERVATION: The business failed to electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities. CORRECTIVE ACTION: Electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities.Quantity of oil needs to be changed from 55gal. to 110 gal. Used coolant needs changed to 55 gal. Acetylene needs to be added - 200 cu.ft.
Violation Division: Culver City Fire Department

TRANSNATIONAL PROPERTY (Continued) **S106387160**

facility from 1962 to 1986. All equipment related to the former dry cleaner operation was removed from the Site. The Site currently houses an ink and toner cartridges distributor. PCE was detected in soil at concentrations up to 2,400 micrograms per kilogram (ug/kg), at 5 feet below ground surface (bgs). The highest concentration of PCE detected in groundwater is 1,500 micrograms per liter (ug/L) and 40 ug/L of trichloroethylene (TCE). A soil vapor survey consisting of ten sampling points collected at 5 feet bgs yielded up to 120 ug/L. PCE contaminated soil near the source area was remediate using soil vapor extraction (SVE) from June through December 2003. Soil confirmation samples collected in January 2004 indicated nondetectable concentrations of PCE and TCE. Based on the confirmation sampling results, the Regional Board issued a no further action (NFA) for soil only to the Site in August 2004. At the time of soil closure, eight (8) groundwater monitoring wells were installed at and in the vicinity of the Site. Since then, groundwater monitoring has been conducted on a quarterly basis. The results of the most recent groundwater monitoring data show PCE concentrations ranging from 9 to 708 ug/L and up to 31 ug/L of TCE. The sample with the highest concentration was collected from well MW-5, an on-Site and down-gradient well. The overall monitoring data suggests that PCE concentrations in up- and cross-gradient wells have decreased, but increased in down-gradient wells (MW-5, MW-7 and MW-8). The Site is located in the Central Coast Basin of the Coastal Plain of Los Angeles. Based on the soil boring log, the soil beneath the Site consists of a mixture of silt, clayey silt with fine to coarse sand, and a dense gravelly layer to approximately 55 feet bgs. Depth to groundwater was approximately 32 feet bgs measured January 2007, but was 49 feet bgs in the year 2000. Groundwater level is currently rising primarily due to the shutdown of Charnock production wells. The saturated zone at the Site consists of recent alluvium of the Ballona aquifer (

Address: 11132 WASHINGTON PL
City,State,Zip: CULVER CITY, CA 90232
Site ID: 125360
CERS ID: 10208170
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 125360
Site Name: Jacks Automotive Repair
Violation Date: 04-06-2021
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 08/03/2021. OBSERVATION: Uniform Hazardous Waste Manifests and/or disposal records were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for and submit copies to the CUPA.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 125360
Site Name: Jacks Automotive Repair
Violation Date: 05-04-2021
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 05/05/2021. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the required due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the required due date. CERS submittal was not changed since 2015. New submittal completed same day.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-05-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Nancy Cruz. Reviewed HMBP with new owners since Jack sold business. They were well overdue for CERS submittal, so walked Nancy through the process and created a new site map to match with the small changes they made. Quantities varied quite a bit so we made changes to HMBO same day as well as adding oxygen. Working with Nancy to remedy several fire code related issues.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-12-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Matt Lyons, Manager
Eval Division: Los Angeles County Fire Department
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-04-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Arnoush Navab, Manager Due to Covid-19 social distancing practices and protocols, a signature was not captured.
Eval Division: Los Angeles County Fire Department
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-14-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Anoush Nevab. Reviewed HMBP plan briefly as only reportable substance is a 150 gal. diesel generator in the back of the store. Possible the generator is out of service so he is working on verifying if they can decommission it. No issues.

Violations:

Site ID:	29023
Site Name:	Excel Automotors Inc
Violation Date:	06-07-2023
Citation:	40 CFR 1 265.172 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.172
Violation Description:	Failure to accumulate or store hazardous waste in container made of or lined with materials which will not react with, and are otherwise compatible with, the hazardous waste to be stored.
Violation Notes:	Returned to compliance on 07/12/2023. OBSERVATION: Drain Pan with 10 used oil filters located on top of one 55 gallon drum was observed. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating the waste listed above has been transferred into a container that is compatible with the hazardous waste or submit a manifest/receipt demonstrating the waste has been properly disposed of by a registered hazardous waste transporter.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS,

Site ID:	29023
Site Name:	Excel Automotors Inc
Violation Date:	07-12-2017
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing,

EXCEL AUTOMOTORS INC (Continued) **S113011600**

	disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	Returned to compliance on 09/14/2017. OBSERVATION: The generator's EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have reactivated the facility's EPA ID number.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	29023
Site Name:	Excel Automotors Inc
Violation Date:	12-13-2016
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 07/12/2017. OBSERVATION: Generator failed to properly handle, manage, label, and/or recycle used oil and fuel filters. Observed 1(55 G) drained used oil filters. CORRECTIVE ACTION: Owner/Operator shall immediatly comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil and fuel filters. Verify compliance with the CUPA within 30 days.

CERS HAZ WASTE:
Name: TWO BROTHERS AUTO REPAIR
Address: 10881 W VENICE BLVD UN 1
City,State,Zip: LOS ANGELES, CA 90034
Site ID: 163960
CERS ID: 10253689
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 163960
Site Name: TWO BROTHERS AUTO REPAIR
Violation Date: 03-30-2023
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/06/2023. OBSERVATION: 55 gallon waste oil filters container located in the hazardous waste storage area was observed without a hazardous waste label. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 163960
Site Name: TWO BROTHERS AUTO REPAIR
Violation Date: 07-11-2018
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Release/Leaks/Spills - General
Violation Notes: Returned to compliance on 08/02/2018. OBSERVATION: Observed spilled waste oil on top and around the 200 gallon waste oil container in the hazardous waste storage area. CORRECTIVE ACTION: Clean up and properly dispose of waste oil around the 200 gallon waste oil container. Provide proof to the CUPA of the corrective action.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 163960
Site Name: TWO BROTHERS AUTO REPAIR
Violation Date: 06-01-2015
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/01/2015. OBSERVATION: 55 gallons drum for waste coolant unlabeled. Issued HW label and was labeled on-site. All

TWO BROTHERS AUTO REPAIR (Continued) **S123537170**

hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Environmental Interest/Information System:
The Used Oil Recycling System (UORS) is managed by the California Integrated Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

TOSCO - 76 STATION #2994 (Continued) **S100859736**

prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

STEAVEN JONES AUTOMOTIVE FACILITY (Continued) **S113021825**

Eval Date: 07-12-2023
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Kevin Connolly. Reviewed HMBP with Kevin as Aaron is out on vacation. Business split up into 2 different area, one to the south of the lot close to Sepulveda, and another to the west. Hazmat stored at both locations, mostly new and used oil. Site map only showed one of the locations and inventory only showed motor oil - both items need addressed. Back storage in the parking lot for hazwaste shows evidence of a spill with absorbent still on the ground. Advised Kevin this needs to be cleaned immediately and better precautions need to take place if they are going to store hazwaste in that area. OTC issued.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023
Date Data Arrived at EDR: 10/03/2023
Date Made Active in Reports: 10/19/2023
Number of Days to Update: 16

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

Last EDR Contact: 09/27/2023
Next Scheduled EDR Contact: 01/15/2024
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/07/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

South Map:	50004931 VENICE, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

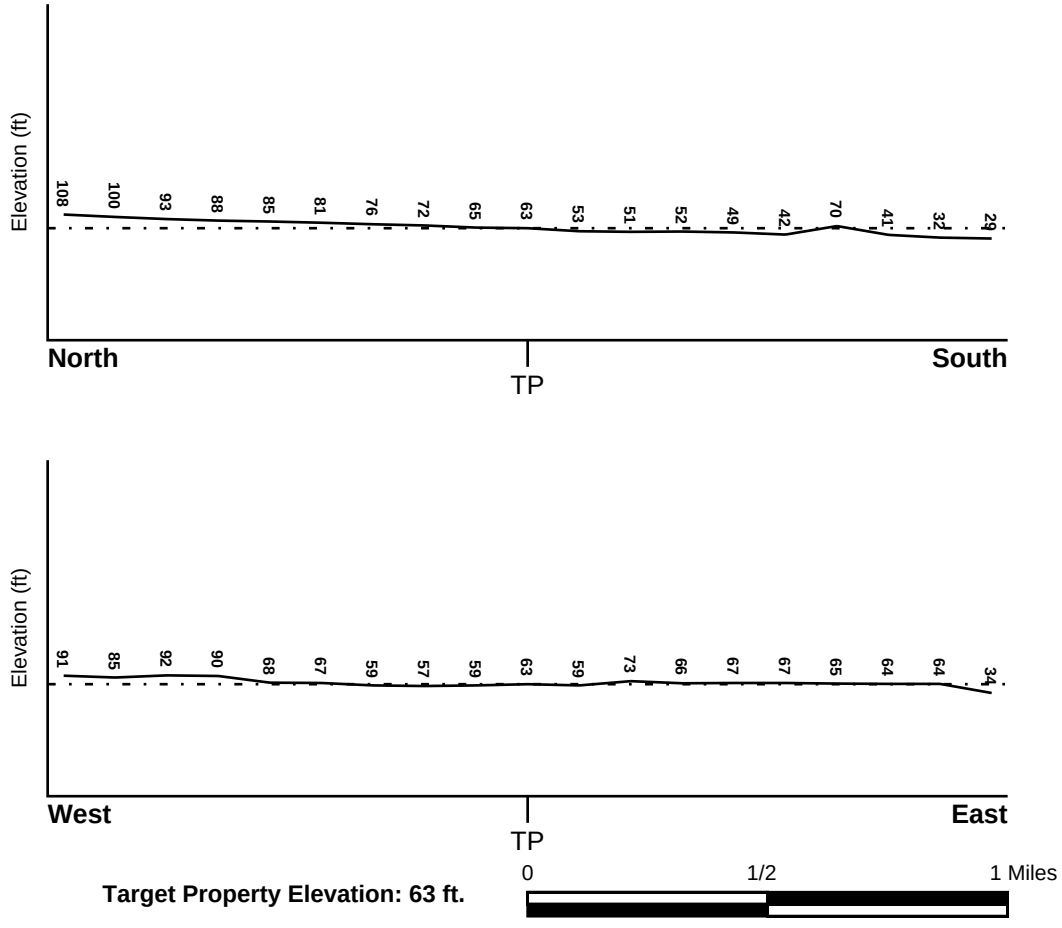
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 63 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1595F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1760F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BEVERLY HILLS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
94	1/4 - 1/2 Mile SW	SSW
298	1/2 - 1 Mile SSW	Not Reported
1G	1/4 - 1/2 Mile SW	SSW
2G	1/2 - 1 Mile SSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.
